THE END (AS AT 07/06/2014)

The total number of field notebooks as at 07/6/2014 is 1 (1969-70), plus 21 (1970-84), plus 66 (1992 on), equals 88 work notebooks, plus 5 un-numbered personal notebooks (2004-2009), equals 93.

* It seems unlikely that JL did not create field notes between Oct 1984 and Nov 1992 (an eight-year gap in this series). Perhaps there are notebooks that have yet to be rediscovered (as at 07/6/2014) or perhaps JL's field notes during this period were incorporated at the time into the relevant project files (JL has a vague recollection of doing this at some stage).

** These five un-numbered notebooks (Nov 2004 to March 2009) were created in parallel (i.e. overlap chronologically) with the numbered series and were principally of personal rather than work field activities (bush walks). They have therefore not been included in the numbered series.

TO DO

① Seven + Pilsen graphs
to Anne Greenly

② Original of V-W Bond
graph (her chart).
Secret photo album
or does John Winkler
have it? Anne is
checking.

③ Seven Seven photo on
nest, and on large no
2 on V-W.

④ Sheldons photo.

5) ~~Gravel~~ ~~Gravel~~ ~~Gravel~~ =
marsh (standing).

6) V-W map (from
"Landscape"). See photo-
16

7) Flat land - broad
exposed field -
cleared - possibly
to form a drain?

Air photo of Cliff W-field
of V-W - see
landscape photo.

8) Deduct short photos.

9) 96-97 Report
✓ done 27/5/03

Proposed: Whicker-Nehmi Beds

(11)

Fri 23/5/03 at 1530 hrs

Start where Pigott Road
meets Sabine Road.

= 0.0 km

0.0^{km} (approx) 1532 hrs - Sabine
River Bridge.

0.1 km 1533 hrs - Take track
to the right. It follows
the Sabine River.

0.2 km 1538 hrs - Cross the
old road.

0.5 km - Stopped. Grey Fantail,
Kookaburra (2, moving about and
making a huge din), *Pseudobuteo*
revers (2), *Pardalipicus*
the first thing I saw was

(12)

yellow orange chin, neck
and upper breast. Sharp
cutoff to dull colour
(grey?) of mid & lower
breast. Later saw

distinct white ~~to~~ yellow
stripe. Don't recall
seeing rump / tail colour.

Thought wings were
spotted rather than striped.

Later heard a soft
"sweet ^{am} tweet" or "peep
peep" call. Very
active bird in mid to

high foliage of *Parashipani*.
Also Scarlet Robin.

0.8 km - 1609 hrs By

Janet tree flying across

Spotted Pardalote

(13)

the track. Would be good
to have removed.

1.0 km - 1611 hrs. : Saw one

Leuc. Grey Fantail. Call in
distance - is it "Yorrick"? is
it a Shrike Thrush?

Sampled red flowers & leaves

of 1.5 m erect slender
shrub ^{near} N side of track.

Coming into flower. What
is it?

1.2 km stopped to remove
slender tree branch from track.

Heard "chick chick" call
of Lee's Flycatcher at near beaks
of Sabine River 50 m in front.

(14)

Attended to ~~repairing~~ ^{repairing} edge
of beaver dam by continuous
"scolding" call. It was

3 White-browed Scrub Wrens,

then joined by several
Splendid Wrens. (Blue in
wing of one; all had
light brown back & lores.)

Then 2 Gray Gnatcatchers joined
them. Then 1 ^{immaculate} female

Golden Warbler (brown in
wings), then one female
Western Gnatcatcher. All

these were in and around
a dead tree ~~that~~ ^{which} stood
over on south side of
the dry river bed.

Then 2 Scarlet Robins

(15)

to them.
came close. Then 1

White breasted Robin near
them. I ~~obs~~

then had a female (no
brown in wings; buff underneath)

Golden Whistler come very
close (1.5 m) to me.

1700 hrs.

1.5 km I sat in car for
a while, then walked along
along the bank. Saw 2

Ring-necked Pheasants,

then saw 1 White
breasted Robin in a 1.5 m

high "di tree" patch on
south side of bank, behind
a long log on the ground.

(at 1.6 km)

(16)

This shrike is not a
myioid bird.

I then walked a NE
up hillside towards the
persistent downwind trail
(no vegetation between cells)

Far-tailed
Chubasco:

of which I am certain is
a chubasco of type I
have heard many years
ago. Part-way up
the hillside I saw
(in poor light) 3 small
sander-aged birds
in the leaf litter on
the forest floor. Some
meters further on was
a single sander-aged
bird. Are

These evidence of Randed
Bottom Quail?

I came close to the
cove, but not close
enough to see it in the
fading light before it
rained. 1744 hrs.

I drove on to 1.7 km
(where the truck parked) and
then ~~the~~ re-set odometer
to 0.0 km and
turned back in semi
dark (at 1750 hrs) I
could hear 2 Lee's Frigate
calling from direction (SW)
of Delta River & I
turned around.

(18)

Resetted my initial starting
point (end of Biggs Rd
— 0.0 km) at
1800 hrs and 1.7 km
on odometer.

