Eighty Mile Beach Marine Park has six different zones:

Sanctuary zones: The green zones are ‘look but don’t take’ areas, where all types of fishing are prohibited. They are set aside for conservation, so all plants and animals are protected. There are three sanctuary zones in the park: Anna Plains, Kurtampanya and Pananykarra.

Special purpose zones (cultural heritage): The blue zones recognise and protect sites of high cultural significance to the traditional owners, particularly the Nyangumarta people. There are four cultural heritage zones in the park: Jangyjartiny, Waru, Paruwuturr and Pilyarkarra.

Special purpose zone (mangrove protection): The pink zones are managed for the protection of mangroves, saltmarshes and species inhabiting these areas, while allowing for compatible recreational use. They are of high cultural significance to the Ngarla people. There is one mangrove protection zone in the park: Malamalajungunya.

Special purpose zones (shore-based activities): The red zones provide for shore based recreational and commercial fishing. Boat-based fishing is not allowed. There are two shore-based activities zones in the park: Pananykarra and Banningarra.

Recreation zone: The yellow zone provides for conservation and recreation. Commercial fishing, pearling, aquaculture and petroleum development are not allowed. There is one recreation zone: Wallal Recreation Zone.

General use zone: 70 per cent of the park is available for a wide range of recreational and commercial uses.

Comfort and safety

- Tides in the marine park are semi diurnal (two high tides and two low tides each day). Check the tide times before driving along the beach.
- The beach can have areas of soft sand and mud. Be careful when driving your vehicle and try to stick to the high tide line or above. There have been many vehicle recoveries and losses at the beach.
- It is not recommended that you swim in the marine park due to the presence of jellyfish, catfish, sharks and vagrant crocodiles.
- Hot weather dehydrates your body quickly, so always carry plenty of water.
- This stretch of coastline is remote; remember to carry enough fuel, food, water and first aid equipment.
- Tropical cyclones occasionally hit Eighty Mile Beach during the wet season. Visitors need to listen for cyclone and severe weather warnings.

Zone boundaries

Zone boundaries are defined by latitude and longitude coordinates. On the water, zone boundaries can be identified using Global Positioning Systems (GPS) and plotters. You will need to plot the coordinates manually into your GPS. To do this accurately, ensure that your GPS is set to either GDA94 or WGS84.

The coordinates can be found in this brochure, and online at either the Department of Biodiversity, Conservation and Attractions Parks and Wildlife Service or Department of Primary Industries and Regional Development websites. Alternatively, zoning maps can be emailed to you if you call the Parks and Wildlife Service office.

Know your zones

In Western Australia, marine parks are zoned to protect the natural and cultural values of the area, while providing opportunities for commercial and recreational use and enjoyment. As a marine park visitor, it is your responsibility to be aware of what activities are permitted in each zone. To help you ‘know your zones’ the ‘Explore Marine Parks WA’ iphone app has been created to provide easy-to-access information for the marine parks in WA. It provides a variety of information including a ‘where am I?’ function to see which marine park zone you are in. The app can be downloaded through the Apple AppStore on any iPhone.

Make sure you ‘know your zones’ and are prepared before you head out.

Respecting Aboriginal culture

The Ngarla, Nyangumarta and Karajarri people welcome visitors to their saltwater country and the marine park, and ask that you care for and respect this sacred place.

- Acknowledge traditional owner country and their ancestors
- Respect traditional owner culture and values
- Take your rubbish with you
- Respect wildlife
- Fish for the future and only catch what you can eat fresh
- Be careful as there are dangers in the water
- Be considerate of your hosts and other visitors
- Visitors are encouraged not to take shells from the beach

Recreational fishing

Recreational fishing is a popular activity in the marine park and is permitted in more than 75 per cent of the park. Recreational fishing can continue to be enjoyed in the general use zone, cultural heritage (dark blue) zones and recreation (yellow) zone. In the shore-based activities (red) zones, only shore-based recreational fishing is allowed. In the mangrove protection (purple) zone, only boat-based recreational fishing is allowed. Fishing is not permitted in sanctuary zones.

Remember that recreational fishing rules apply within the marine park. If you plan to fish from a boat powered by a motor, or if you use a powered boat to travel to your fishing destination, you will need a Recreational Fishing from Boat Licence from the Department of Primary Industries and Regional Development. To use a throw net, you will need a net fishing licence (haul and set netting is prohibited). Any undersize and unwanted fish should be returned to the water as soon as possible. Protected species including sawfish are found in this marine park. If caught, remove all of the line and the hook if possible before releasing. Finfish possession limits apply throughout WA including permanent and temporary places of residence. Familiarise yourself with the Code of Conduct for Recreational Fishing in the Kimberley before you head out fishing. For this document, along with the latest recreational fishing rules, go to fish.wa.gov.au.

