## **Bibliography for Carnaby's Black-Cockatoo (*Calyptorhynchus latirostris*)**

Compiled by Allan Burbidge

Biodiversity and Conservation Science, Department of Biodiversity, Conservation and Attractions, Locked Bag 104, Bentley 6983

allan.burbidge@dbca.wa.gov.au

Last update 28 May 2019

This list includes over 300 research, technical and popular articles relating to the biology, ecology and management of Carnaby's Black-Cockatoo. It is intended to be comprehensive in relation to research articles. It is not comprehensive in relation to popular articles, but those included are ones that provide information or interpretation not readily found elsewhere. Inclusion of such publications (of which there are a large number) is a reflection of the high profile of this iconic species and the considerable involvement of 'citizen scientists' in research in this area. The list includes theses but does not include media reports. At this stage, it does not include individual articles from BirdLife Western Australia's *Cocky Notes*.

Please report any errors, omissions or additions to Allan Burbidge (allan.burbidge@dbca.wa.gov.au).
