

Neville Marchant (discussion)

Tim Foley

Where do slime moulds fit, are they a fungi? Is it valid to take photographs as opposed to a specimen where there is only one plant / flower?

Neville – Yes.

Lorna Charlton

Role of Herbarium in identifying specimens.

Neville – Have an on-line identification system. Herbarium doesn't have staff / time to provide an identification system, that's why the Herbarium are pursuing a 'self help' approach. Herbarium can provide detailed list of plants in a particular region for project purposes.
