JL_(1992 on)_64	64	(12-09-12 / 22-09-13)
JL_(1992 on)_65	65	(02-11-2013 / Current)

THE END (AS AT 07/06/2014)

The total number of field notebooks as at 07/6/2014 is 1 (1969-70), plus 21 (1970-84), plus 66 (1992 on), equals 88 work notebooks, plus 5 un-numbered personal notebooks (2004-2009), equals 93.

* It seems unlikely that JL did not create field notes between Oct 1984 and Nov 1992 (an eight-year gap in this series). Perhaps there are notebooks that have yet to be rediscovered (as at 07/6/2014) or perhaps JL's field notes during this period were incorporated at the time into the relevant project files (JL has a vague recollection of doing this at some stage).

** These five un-numbered notebooks (Nov 2004 to March 2009) were created in parallel (i.e. overlap chronologically) with the numbered series and were principally of personal rather than work field activities (bush walks). They have therefore not been included in the numbered series.

(2)

~~2/2~~

Sun 30 Nov 2003

Start at 0632 hrs.

Reached "START 30N"

50 358 400E, 62 63500N,

Heard Western Gull.

1 Inland Thornbill

10[♂] + 2 ♀ Splendid Fairy Wrens

An Inland Thornbill with white
breast like nest material from
"candle" of Darwin finches etc.
was on, in its beak.

1 Belmidge at my feet.

③

30/11/03 contd

Reached "S&S Corner"

There are Koos scraggs at
this position.

Brown Honeycreepers ahead
(leaved)
+ seen

Western Goshawk adult ♂

There are many Brown Honeycreepers
in this area, maybe because
Berberis (atkinsonii?) is
flowering.

(Grey Fantail)

Loon dropping.

30/11/03, Contd

(4)

1 ♂ Golden Whistler
calling from a Casuarina tree.

1 " 28 Perrot "

Reveries heard 100 m away
2 seen

Red-bellied 2 calling above.

Some Berlinia flowers out
Tarak trees are also in
flower.

Strickland Pandanus heard calling

High p. whist, single, "bell-like"
call - never heard before -
what is it?

Bobs Established WPT 001 - see
of walk

5

503 57545 E

62 64 098 N

Established Elevn. 78m

30/11/03 Contd.

WPS 003 - sizeable

burrow in ground

- approx 20 cm high
x 50 cm wide. Probably

c45° angle to ground.

Seems to flatten out c40
cm down. Large

(1.5m x 1m x 0.3m high)

round of whole seal at

entrance. Not used

recently. No tracks or

droppings.

There is a smaller burrow

c3m from it, with

much less seal at

entrance. The two

are roughly pointing downwards

30/11/03 Contd.

(6)

each other.

↳ Labeled WPT003

There is another 503 57 412E

burrow and mound 62 64 177N

of sand similar Elevn 72m

to the first

(at WPT002)

3 Jay Kites seen.

THESE DETAILS SHOULD HAVE BEEN 2 PAGES ON
Established WPT006 where I

saw a small stick nest (c 20cm
across), 5-6 m above the

ground, being cleared out

by a Red Wattlebird - for

food I presume. It

is in a merrill-type tree (small).

(7)

30/11/03. Contd.

There are many 6' moss beds
through the area I have
walked.

Kerfahanni heard c 300m
behind me.

50 356 995 E
62 64 381 N Elevation 59m

0856 hrs - reached North West
corner of this block.

A gravel road from the north
ends here. (WPT004) & take to
Grecci site to west.

I will now walk south
near the fence line.

50 357 001 E

62 64 044 N ~~70m~~

Established WPT 005 Elevation 70m

Started this trip again

here - ♂ adult Splendid

30/11/03 Cont'd

Western Yellow Robin with only
a small patch of yellow
on breast (more)

and on scull

Western Thrush

(11)

30/11/03 Contd.

Got back to vehicle at 1048 hrs

I then saved the day's (walk)
route - It is Route No 1
and has the default name
of ~~"WPT"~~ "TO1P01-TO1P28"

When viewed it has all the
TO1P01 onwards (to 28) points
plus the WPTs that I
established. This route
is 4.63 km long (according to GPS)

Note that when I ~~first~~
~~at~~ placed the cursor on the
beginning of my track (---)
and then selected "GO TO",
it would not use the
correct location, but
instead established a new

(12)

Sun 30/11/03 Contd.

Location some 100-200 m:
NE - Why? Maybe it
~~clipped~~ ~~was~~ ~~21st~~ ~~class~~ was
the GDA mag datum instead
of the AUS86 datum I have
selected.
