**Conservation
AND LAND MANAGEMENT**
Conserving the culture of WA

*N*ative to eastern Australia, koalas first arrived at Yanchep National Park near Perth, Western Australia, in 1938.

Koalas are nocturnal marsupials, sleeping most of the day in the fork of a gum tree. They feed exclusively on eucalyptus or gum leaves.

Yanchep National Park is home to many beautiful animals including the Western grey kangaroo and Carnaby's black cockatoo. Wildflowers such as Mangles' kangaroo paw and Yanchep rose can also be seen in spring.

Proceeds go to koala conservation
