

Flowering over the seasons at Brixton Street Wetlands

Spring

Antigonon munglesi (D.Don, subsp. *munglesi*)
Haemodoraceae
Perennial herb to 1 m. Flowers green and red. Locally common. Low sandy rise. Grey sandy loam, dry. Mann woodlands. Associated species: *Corymba calophylla*, *Ternstroemia*, *Burchardia congesta*, *Mosslemia tetragyna*, *Ceanothium capitanum*, *Acacia laeviscapa* var. *laeviscapa*, *Hibbertia hypoleuca*, *Beta* spp. Excellent condition. Floristic community: *Corymba calophylla*-*Nyssa australis* woodlands in heavy soils. (D)
Loc: Britton Street Wetlands, Kemwick
Lat: 32°12'0.7" S Long: 115°07'21.6" E (GD494)
Coll: K.L. Brown & G. Pachikowska XL8741 Date: 24/09/2008
Voucher: Greater Brisbane Field Herbarium

Antigonon munglesi subsp. *munglesi*
Family: Haemodoraceae

Utricularia multifida (Labiell.) R.Br.
Lentibulariaceae
Annual herb to 20 cm high. Flowers pink. Common. Wet flat. Wet brown clay. Viminalis juncus tall shrubland. Associated species: *Viminalis juncus*, *Mosslemia tetragyna*, *Baya sphaerophylla*, *Neotricha alpestralis*, *Rumex micrantha*, *Halimolobos calathifolia*. Excellent condition. Floristic community: herb rich shrublands in claypan (D)
Loc: Britton Street Wetlands, Kemwick
Lat: 32°12'21.2" S Long: 115°07'14.4" E (GD494)
Coll: K.L. Brown & G. Pachikowska XL8614 Date: 10/10/2007

Figure 1 consists of three panels, (a), (b), and (c), each showing a different plant species. Panel (a) shows a close-up of a purple flower with a dark center, identified as *Corymbis calyptella*. Panel (b) shows a plant with a terminal spike of small flowers, identified as *Corymbis strobilata*. Panel (c) shows a close-up of a white flower with yellow stamens, identified as *Corymbis calyptella*. Each panel includes a label with the species name, collector information, date, and vouchering details.

Figure 1 consists of three panels, each showing a different plant species. Panel (a) on the left shows a close-up of a purple flower with a dark center, identified as *Corymbis calyculata*. Panel (b) in the middle shows a white flower with yellow stamens, identified as *Corymbis strobilata*. Panel (c) on the right shows another white flower with yellow stamens, identified as *Corymbis calyculata*. Each panel includes a label with the species name, collector information, date, and vouchering details.

Greater Brixton Field Herbarium

Thysanotus triandrus
Family: Asparagaceae

Greater Brixton Field Herbarium

Burchardia congesta
Family: Colchicaceae

Department of Environment and Conservation
Our commitment, our future

The image is a composite of four panels, each featuring a different plant specimen. The top-left panel shows a close-up of a pink, star-shaped flower of *Thysanotus triandrus*. The top-right panel shows a photograph of a *Thysanotus triandrus* plant in its natural habitat, with a small inset showing a dried specimen and a scale bar. The bottom-left panel shows a photograph of a *Burchardia congesta* plant in its natural habitat, with a small inset showing a dried specimen and a scale bar. The bottom-right panel shows a close-up of a pink, star-shaped flower of *Burchardia congesta*. The entire image is framed by a thin black border.

Calothamnus hirsutus Hooker & Greville
Myrtaceae
Low shrub to 40 cm high and 1 m wide. Flowers red. Discreet.
Soil type: Seasonally wet. Grey clay. *Viminaria juncea* (shrubby).
Associated species: *Viminaria juncea*, *Ventricaria densiflora*, *Ptilotheca indica* var. *major*, *Mentzelia can.*, *Rhynchospora*, *Podoplepis gracilis*. Excellent condition. Floristic community: herb rich shrubland in claypan (B).
Loc: Britton Street Wetlands, Koorick
Lat: 32°14'8"S Long: 115°58'14"E (GD454)
Coll: K.L. Brown & G. Paczkowska KL8605 Date: 25/11/2009
Voucher: Greater Brisbane Field Herbarium

Liparophyllum capitatum (Lam.) Tippet & Les
Menyanthes
Annual aquatic herb to 10 cm high by 20 cm wide. Flowers yellow.
Common. Water inundated claypan. Brown clay. *Amphibromus granulosus*. Associated species: *Amphibromus holosericeus*, *Amphibromus tenuis*, *Stellaria media* (rare). Very good condition.
Some weeds present: couch (*C. crinitus*), *Leptocarpus* and *Leptocarpus*.
Floristic community: herb rich shrubland in claypan (B).
