Mr. N.A. Beeck,
"Summerfield",
EATANNING. W.A.

July 29, 1966.

61/53

Dear Sir,

Please find enclosed a list of bands which were attached to ducks by you and have been recovered during the 1965/66 season.

Yours faithfully,

+ Fauna Officer: Is it necessary
to continue sending this
advice? I understand that
some thought is being given to
the abandoning this system at 29/5/67.
DIRECTOR.

f/u 30/5/67 - send similar list.

243

Mr. L.W. Bell,
36 Arbour Street,
KATANNING. W.A.

July 29, 1966.

61/53

Dear Sir,

Please find enclosed a list of bands which were
attached to ducks by you and have been recovered during
the 1965/66 season.

Yours faithfully,

DIRECTOR.

242

Mr. D. Moir,
Cape Riche,
Via BORDEN. W.A.

July 29, 1966.

61/53

Dear Sir,

Please find enclosed the band which was attached
to a black duck by you and has been recovered during the
1965/66 season.

Yours faithfully,

DIRECTOR.

241

July 29, 1966.

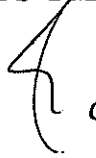

61/53

Mr. J. Traynor,
29 Haynes Street,
NORTH PERTH.

Dear Sir,

Please find enclosed the band which was attached
to a black duck by you and has been recovered during the
1965/66 season.

Yours faithfully,

DIRECTOR.

EAST VICTORIA PARK

October 1, 1963

64/53

Dear Sir,

Many thanks for advising the Wild Life Research Section, C.S.I.R.O., Nedlands in respect to band No. 10104 which you recovered from a Mountain Duck at Garden Lake, Rottnest Island. This duck was banded at Rottnest Island on December 4, 1962.

Wild ducks are banded by a number of authorities in Australia. We were the first in the Commonwealth to begin, having been active since 1952. Like the banding groups in other States, we seek to obtain basic data so that adequate conservation measure can be applied. The information gained by banding relates to their movement, breeding, population structures, the shooting pressures to which they are subject and so on.

I trust that this information will be of interest to you.

Yours faithfully,

CHIEF WARDEN OF FAUNA

File

208

MR. P. VINERS.

The Division of Wildlife Research, C.S.I.R.O., advised on September 20 that they had been contacted by Master Bruce Donaldson of the Balmoral Hotel, 901 Albany Highway, East Victoria Park.

This lad said that he had found a dead mountain duck at Garden Lake, Rottnest Island, on September 10. It was carrying band number 10104 and had been dead approximately two weeks.

Would you please record and advise Master Donaldson of the landing details.

A.

Dear Sir,

Many thanks for returning Band No. 8179 which you found on a dead Black Duck on August 4, 1963.

This band was attached to the duck on March 20, 1962 at Queens Gardens, Perth, which is approximately 217 miles from where you recovered it.

Yours faithfully,

Fule

CHIEF WARDEN OF FAUNA.

Inspector B. Carmichael,

For your information.

D
DIRECTOR.

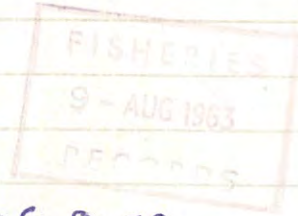

Narrikup

This was on a dead duck found by school boy
Graeme Draper of Narrikup.

Judging by our experience of foxes with
poultry & lambs, the damage looked like the
work of a fox - the throat was torn wide
open & cleanly licked of all blood. (We
still have the body of the duck).

I rang up about this on Monday
morning.

Yours sincerely,
(Mrs) E Draper.

Narrikup South No. 8.

Dear Sir,

Many thanks for returning band No. 9431, which was taken from a duck shot by Mr. L. Williams during February, 1963 on the Gordon River, about one mile north of Tambellup.

This band was attached to a black duck on the 23rd February, 1962 at Hotkers Swamp, 15 miles east of Katanning, approximately 25 miles from where it was recovered.

Yours faithfully,

Dear Sir,

In reply to your Letter of the 15th July
re Duck Band No. 12152 which I sent to you recently.
For your information the Duck was shot on July 6th
at Lakewood near Kalgoorlie and was one of three
shot by the same man. Incidentally, the place
where the Band was attached is where my
married Daughter lives, or quite close, as she
is on the next Farm to Hothers, W. H. Packhards.
Glad to have been of any assistance I remain

Yours truly
Louis Sutcliffe

W.A.

