DEPARTMENT OF CONSERVATION
& LAND MANAGEMENT
WESTERN AUSTRALIA

MONTE BELLO AND LOWENDAL ISLANDS

BIBLIOGRAPHY

Report prepared as part a study of the Monte Bello Islands
and surrounding waters with funds provided through the
Great Barrier Reef Marine Park Authority
from the Ocean Rescue 2000 Program.

Prepared by P.M. Deegan for the
Department of Conservation and Land Management,
Western Australia. September, 1992.

This Report can be cited as:
Deegan, P M , (1992). *Monte Bello and Lowendal Islands -Bibliography.*
Report prepared for the
Department of Conservation and Land Management. Perth.

While information in this report is an accurate representation of material cited the Department of
Conservation and Land Management disclaims responsibility for any errors that may have occurred.

NOTE

Users of this bibliography should note that generally only references specific to the Monte Bello or Lowendal Islands have been included.

There are in addition general references to Western Australia's marine environment and to the North West coast which should be consulted. An example is G.R. Allen and R. Swainston (1988) "The Marine Fishes of North-Western Australia", Western Australian Museum, 1988.

There are also published papers and reports on the marine environments of other areas on the North-West coast, such as Shark Bay, the Dampier Archipelago and Barrow Island, which are not included here but which may nevertheless be useful in further studies of the Monte Bello and Lowendal areas.

Although a list of some of the State Government department files on the area is included, unpublished reports on those files have only been listed individually if they are substantial reports (see e.g. Crawford 1986). Other reports, particularly those containing observations by departmental staff visiting the islands, are of interest but have not been listed separately.
