Caring for the marine parks

The Rowley Shoals are located approximately 300km (160 nautical miles) west of Broome and include the State-managed Rowley Shoals Marine Park and the Commonwealth-managed Mermaid Reef Marine Park. Together the parks protect a chain of three coral atolls, Clerke Reef, Mermaid Reef and Imperieuse Reef, at the edge of Australia's continental shelf. Mermaid Reef, the most northerly atoll, rises from depths of around 440m, Clerke Reef from 390m and Imperieuse Reef from 230m. The three atolls are strikingly similar in dimension, shape, orientation and distance apart. Each atoll is pear-shaped with a north-south orientation and approximately 14–18km long and 7.5-9.5km wide. These atolls produce spectacular intertidal and subtidal coral reefs which provide a home for fish, eels, sharks, manta rays and turtles as well as invertebrates including giant clams, sea stars, urchins, sea cucumbers and nudibranchs. They are tropical 'aquariums' in the middle of the ocean.

In 1818 Captain Phillip Parker King named the area Rowley Shoals after Captain Rowley who first sighted the atolls in 1800. The three atolls were named after the ships *Imperieuse* and Mermaid, and the third one after Captain Clerke.

#### Fish for the future

The Department of Primary Industries and Regional Development legally enforces gear, bag, size and possession

limits in zones where fishing is permitted in the Rowley Shoals (Recreation and General Use Zones). This management ensures there will always be fish for the future. It is your responsibility to know the zones and rules of each marine park. Download the free Recfishwest or Marine Parks WA apps to access marine park maps and other info. These apps can be used offline once downloaded.

All cod, groper, and wrasse species are fully protected in all zones at the Rowley Shoals. Molluscs (excluding cuttlefish, squid and octopus) and coral species are also fully protected.

Please return undersize or unwanted fish to the water quickly and carefully. Use a wet cloth when handling them and avoid placing them on hot, dry surfaces.

#### Line fishing

- Is permitted in the General Use and Recreation Zones.
- Fishing is not permitted in the Sanctuary and National Park Zones at the Rowley Shoals.

#### Recreational netting

- Throw nets may be used only in the General Use Zone.
- Recreational set and haul netting are not permitted at the Rowley Shoals.

#### Spearfishing

 Is permitted in General Use and Recreation Zones (excluding Clerke Lagoon Recreation Zone)

#### Spearfishing (compressed air)

Is only permitted in the General Use Zone.

#### Planning your visit

Most visitors to the Rowley Shoals arrive by commercial charter boat between September and December and enjoy an average of 4–7 days at the Rowley Shoals. Commercial operators typically depart from Broome at sunset and arrive at the Shoals in the morning, after spending a night steaming. A call to Broome Visitors Centre on (08) 9195 2200 is a great way to find out more about what trips are available.

#### Moorings and anchoring

To protect the reef habitats in the marine parks, it is important that visitors use the public moorings. Moorings are located on the outer edge of Imperieuse and Clerke reefs and inside Clerke and Mermaid reef lagoons (map inside). The lagoons are accessible via navigable channels. There is no channel at Imperieuse Reef and the central lagoon can only be accessed using small tender vessels under the right tidal conditions. Mermaid Reef includes a designated anchoring area outlined on the map inside. Vessels may only anchor in the designated anchoring area if no moorings are available.

Anchoring is not permitted anywhere in the Rowley Shoals Marine Park, unless in an emergency. For Mermaid Reef Marine Park, no anchoring is permitted outside the designated anchoring area.

#### Reserve your spot now!

All moorings must be booked, and written permission obtained before arriving. This should be done well in advance of your trip to avoid the disappointment of missing out or risk of getting fined.

Commercial tour operators must obtain a commercial operations licence from the Department of Biodiversity, Conservation and Attractions to visit the Rowley Shoals Marine Park, mooring fees apply. For further information, please call the Parks and Wildlife Service's Broome office on (08) 9195 5500 or email rsmp@dbca.wa.gov.au. If visiting Mermaid Reef Marine

Park, commercial tour operators require a commercial tourism licence from Parks Australia – for more information, please visit parksaustralia.gov.au/marine/activities/do-i-need-an-approval/tourism/

#### Activities at the Rowley Shoals

#### Diving and snorkelling

The Rowley Shoals offer a range of diving and snorkelling experiences including shallow lagoons, high-speed drift, and deeper reef wall dives. The outside walls of each atoll are alive with hard and soft corals in every imaginable colour, size and shape. Curious giant potato cod and Maori wrasse will likely join you on your dive, while scores of colourful reef fish, trevally, mackerel, tuna and hump headed parrotfish hover in schools.

#### Wildlife viewing

Humpback whales pass by the Rowley Shoals on their annual migration to and from calving grounds off the Kimberley coast. Localised upwellings of cool water provide feeding opportunities for small and large species. You are likely to see bottlenose and spinner dolphins cruise around the deep water surrounding the shoals. Populations of large fish and shark species such as hammerheads, marlin and sailfish also live in these deeper waters.

Seabirds feed in the offshore waters, while others breed on the islands. Bedwell Island, on Clerke Reef, is home to the State's only breeding colony of red-tailed tropicbirds who nest among the limestone rubble and driftwood. Occasionally, they are joined by wedge-tailed shearwaters, white bellied sea eagles, ruddy turnstones, sand plovers, eastern reef egrets, various terns and rarely, white-tailed tropicbirds. Bedwell and Cunningham (at Imperieuse Reef) islands are important resting areas for migratory birds making their mammoth annual flights from as far north as Siberia.

#### Marine parks – Know your zones

Marine parks help to conserve marine biodiversity and provide special places for people to learn about, enjoy and appreciate the spectacular marine life in Western Australia. To ensure humans and nature can thrive side by side, marine parks are zoned, with different activities permitted in each area. You can contribute to the management of the Rowley Shoals by ensuring you know and follow the rules.

There are four zone types at the Rowley Shoals. The map and activity table (inside) provide a quick reference guide to the different zones and permitted activities in this area.

