Current Contents

Provides access to complete bibliographic information from 1,010 of the world's leading agricultural, biological and environmental science journals and books.

Key advantages:

- Helps users stay up-to-date in their research
- Saves research time by providing one source for a variety of research data
- Provides a complete picture of today's global research

FREEED

A unique, comprehensive source of international forestry information.

Covers nearly 60 years of information on:

- Silviculture
- Forest management
- Tree biology
- Pests and pest control
- Land use
- Wood properties
- Timber extraction, conversion and measurement
- Wood products
- Marketing
- Agroforestry systems: sociological, cultural and economic aspects
