
Sources of Information
on the
Vegetation and Flora
of
Western Australia

Flora Information Section
Western Australian Herbarium

Department of Conservation and Land Management
Box 104, Como, WA 6152

This publication was originally edited by N.S. Lander (1979), revised by K.F. Kenneally (1986) and S.J. Patrick (1991). It is intended as a guide to reference works on the vascular plants of Western Australia.

It is recommended that users who need more specialised information on the lower plants should consult the Library and Information Service of Western Australia for such publications.

Journals in which taxonomic information on the Western Australian flora is published have not been fully listed. Green (1985) should be consulted for specific references to particular genera.

As publications on the Western Australian flora are appearing at an increasing rate, this list cannot be fully up to date. More specific information should be sought from the Library and Information Service of Western Australia.