Dear Sir,

Many thanks for your most interesting and informative report for the period ended June 30, 1963.

In respect to duck band No. 12152, I wish to advise that this band was attached to a grey teal on 24th February 1962 at Hotkers Swamp, 15 miles east of Katanning, approx. 295 miles from where it was recovered.

However, before I am able to complete the recovery details of this duck it will be necessary for you to advise of the date it was shot.

Your early advice would be greatly appreciated.

Yours faithfully,

~~B/C 15/8/63~~

"Brandon",
GOELARAMUP.

July 2, 1963

64/53

Dear Sir,

Many thanks for returning Band No. 9700 which you recovered from a black duck near Cowaramup during June 1963. This duck was banded at Wardering Lake in the Woodanilling District on 14th March 1962, approximately 125 miles from where you recovered it.

Wild ducks are banded by a number of authorities in Australia. We were the first in the Commonwealth to begin, having been active since 1952. Like the banding groups in other States, we seek to obtain basic data so that adequate conservation measures can be applied. The information gained by banding relates to their movement, breeding, population structures, the shooting pressures to which they are subject and so on.

I trust that this information will be of interest to you.

Yours faithfully,

CHIEF WARDEN OF FAUNA.

Colliie
12.6.63

Dear Sir,

I received your letter asking for the date I shot the duck. It was March the 17th.

I am glad the ducks have gone, shotguns being fired every Sunday morning at break of day. Someone was even after ducks in the dark with a torch on the night before Good Friday. When I saw the torch being flashed out ~~over~~ over the water, I knew he was not after marrons, so I walked down very quietly & sat on the bank, & he was walking back & forth about 5 yards from the water, he had a bucket & it looked like a net in his hand, but it must have been a gun, I don't suppose he was stupid enough to expect to catch marrons on the bank, anyhow most of the time he was shining the torch away out over the water, so it seems he was stupid if he expected the ducks to stay there. I am enclosing £2 for a hangaroo hunter licence.

Recovery date noted of 14/6/63 ^{Records} Attach to P.P. Please J E Speer

Dear Sir,

Many thanks for advise that you recovered band numbered 12187 from a duck taken 20 miles from Leonora. This bird was a Grey Teal which had been banded on a swamp 15 miles east of Katanning on February 26, 1962. It was therefore about 400 miles away from its banding site when you found it.

This was a most interesting recovery and I am indebted to you for advising us so promptly.

Yours faithfully,

McGinness

Dear Sir,

since sending you the tag, I have been informed that trapping ducks is unlawful, so have pulled the yard down. I am batching, & the trouble is I have one shot with the shot gun & I get more ducks than I want, & a lot get away with pellets in them to die later, & I don't like to see any wild life go to waste, as I live mostly off the land. I only use the farm as a holiday place, from trapping & hunting, for Diamond & Co.

Yours sincerely

Dear Sir,

Thankyou for your letter of April 14 and for band No. 9938 which you returned with it.

This band was placed on a Black Duck at Wardering Lake on April 6, 1962, so the bird was about 65 miles away from its banding site when you shot it on the Tone River.

I am enclosing a business-reply envelope and would appreciate it if you would let me know the date on which the bird was shot. The season does not close until April 30, so you can be assured that we are not trying to persuade you to incriminate yourself?

I have had an extract of your query regarding the pools of the river sent to our senior research office, Mr Bowen. He will let you know in due course whether he cares to hazard a guess as to the cause of the phenomenon.

Yours faithfully,

The Fisheries Dept.

Dear Sirs,

Returning a tag

which was found on a duck shot on the Tone River (Private Waters) 35 miles east of Manginup.

While I am in contact with the Fisheries Dept. I was wondering if you would have any clues in a very mysterious happening here.

The Tone river which runs through the middle of our property & in summer time dries into short pools most of them being $\frac{1}{4}$ to $\frac{1}{2}$ mile long & from 17' to 20' deep & extremely wide. One of these pools for the last three years in succession has stirred & became very muddy about the middle of March every year bringing all fish to the surface many of them dying. Fish mainly consist of perch, eelers & moron, which are caught in small numbers after this happening. Hoping you can assist.

