1/day for 5 days

17/17/78 0900

Ref. 016³⁸ was
showing signs of
weakness which was
related to similar illness
of the 8 other birds.
General beh. of merging
bottles. sits on its
own 5-10 m from other
birds fluffs up feathers
& shivers. Movements
are coordinated but slow.
1745 Bird was given
2 teaspoons of Aurcomycin
which had been injected

(40)

into the abdomen of
a bony herring.

A further two teaspoons
were mixed with
50 ml of water
and poured down the
bird's throat (back).
The bird was held
& the herring forced
down the gullet as far
as possible. Continued
to hold the bird for
15 minutes to assist
absorption of antibiotics.

(41)

19.7.78

Tuesday 8 Dec.

00903-904

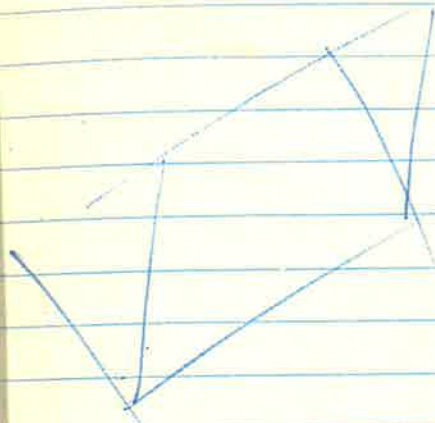

2 died during ~~feeding~~
 delivered to Murdoch
 for tests. results
 indicate identical
 symptoms - i.e. titanium
 induced muscle
 breakdown

Bird was caught
 at 0700 for force
 feeding but died
 while being held.

Showed general
 degeneration since then
 of week of arrival.

Stopped eating from
 11 hours and disgorged
 food when force fed.

(95)

Mon.

(96)

Release from Korratha
 captured by John Leahy
 at Cape Leveque looking
 ill & panted.

Put on water near
 a glass top & come
 good after several
 weeks. 6/8
 Leahy says it looking
 very ill washed up
 on tank so picked
 it up & took it
 home. Bird died
 soon frozen. Fat air
 transported to Perth.

P.H.E.

0000000005
 5550455555555555
 5555555

Drive to Joazeiro on to
 Mundach. Spoke to Dave Rose
 on symptoms of birds shells
 are indicative of Vit & Sel.
 deficiency. However this is
 extremely difficult to prove
 as the birds are fed on a
 solid fish oil diet which
 is high in Vit & Sel.
 They develop a greater need
 for Vit & Sel. This continues
 until such a time as
 the bird either receives a

(98)

relatively low vit. E diet
and develops lesions of
the heart brain & muscle
tissue subsequently dying
or the intake of vit. E is
continued thus perpetuating
the problem.

The situation can
be alleviated to a large
extent by feeding a
balanced diet to the
birds. This means
the intake of a
vit. E build up.

This can be done in
the form of octopus
shrimp prawns green
food & a variety of
fish.

(99)

The problem involving
Pelicans dying in the NW
is

Have on to J. Goodale
at Safety Bay & back to
WRC. 120 miles.