Sun 25/5/03

At 1105 hrs - end of
Ryegate Rd where it
meets Selkirk Rd.

Set odometer to 0.0 km

0.05 Selkirk River bridge.

0.1 km - 1107 hrs There
right into track that follows
the Selkirk River

0.2 km Cross the old road.

0.3 km 1109 hrs - stopped to
listen & look. Grey Fantail,

Spythor Raudolote - one
(2 m)
came so close I could see

its spots and red orange
rings with red eye.

2 were gliding from

20

green leaves of Jatropha
& more trees down
to 2.5 m above the
ground. My best

view yet. Also
heard Chestnut Treecreeper
and "Hornbill" bird.

Saw Scarlet Robin.

Saw both a male (bright
yellow throat) and a
female (dull throat),
separately.

~~Saw~~ Saw 2 ~~Heard~~ Heard and
then saw 1 and then
2 Jay Shrike Thrush
logging & flying

(21)

about in the mid canyon
of Tene/moon

7 birds were along
this track in a
group - feeding east.
15 mins later they came back.
Back to vehicle at 1207 hrs.

0.8 km 1216 hrs - stopped
at low track across track
(come on as on Fri 23/5).

I walked slowly up the hillside
Found one, green-headed reed,
scrag - presumably *Pentelid*
Bottom Aerial. Near 230 m up slope in
relatively open
area.

The type of the slope is
a rock outcrop c2-3 m

(22)

high on chocolate side. There
is a cave 3 m deep
and 30-40 cm high.

Part of floor damp, part
dry. I collected some
of many Jamie palm
(*clit*) seed pods
that had been eaten
open (2 bush net?).

Then there is an overhang
with some dry litter at the
back. Most of litter floor
is moist. Was some
large (littery on roo?)

dragging. The next
overhang is next to (E side)
a *Leishman* tree.

Back in vehicle at 1308 hrs.

Neglected to mention that I heard
a "chuck chuck" call of Lee's
Froglet when I first arrived at
this location (0.8 km). It
was coming from direction of
Selma River - just 30-50 m
away.

Spotlighting

Wed 28/5/2003 "Whacker NP"
0.0 km 1811 hrs. - Turn
off Snare Rd into Selma
Rd east.

2.8 km ~~1818~~ 1918 hrs Selma
River bridge. Perfectly still

(24)

ingst - Clear sky - Cold.
Heard occasional call of
a frog (Carnie?). in
upstream direction - Found
here at 1922 hrs.

5.8 km 1931 hrs Stopped at
intersection with Wheeler Rd.
Nothing heard. Drove on at 1935 hrs.

7.4 km 1941 hrs Stopped at
turn off (to right) into St.
Joseph's Road. 1945 hrs,
Nothing heard. Turned onto
St Joseph's Rd.

7.9 km 1948 hrs A
Black-jumped (Brist) Wren

crossed the road (back)
from left to right. Saw
black crest on back, body
fairly horizontal as it
bounced across, right side,
didn't get good look at head.

9.2 km 1954 hrs - Lilly Rd
crossing. Occasional
peewee frog (Conie?) croak
heard to right. Left
at 1958 hrs.

9.9 km 2002 hrs Stopped
to inspect tracks on
St. Josephs Road. They were
of a shod horse and
probably 1 or 2 days old.

(26)

Quite close on my right
two frogs were calling.
— show greeting call —
Comie longipere?

12.6 km 2013 hr. Stopped
at creek crossing.
Heard ^{several} deer's Pyglets
calling — not strongly —
along the creekbed to
my right. End at 2017 hr.

13.3 km 2022 hr. ^{Took} Turnoff
(right) into Hill Road

15.0 km 2030 hr. Bird
flies in front. Might
have been a Terry Pygmouth.

(27)

15:5 km 2034 km TF

Look off and looked in
a tree nearby. Had
a good look at it.

16:3 km 2038 km Stopped

at major creek crossing. Heard
several Lee's Frogs calling.
from caudline. 2042 km
I moved on.

17:1 km 2046 km Cross Lly Rd.

18:3 km 2080 km Stopped to

listen. Nothing heard. 2053 km

20:6 km 2101 km Meet

Whitaker Rd - Two frogs

(28)

celling from the creekline
to the west of me (Carnie?
on Lottone? or both??).

From 2105 hrs. gentle
breeze. Then left
into Wheeler Rd.

21.6 km 2109 hrs - stopped
on creekline. Nothing
heard. 2112 hrs.

25.1 km ~~20~~ 2122 hrs - Then
left into Ridge Rd.

30.4 km 2134 hrs Then left
into Lolly Rd.

31.0 km 2137 hrs R

(29)

small-med sized Gray
Kinglets banded both
sides of vehicle and then
banded off in front of
me

31.8 km 2140 hrs One TF
perched on a log 1.5 m
above ground, on left.

34.2 km 2148 hrs - Skittled
a possible TF. Followed
straight up - with difficulty

34.7 km 2150 hrs Cross
Rd Rd.