## Sanctuary Zone (Rowley Shoals Marine Park) and National Park Zone (Mermaid Reef Marine Park)

These 'look but don't take' areas provide the highest level of protection for marine habitats and wildlife, maximising

conservation outcomes. You can still enjoy a range of nonextractive activities including boating, swimming, scuba diving, snorkelling and nature watching in these zones. **Fishing is not permitted.** 

#### Recreation Zone (Rowley Shoals Marine Park)

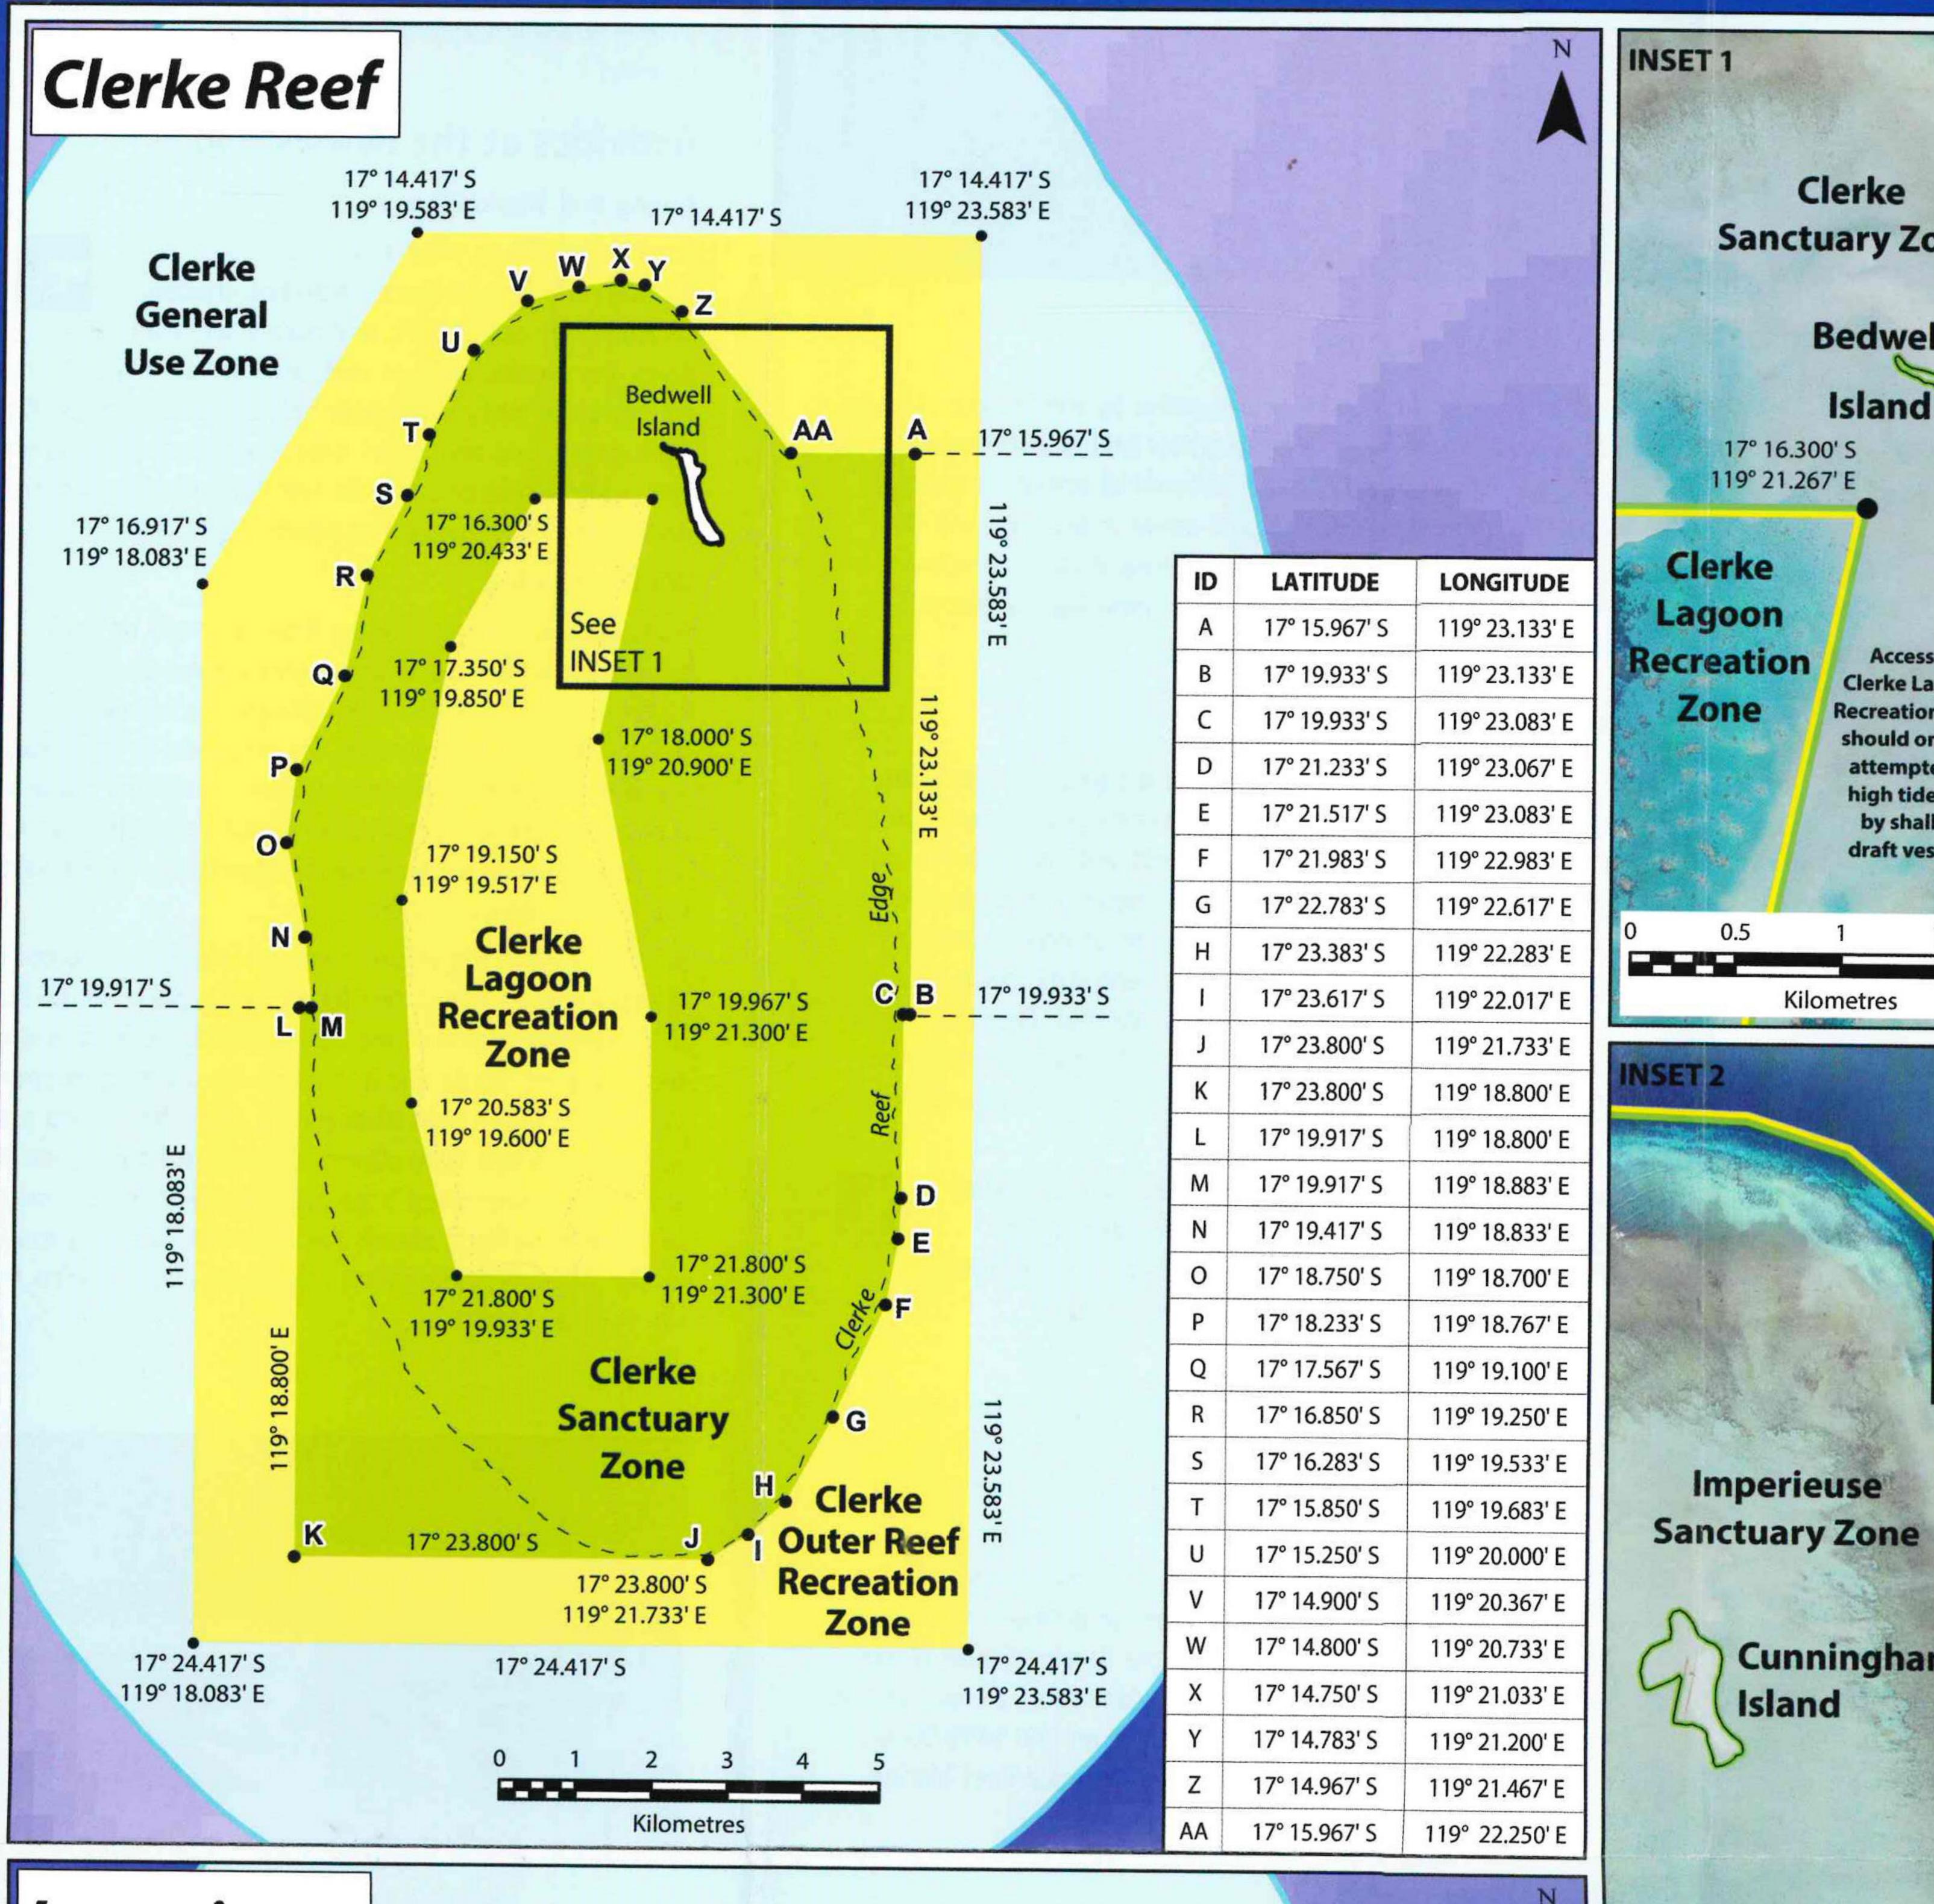

The Rowley Shoals Marine Park recognises these zones as areas of high value for recreational use and enjoyment. **Line fishing is permitted** but there are restrictions on netting, spearfishing and species that can be taken.

