

Navigation and Viewing Notes

Each listed species documentation file opens in its own window (Adobe Acrobat full screen mode), fitting to screen width for easy readability [A].

Onscreen Page/Document Navigation is by using the 'page up / down' keys, or by using the mouse scroll wheel.

All species documents are complete self contained A4 documents as compiled by the Author. These documents range from single page up to 5 pages – the average being 4 pages in length [B].

On screen interactive menu buttons are 'close' or 'print' – the 'print' option allowing the user to print these A4 PDF files if required [C].

'Close' will return the user back to the previous on screen menu.

The user can also make use of Adobe Acrobat's own menu item functions, such as copy text or images. Press the 'esc' key to reveal Adobe Acrobat's menu [D].