37.4 km 2157 hrs One full

(30)

size and one small Kangaroo
on left side of road.

37.8 km 2200 hrs One
Terny Angmond (TF) - good
view (padded).

39.6 km 2205 hrs Turned
left into Vorseburg

~~Pegged~~ Whitaker Rd

Sunday 1 June 2003

(31)

1122 hrs 0.0 km - start
speedo where Pegwell Rd
meets Sebrina East Rd.

0.0₂ km - Sebrina River Bridge
River bed still dry.

2.4 km - 1129 hrs - Kookaburra

3.0 km (reversed 80 m to get to it)

- 1131 hrs - Turn right into
Whitaker Rd.

5.1 km - realised I had
overshot track to right -
reversed to that track.

Speedo was then 5.2 km

| So it actually gains distance
even when reversing!

5.2 km - Track to right,
kept going along Whitaker Rd.

(32)

5.6 km - 1141 hrs

Reached old semicircle
line (E-W) crossing Wheeler
Rd. Rebert had to
walk west along this
semicircle line.

While having a camp 40 m
north of here I was
surrounded by small flocks
(5-10?) of (Steller's) Brown
Thornbills (streamlined bodies,
red eyes, cocked tails)
plus at least one smaller,
olive-green bird without cocked
tail, plus 1 Western
Sparrow + 1 Golden Warbler
(brown in wings) = immature

Act in car while running. Was able
to receive message and call 107
on new "Kyocera" Model 2235
mobile phone in digital mode (it
is a CDMA phone) just using
the extended phone serial.

Started the walk at 1215 hr -

1225 hrs
Scrub Robin, Refrain Tree Creeper
(my first record for WNP)
It was on the bank (1 m
from ground) of a ledge,
near my Garach Tree

1229 hr. ^{abruptly.} Track changes from
gentle decline to steep
decline

(34)

1234 hrs - reached creek line
(dry) at bottom of
slope.. Start climbing.

1237 hrs - 1 Scarlet Robin

1243 hrs - reached the top
of the rise (still on
old season line).

1253 - crossed creek line
sloping off to NNW.

1300 - top of rise.
Scarlet Robin, Grey
Fantail.

1307 hrs - ~~reached~~ crossed
bottom of a valley.
(heading NNW) ←

1313 - Two Dusky
One Woodpecker

(all brown body, ^{dark} grey wings,
white outer joint, white
tip to tail.

Scarlet Robin

Small party (5-10?) of
Varied Titlarks - saw one

proving small flocks
of bank birds (unbank
underneath) from a

Mass. driver.

One Grey Shrike Thrush $\frac{1}{2}$ (or
maybe a ~~Rufous~~ Thrush?)

2 Red capped Vireos -

2 birds - white lores

Honeycreepers at top of
enchirya - amongst birds -

36

with black lead and
white crescent extending
around the back of the
head = White-necked
Honeyeater

Weebills!
- Tiny birds, extremely
active, yellowish-brown,
above green above. ~~the~~
Tiny bill? "Wheet Wheet
Wheet-Wheet" call
(pinks). ~~1336~~ 1336 hrs.

1339 hr - needed top of
rise.

1344 - tree across track.

1348 hr - several Schmiedegies
feeding amongst Blomson
of a 5 m

(39)

flowering (first I have seen
today) Tree (?)

Gray Forsythia

1358 hrs - old tree trunk across
track.

1400 hrs 2 Roughneck birds
in Moss tree at
edge of major cisterna
(dry) - very bottom
of valley.

1401 hrs - the trouble
~~was~~ track forks, I took
the left fork.

1405 hrs - saw 1 and
heard soft "whet whet"

(38)

at least 2.

call of Spotted Kestrel.
• Gray Vireo.

1462 hr Two Western Goshawks
colony up (yellow ~~feathers~~
check patch, red
mottled with green on
entire underparts).

1465 hr - old tree across track.

1466 hr - top of small rise.

At this point a well-
used barbed wire fence
from the south, and
after clearing slightly (a few
metres) goes off ~~the~~ to
the north.

1420 hrs - slight vally
goes off to the left

1422 hrs - hit Sabana
Road East! Return

1438 hrs - megal crabs
crossing - 1 or Red
winged V when with 3-4
others (not colored)
plus 2 White-browed
Southern emerging
from shrubby (myrsine)
after short rain
shower -

1448 hrs - small pine!
Spartan fuscula

(40)

Young Faded and 2
Golden Whisker immature
2 are above ground
I am still on the flat.

~~1500~~

1500 hrs - Top of
rise.

1501 hrs - place where
I saw White willows,
Sutcliffes & many other
birds when leading
west. Now there
is a Scarlet Robin

Also one of those
long little my long
birds Undergrowth

(41)

= Wheel

soe slightly yellowish buff
rather than yellowish.

1309 hrs Cross a relatively
minor valley & creek line,
sloping to the NNE.

1315 hrs Reached top of
rise.

1321 hrs Cross another
relatively minor valley
& creek line (to the NNE)

1327 hrs - needed eastern
side of a rise & rose
about to go downhill.