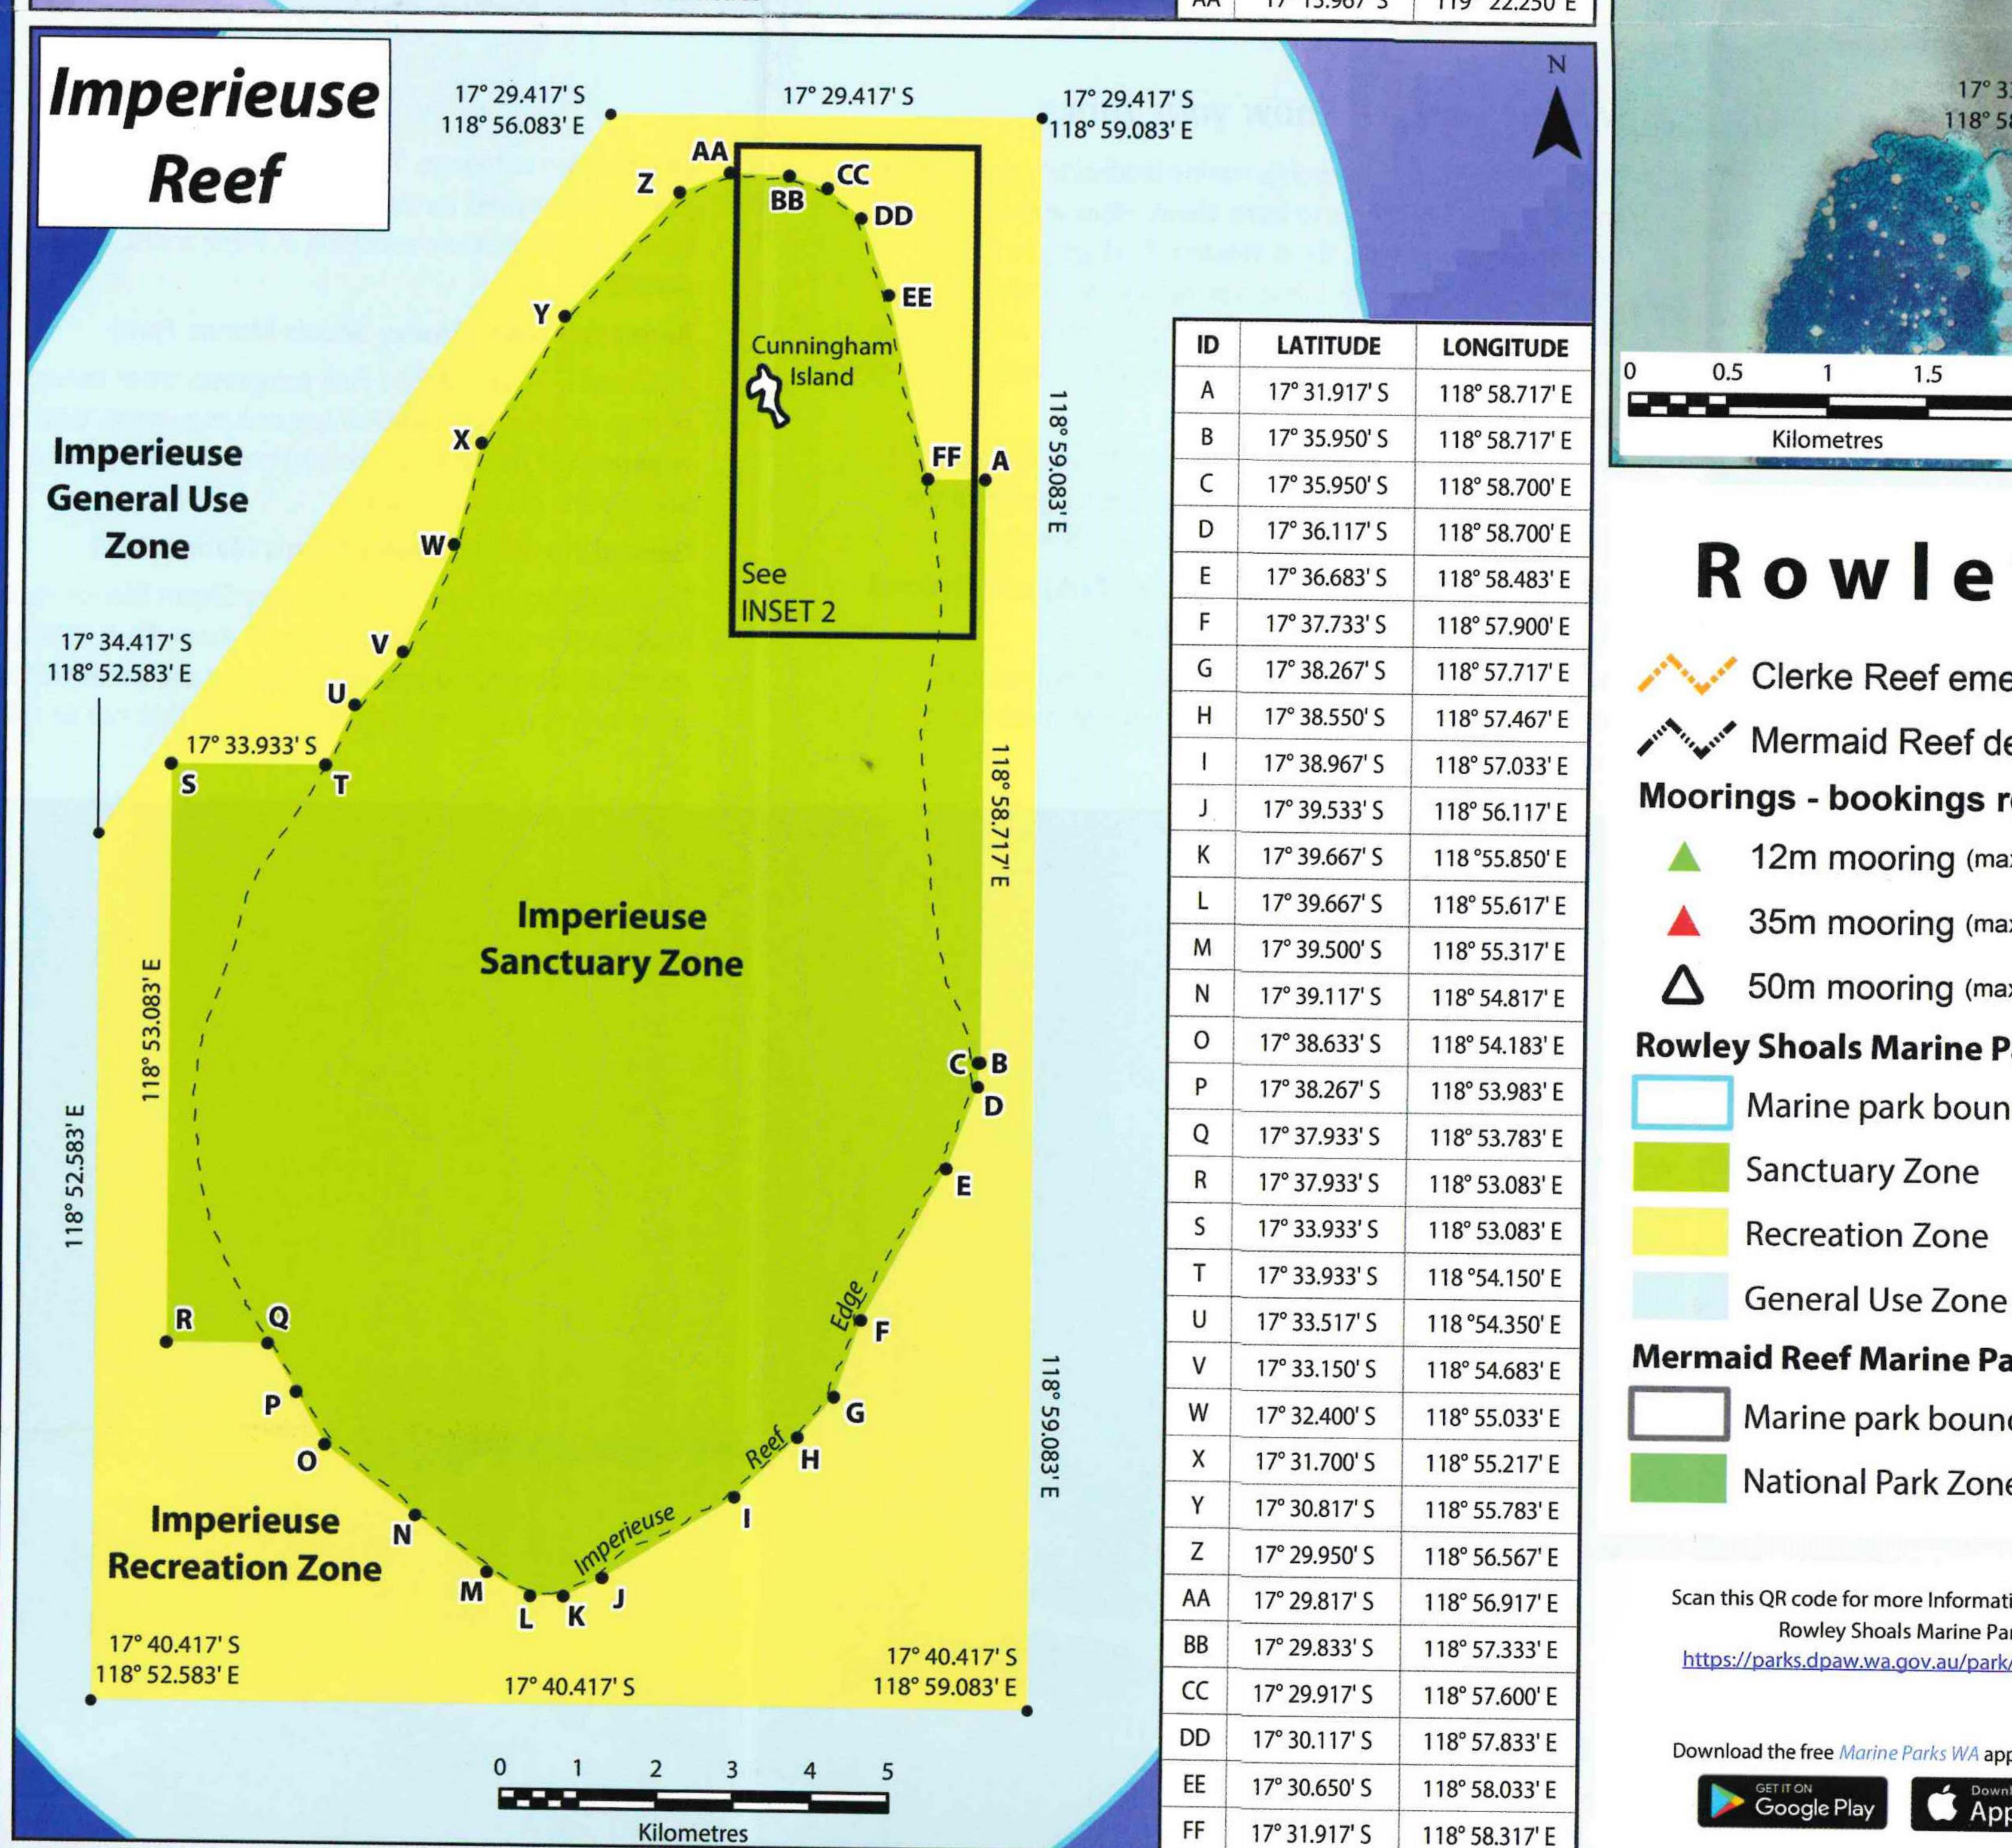

#### General Use Zone (Rowley Shoals Marine Park)

