We ask that you wear this badge proudly to spread the word about the environment and conservation and how individuals can assist by volunteering.

This badge is part of a series depicting Western Australian flora and fauna species, with a strictly limited number commissioned annually.

The badge features a numbat (*Myrmecobius fasciatus*). Numbats are under threat from habitat loss and introduced predators, with an estimated population of fewer than 1000 individuals. Several volunteer programs, including Project Numbat and *Western Shield*, help to monitor and protect these and other threatened species in Western Australia.