1335 hrs Spotted Pendulow
in undergrowth, just 0.5 m
from ground. male

(42)

Western Gnatcatcher, Scrub
Robin. ⁵⁰ Korkebrunn (2)
seen & heard. 100 m to west
of me

1347 hrs - crossed major
valley & creek line.

1354 - reached
top of
steep part
of slope.

1605 hrs reached the
vehicle again, on
Whinder Rd.

~~P. B. B. B. B.~~ Tidied up
notes. Left at 1644
hrs.

(43)

Reset Speedo to 0.0 km
before leaving.

2.4 km 1654 hrs - Turn
right into Selma Rd East.

3.3 km 1658 hrs - small W. Grey
Kangaroo bounded off, stopped.

Turned one minute later by
larger Kangaroo (missed?)

3.8 km 1700 hrs - another WG
Kangaroo

4.9 km 1703 hrs - 4 Meppies
on the road.

5.0 km 1704 hrs - needed
Varroa therapy.

(44)

Fri 27 June 2003

0.0 km Turn off Sures Rd
into Ridge Rd (at 1205 km)
Heavy rain clouds gathering

0.4 km ~~at~~ (1210 km) - It's
raining! - heavily!

5.4 km (1238 km) - Whicker Rd
crosses in from the left.

6:5 km (1246 km)

~~1246 km~~ Golden Warbler male (and
a female). Scarlet Robin

and a Yellow-breasted Chat (Western

Yellow?) Robin

(60 cm
high shrubs)
Took sample of plant
with red tube-shaped flowers

7.0 km (1303 hrs)

Reshuffled Honeyeater

Western Spinebill

Two Silveryeyes. One Thornbill

with grey-shrubby throat & breast,
red-eye and buff under wing

7.1 km (1317 hrs) Western Lark

(yellow clear patch, brown underparts
mottled red & green)

10.8 km (1338 hrs) Then left

into Lilly Road, Raining

Decided to turn back along Ridge Rd.
Reset speeds.

0.0 km (1340 hrs) Then

right into Ridge Rd from Lilly Rd

Raining

46

0.7 km. Scaup Robin,
two Western Yellow Robins,
Silvereyes, small flock
of LBJs, two
Lovibreads

~~Also~~ Heard a "yarrick" bird,
1400 hrs

2.2 km (1423 hrs) One
med sized W'roo crossed
road, closely followed by
small W'roo (^{large} joey).

Ravens

4.2 km (1431 hr) White-tailed
Black Cuckoos.

5.1 km Western Rattle and

Red-capped Manakin Western
Sparrowbill, Gray Parakeet.
 1442 hrs.

5.3 km (1444 hrs) Whinle Rd
 comes in from the south.

6.5 km (1451 hrs). Stopped to
 look for birds. Heard a
 single "grack" of a
Quackong Frog
 on south side of road.

8.4 km (1457 hrs). Melkie Road
 comes in from the left (south).

10.7 km (1500 hrs) 2 Korobabos,
 several White-faced Black Cuckoos
 on south side of road.

10.8 km (1504 hrs). Turned right
 into Sue's Rd.

Sage

Willow

Aspen

2.7 km (0826 hr) Small Med. sized
Grey River ~~can~~ brushy area
the road from E → W.

4.8 km (0835 hr) Turn right
from Lolly Rd into Hill Rd.

(56)

Still dozing sleepily.

5.3 km Western Gnatcatcher,
Gray Parakeet, Scarlet Robin,
Gray Shrike Thrush (seen,
and heard calling "gorrie").

White-eyed Honeyeater in
Eucalyptus blossoms.

Some LBTs (constant
activity in these understoreys).
Finish walk here at 0920 hrs.

5.6 km. Red-eyed
^{100m west}
Parakeet of vehicle / similar walk
stop at 0947 hrs.

6.2 km. Surrounded by ring,
high pitched, small brown birds

(57)

mainly olive brown above and lighter
buff brown below. White eyes - only
visible at 5 m ^{even} with binoculars,
not visible at 10 m, even with
binoculars - were they White-eyes?
Formed well at 100% ha.

6.4 km (10.15 km) Sooty Robin

Note that I have been hearing
a remarkably loud "Whit-Whit"
pulsate type call at most
stages. Certainly more so
than on any previous
visit.

6.7 km 3 ^{standing} dead trees (45 cm diam)

have been felled for firewood,
either side of the road.

(58)

Crestline to south of road
is breaking gently. ~~Recess~~
along it are flowering.
Sunk here at 1036 hrs.

7.2 km A small & a med.
sized Hesperia banded across
the road S $\rightarrow$ N. (1042 hrs)

7.6 km (1045 hrs) Then left
from Hill Rd into Whistler Rd.
Went for a walk. Beautiful close
view of 2 Spotted Periwinkles
(♂ + ♀ seen separately in
same small area)

Also heard occasional
grunts of 2-3 Crested Frogs
The ^{crests} ~~road~~ bed is ^{the} clay (damp)

~~at this location~~ at this location (1108 hrs)
 Also 2 Black-Cockatoos (White-headed call?)
 flew over.

