Page 2 of 2.

A group of black and white ducks, possibly mallards, are swimming in a body of water. The water is a light brownish-yellow color. There are some green bushes or trees in the background and foreground. The image is somewhat blurry and has a grainy texture.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, nesting on a grassy field. The birds are densely packed in the middle ground, with their white heads and necks visible against the green grass. The background is a clear, bright blue sky.

A photograph showing a large colony of seabirds, likely albatrosses, nesting on a sandy beach. The birds are densely packed along the shoreline, with many showing white plumage and dark wings. Several birds are in flight against a clear blue sky. The foreground is a sandy, slightly uneven beach.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, nesting on a sandy dune. The birds are densely packed in a line across the middle of the frame, with many white heads and necks visible against the darker bodies and the sandy background. The foreground is a sandy dune with sparse, low-lying vegetation. The sky is a clear, pale blue.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, gathered on a sandy beach. The birds are mostly white with dark wings and necks, and are scattered across the sand. The background is a clear blue sky.

A photograph showing a large colony of white seabirds, likely albatrosses, nesting on a sandy, grassy dune. Several birds are in flight against a clear blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, nesting on a grassy hillside. The birds are densely packed across the slope, which is covered in dry, yellowish-brown grass. The sky is clear and blue.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, gathered on a grassy field. The birds are mostly white with dark wings and heads. They are densely packed in the middle ground, stretching across the width of the frame. The foreground is a dry, grassy slope, and the background is a clear, bright blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, nesting on a grassy field. The birds are densely packed in the middle ground, with their white heads and necks visible against the green grass. The background is a clear blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, gathered on a sandy beach. The birds are mostly white with dark wings and necks, and are seen in various poses, some standing and some sitting. The background is a clear blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, gathered on a sandy beach. The birds are mostly white with dark wings and backs, and some have dark caps. They are standing on the sand, and the background is a clear blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, on a nesting ground. The birds are mostly white with dark wings and heads. They are gathered on a sandy, sparsely vegetated area under a clear blue sky.

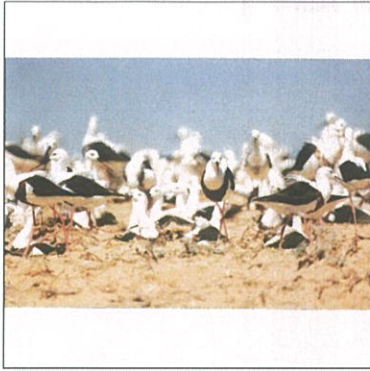

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, on a nesting ground. The birds are mostly white with dark wings and heads, and are gathered on a sandy, vegetated area. The background is a clear blue sky.

A photograph showing a large colony of albatrosses, likely Laysan Albatrosses, gathered on a sandy beach. The birds are predominantly white with dark wings and backs. They are standing on the sand, and the background shows a clear blue sky and the ocean.
