

Keith Claymore (Discussion)

Sue Hancock

Natural Resource Management strategies. What are they? Creation by Commonwealth of a framework to drive regional strategies between Gov't. agencies, NGO's, etc. Regional strategies do not cover DCLM boundaries of six regions in the state. Coordination of funding of a large number of projects on a regional basis.

John Watson

Definition of NRM?

Paul Brown

Need to have our priorities expressed in order to be able to access NRM funding.

Daryl Moncrieff

Who administers NRM funding? Water and Rivers Commission / DUCAP are National Heritage Trust funding coordinators.

Peter Bidwell

Will be applying to a regional group as opposed to federal.

Vicki Winfield

What is the regional plan? Is it ours, NRM, etc?

Keith – NRM.

Rod Annear

Comment on value of training specialist support, etc from PVS. Would like to see this from Nature Conservation stream.

Colin Ingram

Planning and integration of frameworks. Need to focus on budgeting, practical integration on-the-ground. Concern about the silo / compartmentalisations.

Keith - Need to design a new budgeting process; favours joint meetings, training, etc.

Cliff Winfield

Nature Conservation absent in terms of involvement in community education. Will NC be showing more interest / funding support.

Keith - Can't say how we will achieve this.

Tony Jupp

Need for an integrated approach.

Peter Sharp

Need for a subtle change in language – "CAPA's" comprehensive adequate protected areas, will remove some of the barriers, emphasis should be on Protected Areas. Supported by John Watson.