7.9 km. Where earth has
 been pushed off to the right of
 the road - also a small drainage
 line visible, (15 m before road bends left)

Just 9 saw a group of c. 10
Wheelbills (? same as at 6.2 km
 but wasn't close enough to see
 white eyes).

Then we popped 3
 wren-looking birds with very
 long, narrow, (fleshy?), con-
 fecting type bills. These
 birds were generally a colorfast
 brown. - Rufous-brown
 underparts, mottled brown &
 white (or brown & dark brown?)

(60)

on wing contours. Light
brown legs & feet. The
strangest thing was that one
had a bright purple/blue
line extending from chin (here narrow) to ~~throat~~ throat
and widening out like a
large tear drop on the
upper chest - astonishing!

They then dropped (from
a position 0.4-0.5 m above
ground) down out of
sight. There was
then no trace of them

despite waiting, then
searching. Were
they *Ernstia* ?

Yes - Southern Cone *Ernstia*.

It was certainly the first
time I have seen this
green of bark - anywhere
- or anything like it!

Also had a gray Parula very close,
Also heard approx 3 Quarter
Prong (occasional calls)
from separate locations
along the creekline.
Found her at 1144 hrs

7.9 hrs another dead tree
next to road has been
recently pulled by firewood
cutters - dropped onto
the road and then cut up &
pieces left on the road!

(62)

8.0 km. Walked down

to river - It is flowing.
Several ^{Queensland} Grey Frogs were
calling near it. Saw

Inland Thornbill with cocked
tail and stretched breast.

Saw one Black-faced
Cuckoo Shrike 1202 hrs.
Some sun.

8.5 km (1206 hrs) Wharfedale
crosses the river, which is
flowing. Grey Backed,

10.1 km. Walked ~~Back~~ W
(downslope). Heard at
least two Brown Boobies
calling (very short bursts)

(c 100 m away)
Also distributed one large Gray Heron
while it was walking.

63

Also several Queensby Frogs.

Took two samples of red-
flowered plant. Here

seen it ~~very~~ in

many places today

but more perhaps here

(on slope to west)

anywhere.

Cremula
brassica

28 Remots heard

Found here at 1242 hrs.

10.15 km - ^{dead} another tree felled
cross road by former road
collectors!

10.4 km - 2 Purple-crowned
Toucans seen +

heard. Several Brown Honeyeaters

seen + heard, White-capped Honeyeater

(64)

Western Sparrows

10.9 km ~~Point~~ (1308 hrs)

One small grey Koro banded

crosses the road from E $\rightarrow$ W

11.5 km. Brown Winged Lizard

c 150 m ahead (S).

End here at 1323 hrs.

11.9 km Ridge Ridge Rd (T-
junction with White Rd)

End here at 1332 hrs.

Turn right along Ridge Rd.

14.5 km Reverse flow from

N $\rightarrow$ S across Ridge Rd,

20 m front of me.

(65)

Also 28 Perot (S → N)

End here at 1353 hrs

17.4 km (1358 hrs). Turn
right out of Ridge Rd into
Suez Rd — end of survey.

When backly in

Tues 2 Sep 2003

Turnoff Suva Rd into
Sabine East Rd at exactly
1300 hrs - set out at 0.0 Km

1.5 Km - Heard, and then
had good views of ~~about~~ c. 5

Little Wattlebirds - my
first record for WNB! (Dyander
patch)

Finished c. 20 mins here at 1350 hrs.

Discovered that I was bothered
by mosquitoes! It is

a warm dry day with
moderate breeze

1.6 km - Patch of Dyander
on north side of road. Several

known Little Wattle Birds to seen

(68)

here (cackling noisily), also
one "28 Parrot" and sees a
(rather pale) Brown Honeyeater,
many of which can be heard
in the general area. ~~Finish~~
1413 hrs.

1.9 km Two Koobinnas
~~seen and then heard (one)~~
Finish 1417 hrs.

2.0 km - One Sulphur,
one New Holland Honeyeater, one
male, brightly-yellow plumaged Golden
Whistler, one Dusky Woodswallow
A downcast-looking cuckoo with
beard very likely. The
Selma Road bridge is just

Farther Cuckoo (heard only)

(69)

(69)

25m in front and here I could
hear the weak ^{but distinctive} call of a
single bee-in-the-ear frog.
(Craia planicollis).

top full
building
columns.

Gray Fantail, 28 Parrot (c.5)

~~then~~ Spotted Leucis seen
and heard, then a male A

and a female Splendid Green

together, ~~on the same~~

just (0-15m) east of

the bridge. Approaching

with them was a White-

breasted Robin - I had

many beautiful close views

of this bird. Back

at the vehicle (from the 2nd

(70)

Time without moving it) at
15:20 hrs. Need a
mental break!!

Then recorded two Ravens.

2.0 km (also) Crossed the Achene
River bridge. (15:25 hrs).

The river was flowing very gently,
water level low.

