One to two paragraph summary of achievements suitable for WATSNU

List of actions undertaken by Recovery Team

Progressing the completion of the Goldfields Regional Threatened Flora Management Plan.
Approach the Wilderness Society to invite a representative involved in the Great Western Woodlands project onto the Recovery Team.
Interim Recovery Plan for *Leucopogon spectabilis* finalised. Interim Recovery Plan for *Ricinocarpos brevis* still ongoing.
Have requested that environmental consultants (via Geoff Cockerton) collect material for the Goldfields Regional Herbarium.

Assessment of progress towards meeting criteria for success (from Recovery Plan)

Tetratheca paynterae subsp *paynterae* condition assessment recently completed with results available soon.
Several new populations of *Conospermum toddii* have been found. 1 new population of *Gastrolobium graniticum* was found.
Cliffs have put in applications to proceed with translocations of *Tetratheca paynterae* subsp *paynterae* and *Ricinocarpos brevis*.
