NATURE CONSERVATION CONTACTS FOR GROUPS

Department of Conservation and Land Management

PREFACE

At the Conference "Nature Conservation: the Role of Networks" held in Geraldton in May 1994, it was noted that there is a need for there to be a better dissemination of information between researchers, land managers, educators and the general public.

One way of doing this is to provide groups with a list of specialists who would be prepared to help them by answering queries, speaking at meetings or leading field trips. Putting together such a list for nature conservation specialists was my main "action outcome" from the Conference. All delegates to the Conference from WA were asked to fill in an information sheet with details of how they would be prepared to help groups, and the proforma was also distributed widely to various research organisations. A total of 58 people responded, and their names are included in this booklet.

Please note that the primary focus of this listing is nature conservation, however some respondents are specialists in other areas and these have all been included. There are, of course, many more people who will be able to help in all sorts of different fields, but, when looking for assistance, this list should provide some appropriate contacts to start with.

I hope that the contacts listed herein will not only provide users with valuable information on nature conservation, but will also help land managers to better look after their natural resources and so achieve the goal of ecologically sustainable development.

Penny Hussey
Rural Nature Conservation Officer
Wildlife Branch, CALM.
PO Box 104, COMO, WA 6152

March 1995

HOW TO USE THIS LIST

On the following two pages, a list of specialists has been arranged under their main topic of expertise. Further details for each person are then listed alphabetically. Suppose you wanted to contact someone to tell you about, for example, diseases of native plants. The first list would give you two names, the detailed listing would then help you to choose which person you would approach.

The detailed listing has firstly contact information, then suggested topics and finally some detail of how each specialist would be prepared to work with a group. In this section: ☒ = will do/need, ☐ = will not do/need.

Contacting the specialist

Please note that all of these specialists are very busy people, with lots of existing commitments. The inclusion of a name on this list does not place the person under any obligation to assist. All arrangements are subject to negotiation between the concerned parties.

Most people will answer queries, as long as they are not too complex and time-consuming. However, giving a talk or leading an excursion needs more planning, for the group, as well as for the speaker. Just because a person says, for example, that he/she is prepared to lead an excursion on a weekend, does not mean that all weekends are equally available. It is suggested that you contact the person first, and negotiate with him/her a mutually convenient schedule, giving as much lead time as is possible.

Costs, as given here, are almost certainly also subject to negotiation. Where travel and accommodation costs are required, for example, this would probably only apply to long-distance trips, and even then, if you are prepared to be flexible about timing, the person may be able to fit in a visit to your area with a trip as part of work, and so the costs to your group will be minimal. Discuss this with the specialist when you are arranging the meeting.

Similarly, although certain equipment has been listed, it may not be essential for the presentation. (But note, for example, if a slide projector is needed for a day-time talk, you must be using a venue that can be blacked out. Nothing is more infuriating to a speaker than giving a well-planned slide talk where the audience cannot see the slides!)

Finally, don't forget to thank the speaker for their time and trouble. Some groups present a speaker with a small memento of the occasion - a piece of local craftwork, for example - and this can be a really nice way to say "thank you".

Updates

Hopefully this booklet will stimulate others to put forward their names for inclusion in later editions. Please contact me directly if you wish to add your name.

Name	General topic
Mr Trevor Walley	Aboriginal landuse
Ms Andrea Taman	Arts and environment
Prof Byron Lamont	Ecology
Jennifer and Barry Muir	Ecology
Dr Denis Saunders	Ecology, fauna, birds