Remember that when I recorded

the 28 Records (at 2.0 km) a

medium sized, flat winged bird

of grey - blackish. Sparrowhawk?

was flying about quite
fast over the tree tops.

2.4 km. Two '28 Parrots'

and one, fully coloured,
male Western Rosella

Finished here at 1552 hrs.

2.6 km. Two Western
Yellow Robins! (close view)

and a Gray Fantail

Finished here at 1610 hrs.

2.7 km. A Scarlet Robin.
(1615 hrs)

3.6 km. Another Western Yellow

Robin - several cocked-

tail, streaked throat + chest,

dark-eyed Thornbills (Inland)

A Revers heard close by.

72

Finished here at 1637 hrs.

Passed

White Vehicle (Tigra Larkins Day) (BSA 18923)

going the other way at 4.6 km
(1642 hrs)

5.4 km — recently (days?
weeks?) filled tree at
side of road.

7.7 km (1649 hrs) Turned
left from Sabine Coast Rd
into Verre Hwy.

74

Sun 14 / 9 / 2003

~~Thomson~~ Turned off Thomson

Rd right into Myalgung

Rd at 0.0 km

3.7 km (1126 km) reached narrow
tree. road road, impossible

I then backed up (to 3.8 km)
and took road to right (south)
with sign "Pongung"

5.0 km (1131 km) - track merged
in from the left - it heads
left in a roughly NE direction
so I turned into them

5.4 km (1138 km) This track
ended, so I turned back

6.8 km - ~~Thomson~~ Turned right
into "Pongung" Rd

(75) WNP

Sun 14/9/03 contd.

7.9 km (1144 km) - Turned left
(west) into Nyeljelnyep Rd
(still rubbing steps).

Stopped here, checked
maps, decided to

go back south along
"Pogonyo 4" Rd

and hope it will

take me to Beaver Rd.

(7.9 km from 1152 km)

9.6 km - Road off to left (east)

Turned into this.

12.8 km - Road in from left (north)

Tried it.

12.8 km - blocked by tree,
reversed back.

WNP

Sun 14/9/03 Contd.

76

12.9 km resumed leading
roughly east along road
(that I diverged briefly
from at 12.8 km)

16.7 km Reached T-junction
on a bend. Turned
left.

17.5 km Reached another T-junction,
Turned left again.

19.8 km (1216 km). Turned
left into "Poojagump" Rd.
Signpost here indicates I
branched off "Bevan Road"

77 WNP Sun 14/9/2003 cont'd

23.2 km - ~~For~~ Meet

With Myagkay Rd as
highway, turned right (roughly
east)

24.5 km (1225 km) at

Reynolds Swamp degree gauge
site at West!

(79)

is 4 metres "south" of
the gauge (2nd gauge)

Levee bed level at flood
gauge is ~~0.39~~ 0.39 metres

The levee bed starts
about one metre "south"
of this gauge.

Arrived back at Atlanta
at 2.42 pm.

Finished measuring samples
etc at 3.22 pm!

on 85.0 is bed level
could suppose to get well sand

80

Phone message

at 2.01 pm Mon 15/9/03

- static only.

Tellurip Mon 15/9/2003

Water level at 3m gauge
was 1.68 m

Water edge was 8 metres

~~from~~ ^{from} this gauge

~~at~~ ^{at} ~~water~~ I belted

a dropper in at the

water's edge ~~from~~

Water surface is also

0.59 m down from

top of this dropper.

81

I would guess Wellbore
water level to be about
0.3m below lake bed
level at 3m gauge.

$$\begin{array}{r} \Rightarrow 1.68 \\ - 0.30 \\ \hline \end{array}$$

$$= 1.38 \text{ m}$$

my best guess of
Wellbore depth.

(couldn't find a 2m gauge)

Rig landing at 8:35 pm

Tues 16/8/03

Sampled Lake pit
is 1.7 km (measured) west
of West Mt. Barrow Rd., along Collette Rd.
at 1055 hrs.

Lake bed level was
1.5 cm below bottom
of 1 m gauge plate.

This part of lake (west side)
was dry (damp mud). Water

blown to "east" side of lake
was ^{max} 2 cm deep (measured)

pH 8.09 (21.2 °C)
8.09

(83)

Lebe Dams

1115 am on Thurs 18th

Sep 2003

A group of approx 10
(juv) Lebe noona
frogs calling from
sedges in water at
western end of Lebe.

They moved about in the
sedges where I
walked past to the
dyeing range. Is this
a mating group?

Also heard several
Lebe noona calling
around the Lebe.

- outside service due?

