

FAMILY ECNOMIDAE

Habitat profile for *Ecnomus* sp. 29

Ecnomus sp. 29 was recorded from only 2 New South Wales localities in this study.

Ecnomus sp. 29 was recorded from a pool and an edge habitat sample from lowland streams between 20-60 m altitude, 200-223 km from the source, with predominantly bedrock substrate. The streams were large 50 m wide, water depth of 0.6 m, with low alkalinity of 25 mg/L and low conductivity of 80 μ S/cm. The recorded water temperature was 21 °C and the pH was 8.2.

Distribution of *Ecnomus* sp AV29 in Australia.
