Table 2: Significant Weed Flora of the Greater Brixton Street Wetlands

Key

Column 1

* Weed species

Column 2 Taxa in family, listed alphabetically. Names follow Gibson *et al.* 1994.

Columns 3-8 Plant Communities (see Vegetation Maps and Key)

X present in unit

• potential to be a serious weed in unit

- pan = water filled depressions, may be clay based (claypans) or humus rich or combinations of both
- wet = Mixed Shrublands on seasonally waterlogged or inundated flats or edges of depressions
- dry = Mixed Low Shrublands on dry flats, occasionally waterlogged
- bW = *Banksia* Woodlands (uplands)
- mW = Marri Woodlands (uplands)
- Dist = disturbed areas, dominated by weed taxa
- aq aquatic species
- sal confined to saline areas
- crk confined to drain/creek