61/53

Dear Sir,

No doubt you will remember forwarding a band which you recovered from a Black duck shot at Owingup Swamps on 22.4.63. Not all the numbers were distinguishable, some having eroded away.

As is usual in such cases we sought the assistance of the Scientific Officers of the Criminal Investigation Branch of the Police Department who are experienced in techniques used to "bring up" numbers originally stamped on metal and later eroded or filed away. By this means it was discovered that the band you forwarded was numbered 7464.

Our records disclosed that the abovementioned band was placed on a black duck at Woodanilling on 3.4.58, approx. 95 miles from where you recovered it.

Thank you for returning the band and for so patiently awaiting the banding details. I am sorry it took so long, but these things are not altogether within our control.

Yours faithfully,

CHIEF WARDEN OF FAUNA.

Dear Sir,

Re: Duck Band 10110

No doubt you will remember forwarding a band which you recovered from a Black Duck at Harvey on or around 3.4.63. I have now received the banding details and I would like to advise you that this duck was banded at Cape Riche on 22.1.63, approximately 195 miles from where you shot it.

Yours faithfully,

CHIEF WARDEN OF FAUNA.

Dear Sir,

Many thanks for returning Band No. 10110. However, I regret that I am unable to advise you of the banding details as I have not yet received the necessary information from my banding operator.

I regret that there is no reward for returning bands. For a few years this Department participated in the I.C.I. Lucky Band Scheme under which a case of cartridges could be won if the band forwarded was a "lucky" one of a pre-selected number. The Scheme is not operating in this State this year although it is being continued in Victoria in respect of ducks banded in that State.

As soon as I have received the banding details of this duck I will forward the information to you.

yours Gordon R. Jones.

Mr K. Devell,
5 Clyde Street,
NARROGIN, W.A.

February 19, 1963.

Dear Sir,

Many thanks for returning Band No. 4407 which you obtained from a Pink-eared Duck at Toolibin Lake on the 28th December, 1962. This duck was banded at Dowerin on 15.11.57, approximately 120 miles from where you obtained it.

Wild ducks are banded by a number of authorities in Australia. We were the first in the Commonwealth to begin, having been active since 1952. Like the banding groups in other States, we seek to obtain basic data so that adequate conservation measures can be applied. The information to be gained by banding relates to their movement, breeding, population structures, the shooting pressures to which they are subject, and so on.

Due to a shortage of funds and staff we have had to curtail our activities in this field but I will keep your kind offer of assistance in mind. I will contact you if we are able to take advantage of it.

Yours faithfully,

CHIEF WARDEN OF FAUNA.

Enclosed please find tag No-9861.

This tag was taken off a duck, shot at Coblenine pool,
15 miles East of Katanning, on the 4th January, 1963.

It was shot by Mr O.T. Johnson, Kelly Rd, Katanning, and bought
to me by Mr G. Haddleton of 173 Albany H'Way, Albany.

I would be please if you could forward the information
concerning the duck to both of the abovenamed people, and to myself.

Sam Michael

Flight 30 miles*

Mr. G. Konrad,
"Swan Lake",
Green Range,
ALBANY.

February 27, 1963.

61/53
PY:RH

Dear Sir,

Many thanks for your letter advising me of the obvious error in the banding date of Band No. 8679 which you returned to this department. On re-checking the records I discovered that this band was attached to the leg of a Black Duck on 3/3/1962 at Cape Riche, approximately 20 miles from where you recovered it.

Further to your request of February 18, 1963 I have enclosed your permit No. 404 to export kangaroo skins to Austria.

Yours faithfully,

File

CHIEF WARDEN OF FAUNA

Dear Sir

In reply to your letter of
12.2.63 I would like to send
12 (1 doz.) Kangaroo Skins.

The address of the consignee
is: Frau Maria Konrad
HADERSDORF/KINDBERG, STMK. AUSTRIA

Band No 8679 could not have been attached
to a black Duck on 3.3.1963
as your letter says.