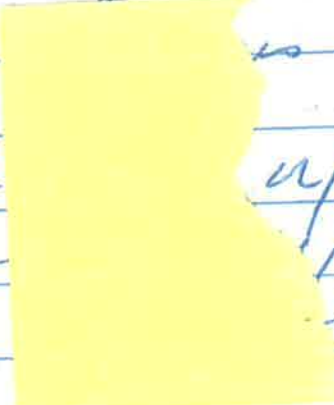

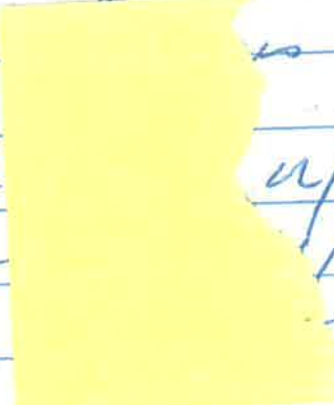

(84)

For reset (Nov 2003) trip

WITCHER N.P

88

Aug 28/9/2003

1130 hrs (0.0 km) Turn off
Inch Rd, east into
Sabine West Road.

0.5 km (1136 hrs) Two Red
Wattlebirds (my first record)
oppose 50-100 m south of
the road. I was able to see
the red wattle and yellow
underparts of one and heard
it and another, nearby, calling
stereotypically.

Dead timber on ground
nearby cut for firewood.

0.55 km. June 10 Drusky

(89)

Woods willows "hanging" from
both dead and living trees
& branches. Saw

a small green parrot which
came up from ground and
sighted on tree branch
ca 5m up above ground.

Unable to get good look at it.
Just saw it 1203 hrs.

06 June (1206). Saw a Grey Shrike
Thornbill. It gave "fence"
call. Couldn't be sure
of a Thornbill (yellow wash
underneath, olive green (?) above
with white (?) eye. Then
saw two Elegant
Parrots (very

first record for WLP). Had

a good look at one that
perched on a low bush.

I could see the blue cere
with yellow ~~between~~ below (between
eye and bill) green
above with dark blue ~~feathers~~
primaries and blue of
tail (upper side).

Finished here at 1219 hrs.

Strong E wind blowing - Fine.

Oct 9th. Heard ^{only} persistent calls
of Brown Honeycreepers ^{+ near} in patch
of Drydenia (Beech Bush?) which
is still in flower.

Note that the white flowers (ground

(91)

back to his high and ~~fast~~
spectacular (numerous & varied)
at the moment.

(1248 hrs)
1.04 km ^{in bush} several people (adult &
young) ~~on the road~~ south
of the road have two
dogs with them, not on
leashes.

1.45 km. (1251 km) at the bridge
over the Sabana River.

JUST DISCOVERED ODOMETER
IS NOT WORKING YET
I HAVE THE IGNITION
OFF! During the last
5 or so surveys of the park

I have increasingly lowered the
 position of road just rolled
 along in order to lower
 the road level. Therefore
 distance measurements of
 the past 5 or so surveys
 are of varying accuracy.
 eg compare distance to
 Sebina River bridge (along
 Sebina East Rd) distances
 of this survey (1.45 km)
 and previous survey ~~1.6 km~~
 (2 Sep 2003 - 2.0 km!).

I rolled at least 550 metres
 (mostly at the end, rolling
 down slope to the river and
 bridge).

1.6 km - crossed old road
 alignment.

(93)

1.5 km (1302 km) . 9

Arrived right onto the track
that follows the river upstream.

Tacubana (at least one
operating road in this area)
(one seen - others heard?).

1.9 km A dead tree has
been felled across the track
and cut up for firewood,
recently.

2.2 km (1312 km) . Stopped at
large tree across the vehicle
track (same tree as previous
surveys). Went up
the Litteralys.
Schreiner;

Scarlet Robin,

Back at the vehicle at
13.35 hrs. Surprised I
haven't seen or heard a Gray
Fantail today.

The river is ~~flowing~~
flowing reasonably strongly here.

Turn around and head back along
same track. — But before
I could leave, I heard and
then saw a Gray Fantail and
then I saw a Striated

Parakeet glimmering
from leaves/branchlets of
canebrake etc on hill.

I saw the stripes on the black
crown, the whole wing stripes,

(95)

the gray-brown back, the yellow-
orange between eye and back,
the white eyebrows, the yellow
of chin and upper chest. I
did not hear it call.

Seeing it 1346 hrs (from tree
branch at 2.2 km).

2.8 km (1350 hrs) Reached Setina
East Rd again, turned
right (east).

3.0 km (1352 hrs) Taxes have
been pulled on N side of
road for forever (Hingaw).

3.3 km. Near the top of
the rise I saw four

(96)

Red-tailed Black Cuckoos !

(my first record for WNP)

I realised after a while that they were associating in pairs and that each pair comprised one Male (no yellow spotting) and one Female (with yellow spotting).

They were in ~~every~~ ^{every} place.

Beautiful!!!

(14.6)

3.4 km - Turned around

to head back west along
Selma East Rd. I went
the speedo here to

0.0 km.

(99)

0.65 km. before draw
bridge.

1.7 km (1423 km) needed ~~the same~~
western end of Drysdale
patch that I began ^{early this} ~~this~~ afternoon
~~morning~~ at 0.9 km (same
spot).

2.5 km 3.5 km (1428 km)
Reached Snow Rd, turned
right, into it.

Gangway Gallery on steep

bank - for up steep

bank - follow that -

just getting a signpost
in distance, down

left, follow that
road to end, down

right, follow that;

in ~~the~~ to
Summer Tree Rd.

down right, follow it,

near to ~~right~~ left

(not) right - in

place - 97552093.