Marine park in the State.

Eighty Mile Beach Marine Park is the longest uninterrupted beach in Western Australia, stretching 260km from Cape Missessy (Jinnarnnary) to Mulla Mulla Down Creek at De Grey Station (Pananykarra). This remote and remarkable coastal country is one of six marine parks established as part of a broader strategy to protect the Kimberley.

Marine parks help to conserve marine biodiversity and cultural heritage while providing special places for people to enjoy, appreciate and learn about the spectacular marine life. In 2013, Eighty Mile Beach Marine Park became the thirteenth marine park in the State.

Eighty Mile Beach Marine Park

Wet	– March	November	36	24	60	Yes
Dry	April – October	32	16	10	No	No
Season	Months	Daily Temp (°C)	Night Temp (°C)	Rainfall (mm)	Cyclones	

The marine park lies on the most arid coast in Australia, where average rainfall is low. Most people visit in the dry season when temperatures are milder and there is low risk of tropical cyclones. However, sea turtle nesting occurs in the wet season and some visitors are keen to observe this natural phenomenon. Service rangers are often onsite. For more information call 08 9176 5941 or visit eightymilebeach.com.au.

Climate

Eighty Mile Beach Marine Park is located between Port Hedland and Broome, approximately 1700km north of Perth. It extends for nearly 260km along the coast and includes the popular recreational sites of Cape Keraudren, Pardoo and Eighty Mile Beach. The Eighty Mile Beach coastal reserves run parallel to the north to Cootenbrand Creek near Cape Keraudren in the south. For more information about the Eighty Mile Beach coastal reserves refer to the *Parks and reserves of the south-west Kimberley and north-west Pilbara joint management plan 2016* dca.wa.gov.au.

Planning your visit

The marine park is jointly managed with the Ngarla, Nyangumarta and Karajarri traditional owners. The traditional owners have lived on and remain connected to the land, plants, spirits and animals of their traditional country. Stories, songlines and sites are embedded within Eighty Mile Beach and remain a powerful spiritual force. Each group has rangers who work alongside the Parks and Wildlife Service to look after their saltwater country. Eighty Mile Beach is one of the world's most important feeding grounds for migratory shorebirds and is a major nesting site for hawksbill turtles, which are only found in northern Australia. It is home to many species of shark, ray and sawfish. The vast intertidal sand and mudflats that extend up to four kilometres wide at low tide provide a rich source of food for many species.

Sandridge Roadhouse offers fuel, meals, snacks, camping accommodation and rooms. The nearest access point to the marine park from this location is via the Eighty Mile Beach Caravan Park, 50km to the south. For more information call (08) 9176 5944.

Eighty Mile Beach Caravan Park offers powered and unpowered campsites and self-contained units, a camp kitchen, toilet blocks, drinking water, barbecues, fish cleaning station, public phones and a mini mart. You can access the marine park via 4WD and foot from the caravan park. Parks and Wildlife Service rangers are often onsite. For more information call (08) 9176 4930 or visit paradoostation.com.

Pardoo Station is a working cattle station which also provides accommodation for caravans, families, backpackers and corporate clients and has camp sites, rooms and houses for rent. There is a camp kitchen, restaurant, toilet and shower block, pool, fire pit, boat launching areas and small shop stocking snacks and bait. From here you can access recreational fishing opportunities in the south-western end of the marine park via 4WD, boat and foot. Parks and Wildlife Service rangers are often onsite. For more information call (08) 9176 4916.

Pardoo Roadhouse, Tavern and Caravan Park is located on Great Northern Highway across the road from the turn off Cape Keraudren Reserve and offers fuel, snacks and meals, campsites, caravan sites, budget accommodation, souvenirs and a fully licenced restaurant. There is a swimming pool and laundry facility for guests. The nearest access point to the marine park from this location is via Cape Keraudren or Pardoo Station. For more information call (08) 9175 8000