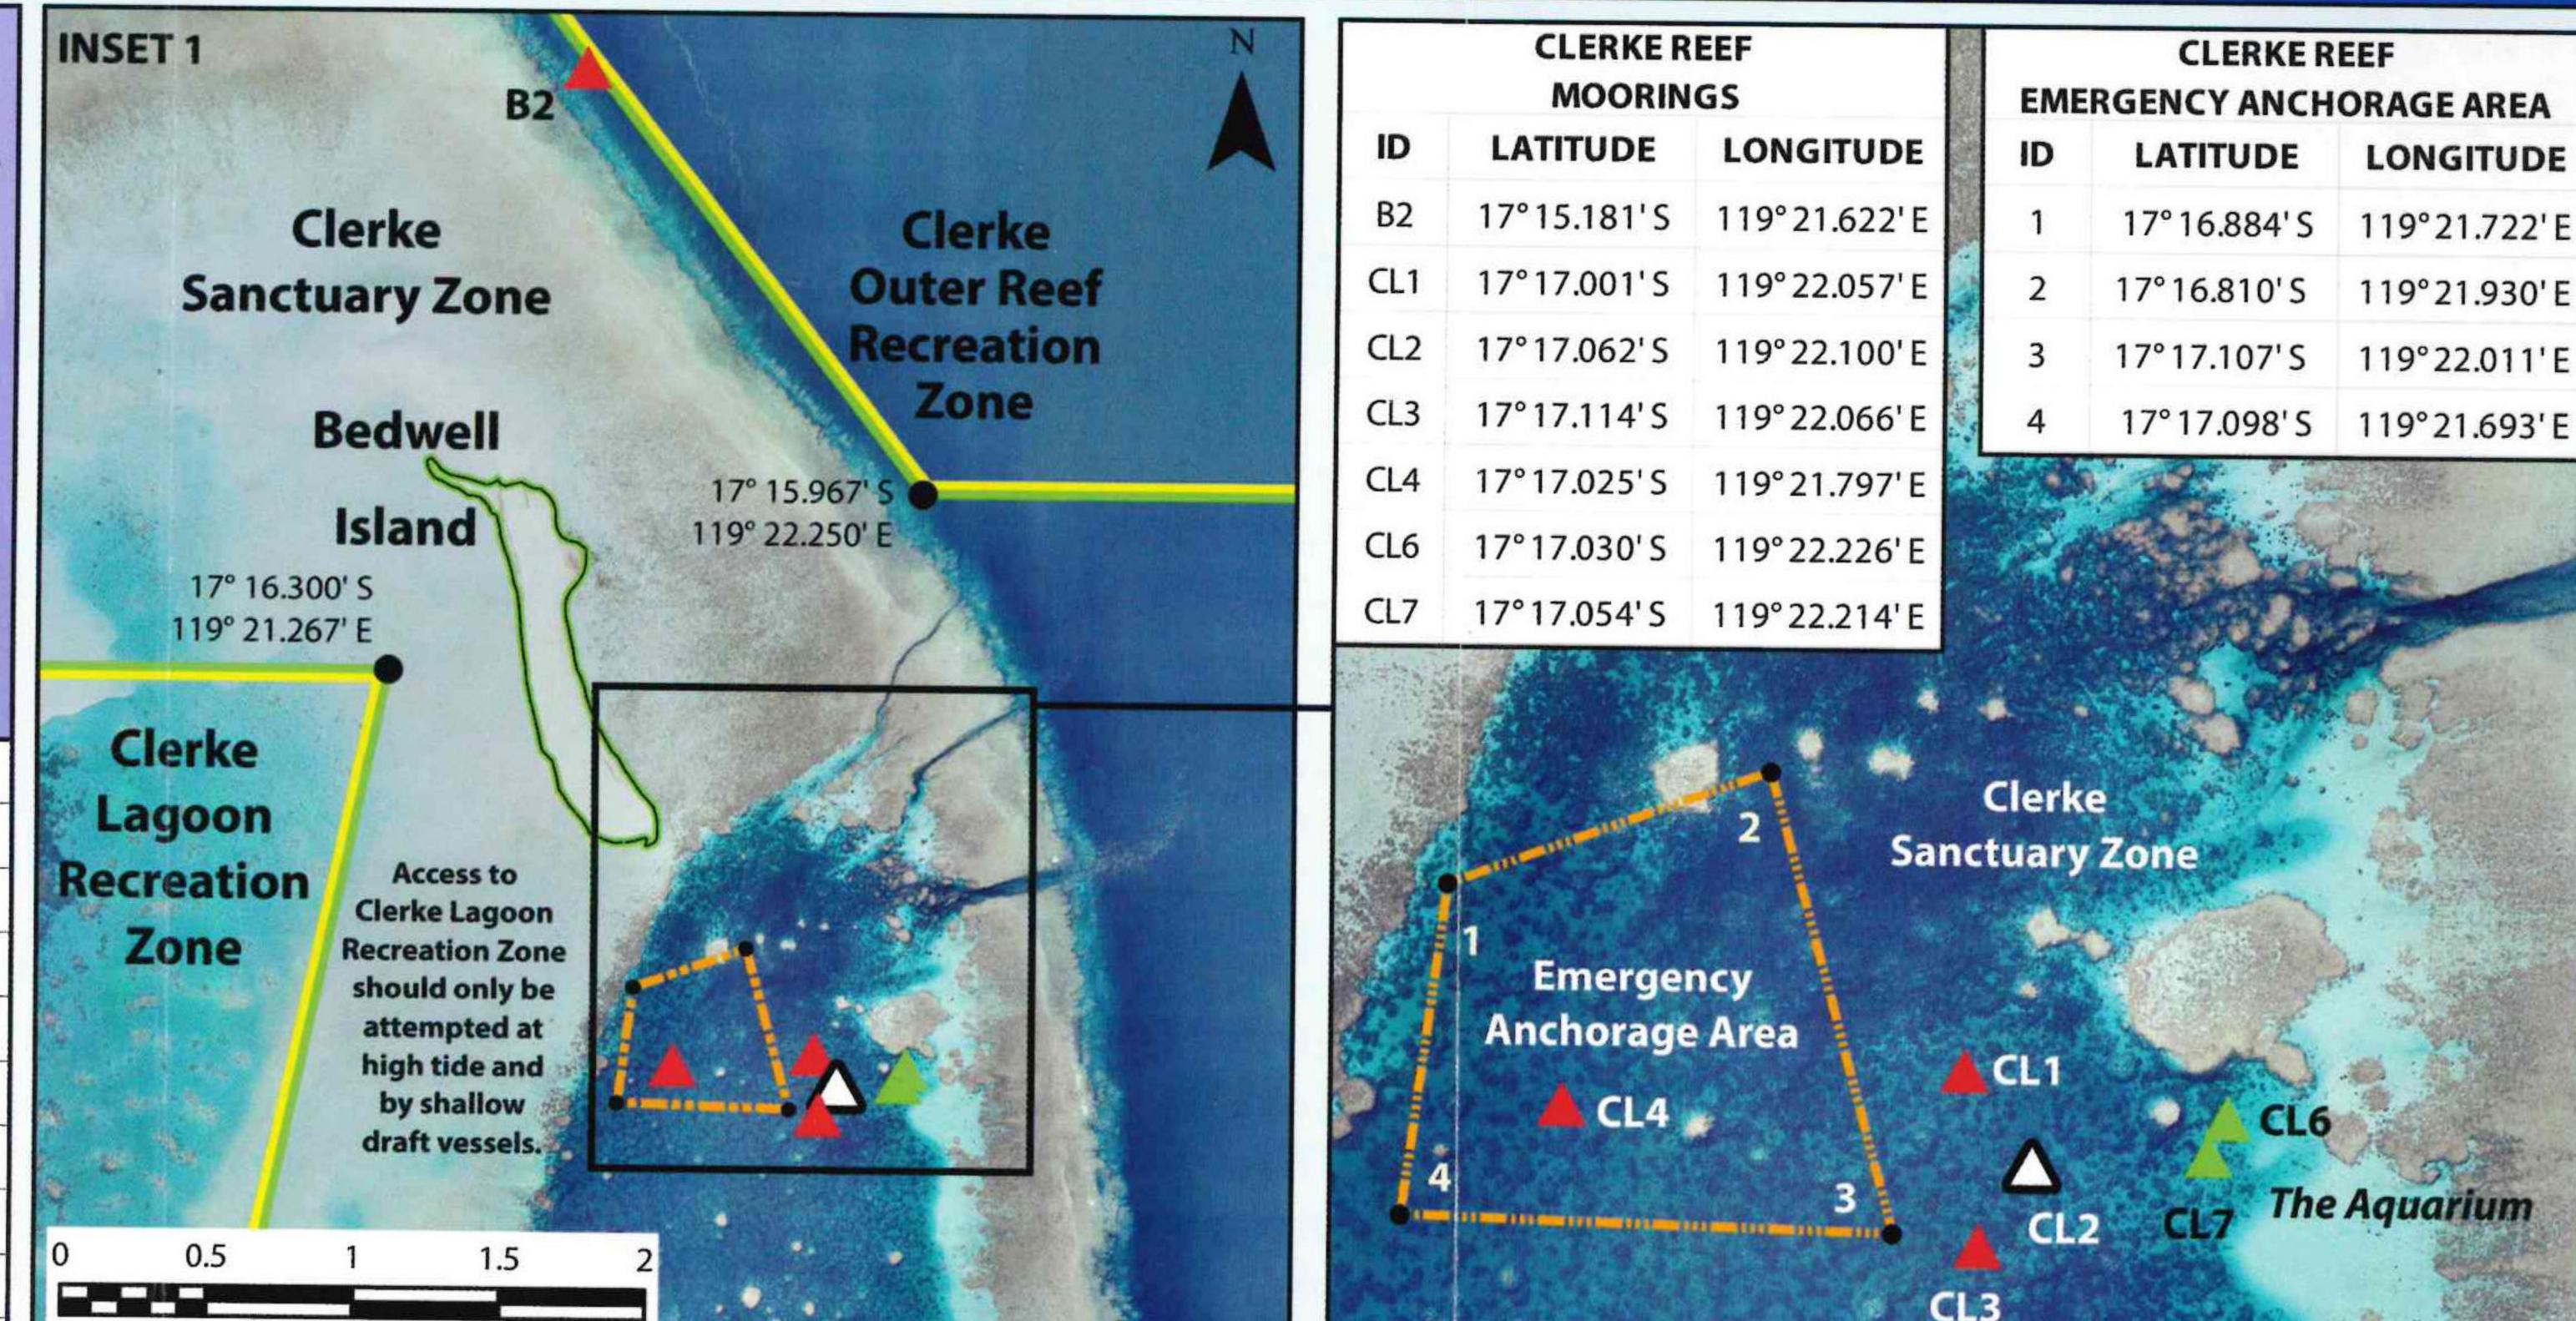

This is the largest zone in the Rowley Shoals Marine Park, enabling a wide range of activities to occur. Line fishing, recreational netting and spear fishing are permitted is this zone but there are restrictions on species that can be taken.