It was shot in last week in January
at Swan Lake (next door to Hassells)

Yours faithfully
G. Konrad (illegible)

February 12, 1963.

PY:MAB

Dear Sir,

In reply to your letter of January 1, 1963, I wish to advise that before I can issue a permit to export kangaroo skins, it will be necessary for you to inform me of the number being exported and the name and address of the consignee. I will then issue a permit and forward it to you.

Many thanks for returning Band No. 8679, which was attached to a Black Duck on 3.3.62 at Cape Riche. Before I am able to complete the recovery details of this band, would you please advise me of the date and the place where it was shot, as I am not sure if it was taken on your property "Swan Lake", or the Swan Lake which is east of Tenterden.

Your early advice would be appreciated.

Yours faithfully,

~~B/U 13/3/63~~

FY:MAB

Dear Sir,

In reply to your letter of January 31, 1963, I wish to advise that Band No. 8145, which was found on your property, has been recorded as missing since March, 1961. I am unable to offer any explanation how this band came to be on your property as none of our officers are known to have been in your area at the time that that series of bands were used.

However, I do appreciate your returning it for it at least shows that it was never used.

Yours faithfully,

File

 5.2.63

8622

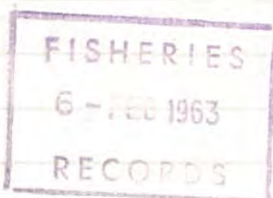

Dear Sir,

In relation to a telephone call I made
 to your department on Monday 4.2.63, regarding
 a band recovered from a Black Duck.
 The particulars are as follows, the duck was shot
 on the Pellissippi River, twelve miles South East
 of Borden, near where the Markigumuck enters
 the Pellissippi River, the duck itself was in excellent
 condition, & one of a flock of about 50.
 The date of the recovery was the 29.1.63.

This is the only information I can think of apart from
 the fact that some of the ducks carried quite a
 large amount of pin feathers & were large birds,
 others were very young of same.

Yours sincerely
 G. Stanger

The No of enclosed Ring is 8622.

RECORDS

Wellington Mills.

Dear Sir,

I find enclosed the tag from a Grey Duck that I shot on the 30-12-62. The duck was in first class condition with thick layers of fat. I shot the duck in the Wellington Mills district. As I am a keen sportsman for wild game & being employed in the Forest as a overseer I see a lot of out of season shooting. Mainly Marron & Wild Duck.

Could it be possible for you to make me a game warden to try & show these hunters their mistake.

Would be much obliged if you could send me some regulations which should be abided by. A Mr. T.

Hall from Wellington is another who I would like to see with a badge as he has the same feelings as me. Hoping to hear from you soon.

Yours Faithfully Ken Butcher.

Thank you very much for your memo of June 21, and for the advice it contained concerning duck band 3182. This duck was a Grey teal, it was banded at Yeslering Lake on 23.1.55 and was recovered about 25 miles north east of Kalgoorlie on 1.1.63. by Mr. O.J. Bennetts of 1 Ward St., Kalgoorlie.

The trouble your officers have taken is greatly appreciated as it assists us materially.

CHIEF WARDEN OF FAUNA

621
DET. SERGEANT MURPHY:

I have to advise that I have treated the attached worn duck band and have restored what appears to be the numeral '8'.

The lower half of the number is on the part of the band that is worn away. This makes the complete number 3182.

I would suggest that future bands be made of stainless steel.

July 3, 1963

61/53

Dear Sir,

No doubt you will remember forwarding a band which you recovered from a grey teal shot about 20 miles north east of Kalgoorlie on 1.1.63. Not all the numbers were distinguishable, some having eroded away.

As is usual in such cases we sought the assistance of the Scientific Officers of the Criminal Investigation Branch of the Police Department, who are experienced in techniques used to "bring up" numbers originally stamped on metal and later eroded or filed away. By this means it was discovered that the band you forwarded was numbered 3182.

Our records disclosed that the abovementioned band was placed on a grey teal at Yealering Lake on 23.1.55, approx. 290 miles from where you recovered it.

Thank you for returning the band and for so patiently awaiting the banding details, I am sorry it took so long, but these things are not altogether within our control.

Yours faithfully,

CHIEF WARDEN OF FAUNA.