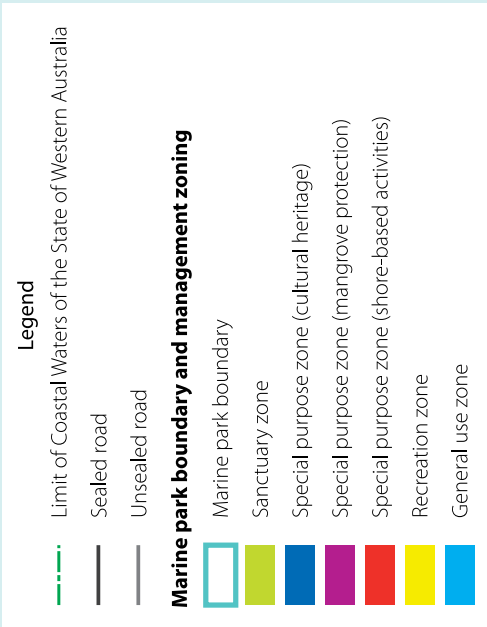

Cape Keraudren lies 13km off Great Northern Highway and is operated by the Shire of East Pilbara, offering tent and caravan sites. There is a boat launching ramp, fish cleaning station, picnic tables, wi-fi hotspots and toilet blocks. There is NO drinking water or electricity available. Dogs must be kept on a lead at all times. There is a shire ranger on site to assist with all your queries. You can access the mangrove-lined creeks and bays at the southern end of the marine park by boat or foot. For more information, contact the Shire of East Pilbara: eastpilbara.wa.gov.au