(99)

11/12

To get to Ben Shattuck
(9755 2093)

- Turn off Cere Rd ~~into~~ into
"Gungahpe Valley Drive"

At Gungahpe Gallery >
- Turn left into "Koorabin Drive"

- Turn right into "Marrinup Drive"

- Turn right into "Summer Breeze"

- Don't turn into "Winter Rd."

- Turn right into "Autumn Rise"

- go to end, near left
for Ben Shattuck's place.

Mother is "Mary-Lyn"

Whiter NP

(100)

Set 11/10/03. Accessed
WNP via Stee Rd.

0.0 km (1519 km). Intersection
of Sabine East Rd and Whiter
Rd. I will head south
along Whiter Rd.

0.1 km ~~1535~~ "W.H.W.H" paddocks
heard. Mosquitoes !!!

2 Grey Cuckoos
1 Kinglet Parrot
1 Golden Warbler
1 Grey Fantail heard.

Finished here at 1554 km.

0.4 km (1558 km) 1 Grey Cuckoo

(101)

Came up from ground near
left side of ~~the~~ road.

B. W. W.

0.6 km Stopped at cattle
crossing.

Gray Heron.

Water flowing in creek
was, water still bad.

Walked along creek trail up
hill to Sabine Rd.

Heard Hooded Merganser to
nest (in WNP).

Saw a Renai (Audubon) 50m
to east of this track,
at crest of the rise.

1/3 of way down the
slope I disturbed
2 Koroban (seen)

1647^{hrs} crossed back at vehicle
(still at Osborn)

I have never encountered as
many mosquitoes as in WNP
today. They are covering
my legs and also horse.
I have covered up but
might have a few bites through
my new canvas trousers.

I must cover for retists
(mosquitoes & cane) - Cane
for mosquitoes. Cane on
face. Flyholes in cane net
for mosquitoes. Cane garters.

(103)

Today is warm, overcast,
light to moderate wind in
tree tops. ^{no} little wind at
ground level.

1.0 km - short walk. Heard
several Pardaliparus calling
in this general area - strong,
clear, far-carrying "Whistle Whistle"
call. Mojos very
abundant here too.

Finished at 17 1/4 hours.

2.4 km - old season line (now
double back) crosses the
road at a right angle - got
out but Mojos too numerous.
Heard the "Whistle Whistle"

Pardalipala and several
large scale Revets.

End here at 1730 hrs.

2.8 km (1738 km) Sandwich Robin.

2.95 corner creekline, water
flowing (trickling) gently.
Maggies fewer here.

2.96 turned left from Windsor
Rd onto 1st Rd.

4.7 km (1754 km) One large
Grey Kangaroo bounded across
the road.

5.3 km (1803) Stygian vehicle,

105

could hear several "Whistle Whistles"
Pardalotes that had not
been able to hear over
the engine noise.

Mozzies moderately abundant
here.

6.4 km (1811 km) Thru right
from Hill Rd into Lully Rd.
Why is there an "Russet Brown
Planned" sign here?

6.6 km (1817 km) One
adult ♂ Scarlet Robin
No mozzies but many
mosquitoes here.

7.3 km (1822 km) Med. sized

Jay Kegeress 10 m to
left of road.

7.5 km (1825 km) a
cut line crosses the
road ~~to~~. It is
difficult to test but
overgrown to west, however
there is pink type along
the line to the west.
Maybe marked recently
by Eugene Toywell?
Check this out in photo.

8.8 km (1836). One small
+ one med. ~~off~~ sized
Jay Kegeress at side
of road.

(107)

9.3 km (1837) ^u ⁹ ~~Formation Rd~~
goes off to the left

10.7 km (1842 km)
Turn right from Lilly
Rd into Ridge Rd.

12.5 km (1856 km) Turned
head lights on as it was
too dark to keep
driving without them.

16.0 km (1910 km) Turned right
from Ridge Rd into Wheeler Rd.

16.2 (1915 km) Large ~~can~~
tree (casuarina) across
the road. I turned

records

16.4 km (1919 km) Turned
left from Windsor Rd
into Ridge Rd.

21.7 km (1934) Turn left from
Ridge Rd into Liffy Rd.

21.8 km (1935 km) One small grey
K'oro at side of road

25.9 km (1945 km) Turn left
from Ridge Rd into Hill Rd.

26.1 km (1947) One Tawny
Frogmouth.

(109)

26.2 km (1850) Gum/Ko

Tung Fagmuth

~~26.8~~ 26.8 km (1853) One

Gum/Ko

29.4 km (2000 hrs) Turned

left from Hill Rd into Winder Rd.

33.7 km (2012 hrs) Reached tree

across road. Turned back.

41.0 km (2031 hrs) Turned

left from Winder Rd

into Selma East Rd.

44.3 km (2038 hrs) Gum/Ko

crossed the road.

46.8 km (2041 hrs) Turned

right from Selma East Rd

into Sues Rd
