TPB Plant Quadrats

The plant quadrats consist of a two metre square sample of vegetation taken every fifty metres and in the case of ~~Tick Flat~~ before and after a vegetation change. In Tick Flat, the track was used as the mid-line and the sample lines were taken on most occassions, to the top of the ridge on either side of the valley.

In Robinson Valley however, the procedure differed in that the quadrats were taken two metres SW of each grid point as shown on the map enclosed. This was done to avoid the possibility of sampling an area which may have been affected by traffic.

The measurements taken at each plant quadrat were:

(1.) A complete as possible species list. Almost certainly not exhaustive as regards Poaceae etc and smaller plants totally enveloped in rush. Obviously it was not practical to clear the sample site to obtain 100% accuracy.

(2.) Number of plants of each species occurring within the quadrat eg Melaleuca thymoides 8 = 8 plants present.

(3.) Minimum & maximum heights of these individual species i.e the range of heights

For example: Melaleuca thymoides 8 120 — 180
(measurements taken in centimetres)

DIVISION OF WILDLIFE RESEARCH

CNR. FYFE STREET & CLAYTON ROAD, HELENA VALLEY, W.A. 6056—TELEPHONE 94 6477—TELEGRAMS CORESEARCH PERTH-TELEX 92178

(4) Ratings of rush species involving

1 = Anarthria scabra

2 = Anarthria prolifera

3 = Restio sp.? yet to be determined.

where

0 = nil presence

1 = 0 – 25% cover of quadrat

2 = 25 – 50% " " "

3 = 50 – 75% " " "

4 = 75 – 100% " " "

(5) Ground visibility

Similar rating to above

Other areas:

Pryandra sp. plot #2.

Quadrats taken prior to burning off on 8.9.76.

Four quadrats involved; the first taken next to Angus Hopkins enclosed grid and proceeding west, spacing still at 50 metre intervals.

Calamanthus area.

Quadrats taken from Pryandra sessilis covered limestone ridge just past the restricted access boom gate off the Tinker Rec. track. 12 quadrats were sampled on three parallel lines with each quadrat placed 50 metres apart as in other samples

BAT (numbered line 1 eg 4001)

Quadrats were taken 5 m N of metre pegs to adjoin traffic affected area. Samples taken from 25. 50. 100. 150. 175. 250. 350. 425. 500 metre markers

CSIRO

DIVISION OF WILDLIFE RESEARCH

CNR. FYFE STREET & CLAYTON ROAD, HELENA VALLEY, W.A. 6056—TELEPHONE 94 6477—TELEGRAMS CORESEARCH PERTH - TELEX 92178

OBAT (numbered line 2 eg 40②01)

Quadrats taken 6 metres N of metre pegs at 25. 50. 100. 150. 200. 275. 350. 450. 50 metre marks.

WWB nest site quadrats

Most of the nests are in the Tick Trust complex as per map. The nest stuff formed the centre of each quadrat. It is most probably possible to align these quadrats with those of the Tick Trust effort.
