Thursday 9 Nov 72

Went to Redbank for ASAC on Friday. As arranged, I met Big Farmer the FRT training warden on Redbank. Had ancestors and Redbank is in the 1800's. He is last ~~descendant~~ descendant - ~~1800's~~ has lived on what for past 25 years. Questioned him re. Colaptes & bird fauna.

Banded Skitt - although they are found occasionally on most farms, the most important is Ford. Horse Lake. Here flocks of 5-10,000 roamed every year in late Sept - early Oct and kept early May until first snow.

~~1800's?~~ 1850's? disappearance started about 1950. All its discharge went by straight into Ford Horse Lake.

— every potent chemical mixture.
 This caused a change in
 the habits of the Red-tailed
 Diver. I dropped down to a
 current level of approx. 1,000
 I was kind of sorry the whole time from
 Sept to May, they were appar-
 ently disappearing on and off during this
 period.

Apparently the Sullivan & John
 Highlanders (was on the highest of the
 rocky ground & came to cut
 the channel into the lake
 to form a boat harbor.

Red-tailed Diver used to be
 in very small numbers,
 recently have been a fairly breeding
 up in numbers. (last year)

rather quiet
 earlier diverges
 all recorded
 on Red-tail Is.
 Red-tailed Diver
 they killed birds in
 Jamstone
 stock of the
 Field.

Young Tern - used to breed in
 enormous nos. on an island
 in England last year - numbers have
 dropped away to very low level
 last year. — July 20th

SUNAN REVER

At 1900 hrs stopped Chin Pk
off at Pehin Pt with 2-veg birds.
W. Dove around to freeway mostly over
and scattered large flock (c. 1,500)
Little Pk. At approx

1945 the other flock disappeared
while I was looking away for the
moment. Very large in context
by Pacific with Chin & over
This period of time he felt
that the number of birds
were steadily building up but
no evidence of large flocks
appeared.
— quiet at 2005 hr.

At 2200 left Chin Pk
place to the south of the
around river for roosting
birds.

Pd High

few small groups right along
to Chin. Little or No
palm 1 birds, some previous
possibly many the 12 minutes
of altered species.

(Chin sp. 1, 3 was
during)

— no large flocks

Freeway - cat right along freeway.
I saw 1 Night Hawk *

many birds in other water
shy with

few individual water
— (Opodid, Chin alone)

Pehin Pt

saw v. large (no. of 5,000)
Little Pt. In place
resting on shore towards spit.

(351)

- show 4 Northern Nighthawk
singing in yellow pine
thicket at top of ridge.

Trained - # 2330 L.

NB 1. large flock at Point Pt

2. no eagles seen feeding
(flocks covered, ~~seen~~)
no wind.

3. 5 Northern Nighthawk
seen.
