Management plan for the Tuart Forest National Park Have your say Department of Environment and Conservation

When completed, moisten light green areas and refold to close (do not staple) so the return address panel is on the outside.

HAVE YOUR SAY

on the management plan for the Tuart Forest National Park

On behalf of the Conservation Commission of Western Australia, the Department of Environment and Conservation (DEC) is in the process of preparing a management plan for the existing Tuart Forest National Park and its proposed additions.

The management plan will detail the purpose of the planning area and how DEC will manage it over the next 10 years.

Have Your Say

Public involvement in how the planning area should be managed is an important part of the planning process and a number of opportunities will be provided for this to occur. You are invited to register your interest in the development of the management plan. In doing so, DEC will notify you of opportunities when you can contribute. All contributions will be carefully considered and taken into account in preparing the proposed management plan.

Although the details of the public participation process are yet to be finalised, it will likely include community workshops, public displays and submissions to the draft management plan. By providing your contact details we can inform you of events/opportunities as they arise and keep you up to date with our progress.

Further information can be obtained by viewing DEC's *NatureBase* website. To do this, visit www.naturebase.net/haveyoursay. A copy of the issues paper for the planning area is now available on the website.

If you wish to register your interest, or register on behalf of a group or organisation, please complete the form on this brochure and post it to the address shown.
