THE END (AS AT 07/06/2014)

The total number of field notebooks as at 07/6/2014 is 1 (1969-70), plus 21 (1970-84), plus 66 (1992 on), equals 88 work notebooks, plus 5 un-numbered personal notebooks (2004-2009), equals 93.

* It seems unlikely that JL did not create field notes between Oct 1984 and Nov 1992 (an eight-year gap in this series). Perhaps there are notebooks that have yet to be rediscovered (as at 07/6/2014) or perhaps JL's field notes during this period were incorporated at the time into the relevant project files (JL has a vague recollection of doing this at some stage).

** These five un-numbered notebooks (Nov 2004 to March 2009) were created in parallel (i.e. overlap chronologically) with the numbered series and were principally of personal rather than work field activities (bush walks). They have therefore not been included in the numbered series.

(3)

Wed 24 Nov 2004

Worms Estuary phragmites
at 1315 hrs.

Worms Inlet - mouth of
Deedwater. ~~There~~ Series of
"shoals" suggest bar is
closed and water level
dropping due to overgrazing.
Light breeze from NW. No
significant smell. Masses
of green (yellow at surface)
green filamentous algae growing
in entrance to Deedwater.

Appearance of the phragmites the
water is slightly brown.

(4)

- The "boards" are in.
- Seepage from activity occasionally visible at the surface.
- Water level seems to be c 20 cm higher on the downstream side of the stopboards.
- The flap valves are closed.
- gauge plate (Water Corp) situated to upstream (and SW) side of concrete floodgate structure reads:
— 0.06 m.
- Doesn't appear to be any leakage from d/s to u/s just the "stopboards".
- 1st D lock seems with 7 red-lipped freshwater gyois.

(5)

u/s

- 1 pr Brooms with 6 legs

downy goats u/s

- Other brooms u/s and psh,
Mrs D, ~~Chick, etc.~~

- ducks, shell, gull

- When Eggs large plate

attached to d/s side

of ~~the~~ concrete floorplate

standalone, at SW end,

reads +0.22m.

at 1341 hrs.

Head of Deedon at 1349 hrs.

There is a dreadful smell ~~here~~

here.

There is very little
familiarity of sea evident here

(6)

on as far SW along the
Deadwater as I can see
from roof of vehicle from here.

- There is no smell on the
upwind (ocean) side of the
Deadwater at this location.

- Stopped just c. 0.6 km NW
of Flookjels. Deadwater
here does not smell at all.

Voss Esby flange at
1410 km u/s gauge (Water
Corp) reads $+0.27\text{ m.}$
d/s gauge reads $+0.22\text{ m.}$

(7)

Water up is dark brown;
perhaps a little clearer
than at Waverly Estuary.

- "boards" are in. Water
level on up's side is
approx 0.1 m below top
of these boards

- Water level on d/s side
of dyke bank appears to be 1-2
cm below that of up's side.

- small amounts of sea lettuce
and clumped Ruppia up's of
flange.

(8)

- many 10s of Coot feeding
at surface & diving,
u/s.

- No smell from u/s
water when standing on
downwind (inland) side -
except at floodgates - smell
is either from water trapped
beneath floodgates, or from
sewage release in corner.

- no fish strongly seen u/s.

- Honey's Inlet north
at 1428 hrs is closed
by the rock bar, which is
wide. (50-100 metres)

9

No sign of high tide
overlapping the bar.

- TIDE TABLES (Prediction)
- LADDERS (CATEST & TROUGH)
- CLEANING BRUSH
- SEWUP GRAPHS FOR
2004/05
- REVIEW RECENT HISTORY
(GRAPHS OF PAST 25 YRS)
- BOATING PERMITS :
- BOAT & OTHER GEAR

(10)

Verse eating flounders For
26/11/04 - Water Corp. 1915

+ 0.26 u/s

+ 0.23 d/s

at 0903 hrs.

Found dead Buller's Shrike

caught up in green
mesh (netting) used
to cover banks.

Great-winged Petrel

Found dead Albatross

on shoreline on

d/s side of flounders.

Now in my words freezer

26/11/04