Services and facilities

How you can help

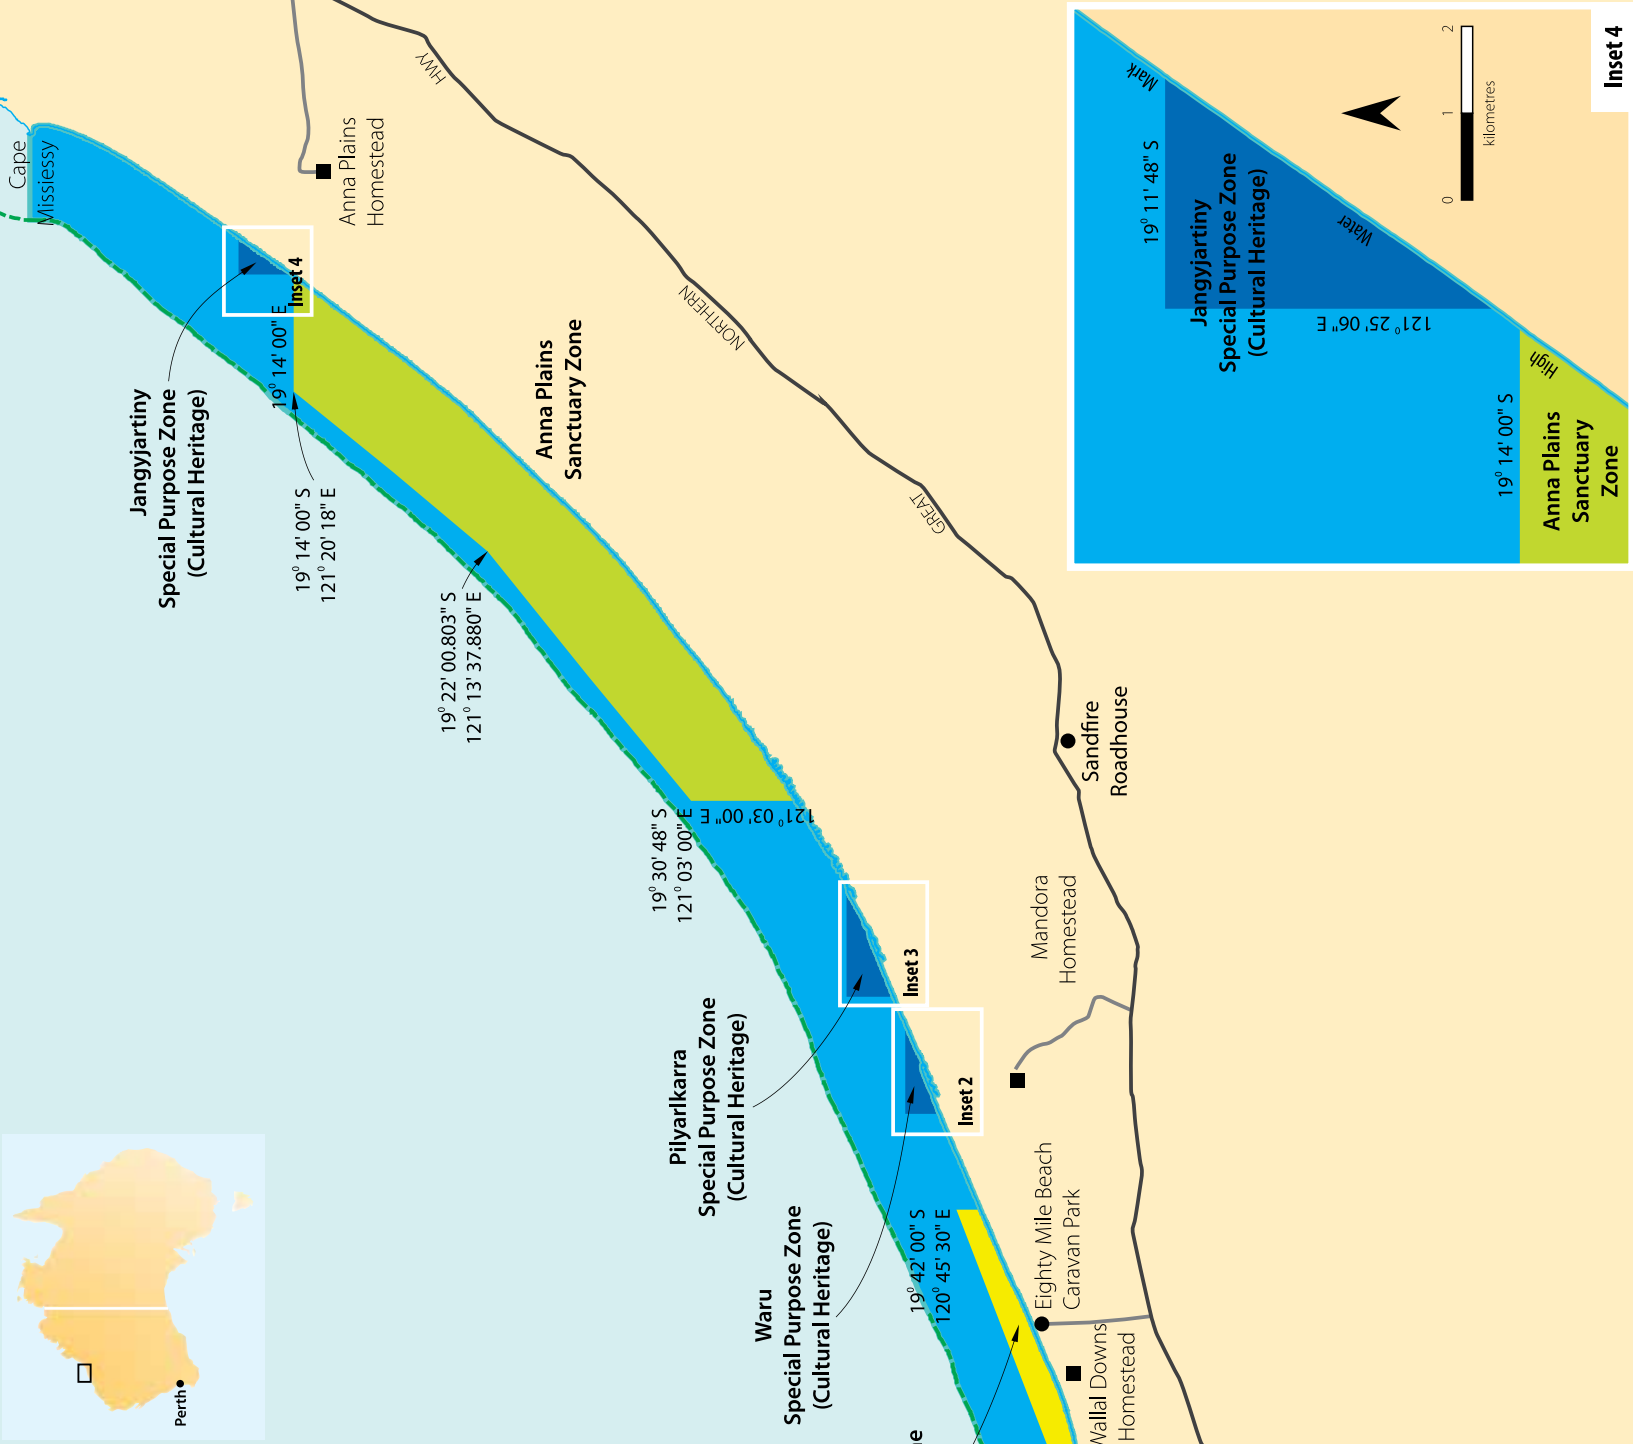

- Quickly and carefully return undersize and unwanted fish to the water. Use wet hands or a wet cloth when handling fish and avoid placing them on hot dry surfaces.
- Always take your litter home with you – remember that plastics and fishing line can harm and potentially kill marine wildlife.
- Do not feed wildlife as it may be harmful to them and introduce risks to other visitors through changed wildlife behaviour.
- Anchor in sand to protect fragile reef, seagrass and seaweed communities that can take decades to regrow.
- Leave shells on the beach.
- Respect turtles when they are nesting and making their way to and from the water: follow the guidelines to enhance your viewing experience.
- When boating, slow down around shallow coral reefs, wildlife, seagrass beds and beaches.
- Learn about and respect traditional owner culture and their connection to saltwater country.

All coordinates are referenced to the Geocentric Datum of Australia 1994. This map is for illustration purposes and not for navigation.

Mapped location of HWM and LWM is approximate only. Waterlines shown on this map do not necessarily depict an exact cadastral boundary.
