

RESERVE FLORA LIST

ALPHABETIC LISTING OF SPECIES

(SVL 13/9/89)

Key:

PRIORITY CODES

- Priority One Species which are known from one or a few localities on lands under immediate threat, e.g. road verges, urban areas, active mineral leases, areas grazed by feral animals, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Two Species which are known from one or a few localities on lands not under immediate threat, e.g. nature reserves, national parks, vacant crown land, water reserves, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Three Species which are known from several localities, some of which are on lands not under immediate threat. These species are under consideration for declaration as rare flora but are in need of further survey.
- Priority Four - taxa presumed extinct
Species which have not been collected or reliably observed in the wild over the past 50 years, or whose total known wild population has been destroyed more recently.
- Priority Five - taxa for high priority monitoring
Species which are considered to have been adequately surveyed and not endangered or in need of special protection, but could be if present circumstances change. These species are usually represented on reserves.

CALM REGIONS

* = species which also occur outside Western Australia

CF	Central Forest
GAS	Gascoyne
GLD	Goldfields
GRE	Greenough
K	Kimberley
M	Metropolitan
NF	Northern Forest
P	Pilbara
SC	South Coast
SF	Southern Forest
W	Wheatbelt

SPECIES	PRIORITY CODE	CALM REGIONS	DISTRIBUTION	FLOWERING PERIOD
<i>Abutilon longilobum</i>	4	GAS	Pierre Spring, East of Carnarvon Range	-
<i>Acacia</i> aff. <i>abrupta</i> (S.D. Hopper 6405)	2	W	Chiddarcooping Hill	Jul-Oct
<i>Acacia anarthros</i>	1	NF	East of Wannamal	May-Jun
<i>Acacia auricoma</i>	3	GLD,*	Anne Range, Mannanana Range	Aug-Apr
<i>Acacia</i> aff. <i>bidentata</i> (B.R. Maslin 6122)	2	GRE	Moora, Jingemina Hill	Sep-Dec
<i>Acacia</i> aff. <i>bivenosa</i> (A.R. Chapman 596)	3	GAS	Cape Range, Rough Range, Minilya River	Jul-Aug

RESERVE SPECIES LIST

CENTRAL FOREST REGION

(SVL 13/9/89)

Key:

PRIORITY CODES

- Priority One Species which are known from one or a few localities on lands under immediate threat, e.g. road verges, urban areas, active mineral leases, areas grazed by feral animals, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Two Species which are known from one or a few localities on lands not under immediate threat, e.g. nature reserves, national parks, vacant crown land, water reserves, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Three Species which are known from several localities, some of which are on lands not under immediate threat. These species are under consideration for declaration as rare flora but are in need of further survey.
- Priority Four - taxa presumed extinct
Species which have not been collected or reliably observed in the wild over the past 50 years, or whose total known wild population has been destroyed more recently.
- Priority Five - taxa for high priority monitoring
Species which are considered to have been adequately surveyed and not endangered or in need of special protection, but could be if present circumstances change. These species are usually represented on reserves.

RESERVE SPECIES LIST

KIMBERLEY REGION

(SVL 13/9/89)

Key:

PRIORITY CODES

- Priority One Species which are known from one or a few localities on lands under immediate threat, e.g. road verges, urban areas, active mineral leases, areas grazed by feral animals, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Two Species which are known from one or a few localities on lands not under immediate threat, e.g. nature reserves, national parks, vacant crown land, water reserves, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Three Species which are known from several localities, some of which are on lands not under immediate threat. These species are under consideration for declaration as rare flora but are in need of further survey.
- Priority Four - taxa presumed extinct
Species which have not been collected or reliably observed in the wild over the past 50 years, or whose total known wild population has been destroyed more recently.
- Priority Five - taxa for high priority monitoring
Species which are considered to have been adequately surveyed and not endangered or in need of special protection, but could be if present circumstances change. These species are usually represented on reserves.

RESERVE SPECIES LIST

SOUTHERN FOREST REGION

(SVL 13/9/89)

Key:

PRIORITY CODES

- Priority One Species which are known from one or a few localities on lands under immediate threat, e.g. road verges, urban areas, active mineral leases, areas grazed by feral animals, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Two Species which are known from one or a few localities on lands not under immediate threat, e.g. nature reserves, national parks, vacant crown land, water reserves, etc. These species are under consideration for declaration as rare flora but are in need of urgent high priority further survey.
- Priority Three Species which are known from several localities, some of which are on lands not under immediate threat. These species are under consideration for declaration as rare flora but are in need of further survey.
- Priority Four - taxa presumed extinct
Species which have not been collected or reliably observed in the wild over the past 50 years, or whose total known wild population has been destroyed more recently.
- Priority Five - taxa for high priority monitoring
Species which are considered to have been adequately surveyed and not endangered or in need of special protection, but could be if present circumstances change. These species are usually represented on reserves.
