(18)

NO 1

(19)

A total of 8
samples from the
area were collected
the salt concentration is
too high for
any animal to be
found. Such a high
concentration is a further
proof of the
salt being 100%
used by edge of
the
area reported 1130 hrs.

1.2 miles from salt
to the old water
mark to cattle on
water tanks.

(18)

NO 1

(19)

A total of 8
 samples from Thales
 the same. Considered
 the salt concentration to
 be too high for
 any summer collection
 because such a high
 concentration. No further
 work was done.
 Last work 190 m