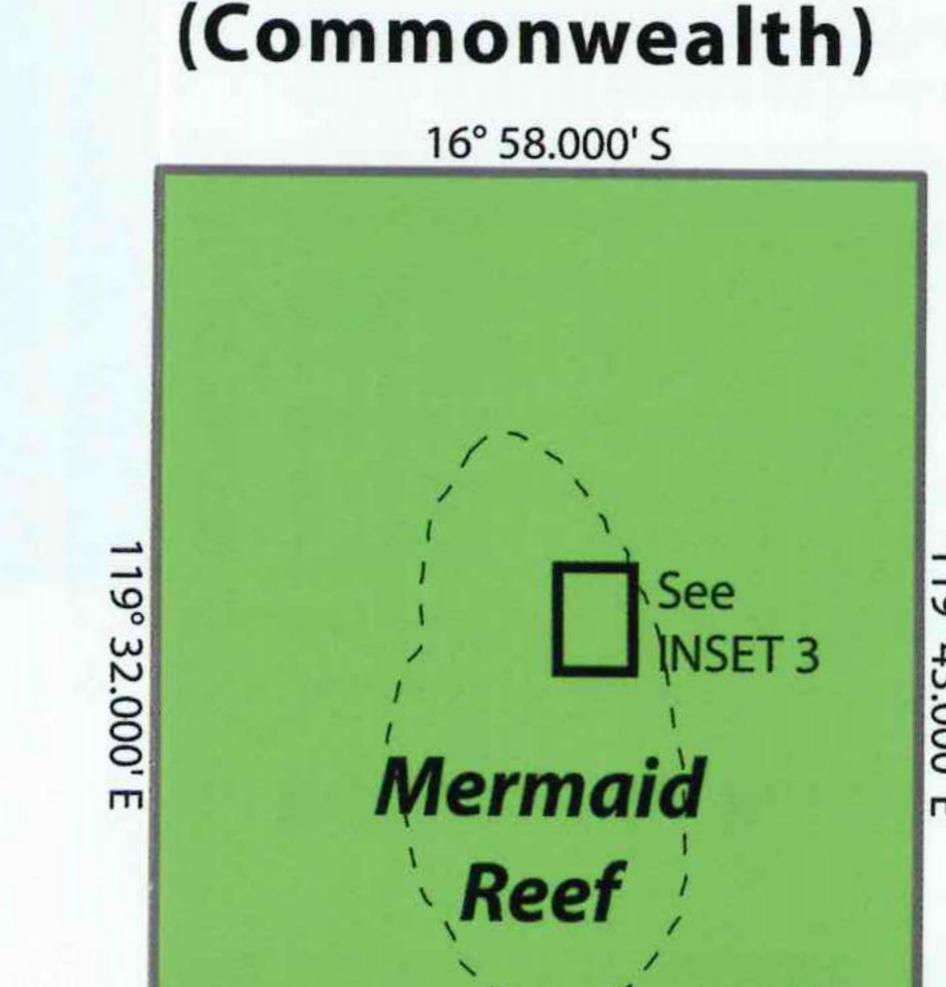

# Mooring and Anchoring Anchoring is prohibited throughout Rowley Shoals Marine Park, except in the case of an emergency. At Mermaid Reef Marine Park, anchoring is prohibited

outside the designated anchoring area, except in the case of an emergency. 17°16.884'S 119°21.722'E Moorings are available for day and overnight use in both marine parks and must be booked prior to use through the Broome Department of Biodiversity, Conservation and Attractions, Parks and Wildlife Service office on (08) 9195 17°17.107'S 119°22.011'E 5500 or rsmp@dbca.gov.au. Detailed mooring maps are available from the Broome Department of Biodiversity, Conservation and Attractions, Parks and Wildlife Service office.

# **Island Reserves**

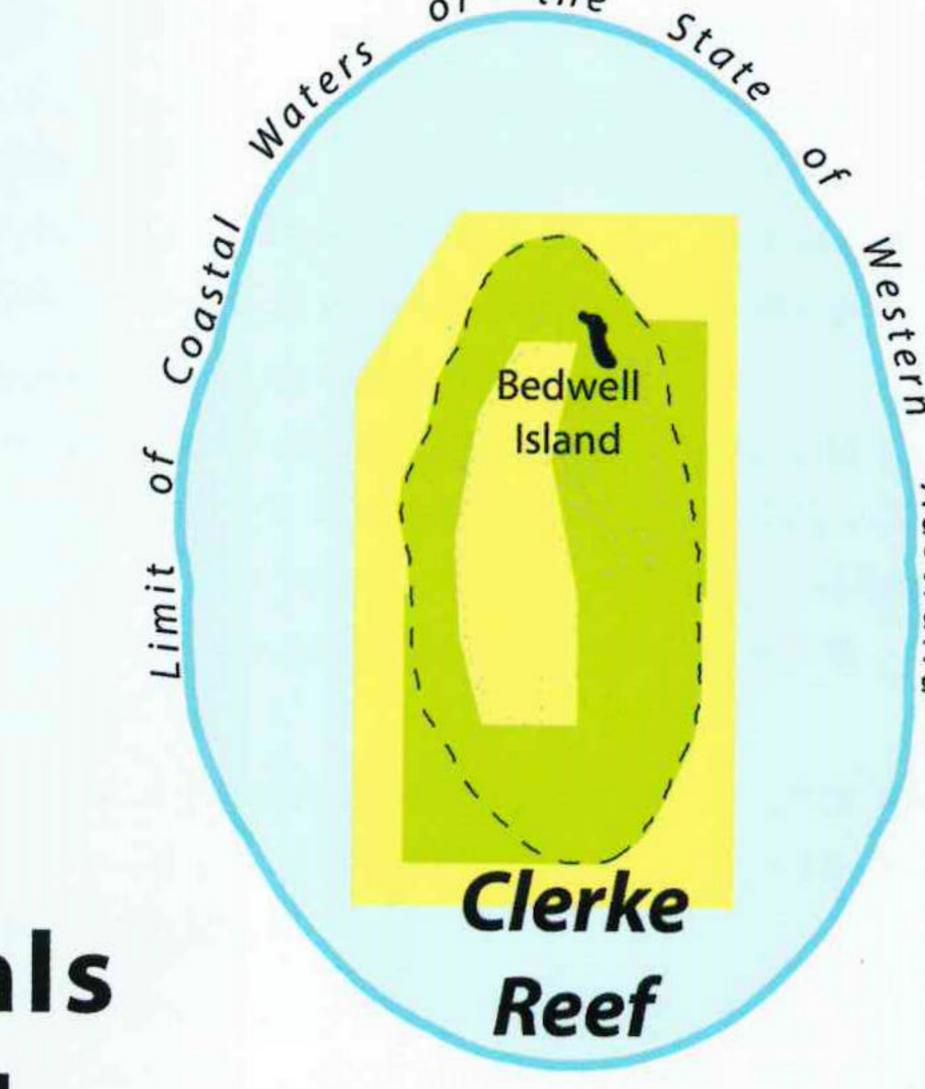

Cunningham Island on Imperieuse Reef and Bedwell Island on Clerke Reef are both Crown Reserves for the purpose of marine park. Both islands are managed by the Department of Biodiversity, Conservation and Attractions, Parks and Wildlife Service. Access is limited to daylight hours and lighting of fires is not permitted. Please take care not to disturb nesting red-tailed tropic birds on Bedwell Island by keeping a minimum distance of 10 metres.
