Boat Harbour Lake 2

Swam 2

P.E.S. 60

Sest 15

S.E.P. 2

Sest 3

Long shallow lake appears to dry
Notonectid & Corixid

Line fill

Large area of Baumea to west
which appears to flood. At least
w/level is v. low if any.Looks like good Bottom (Bott)
country.Large areas of Typha adjoin.
Flooded to about 0.3 m free water
Deep mud makes passage hard

(31)

Extending East along shore line is
narrow fringe of Juncus 2 sp.
regardis to near Kraussii at
front. at NW M. & beyond.Dense thicket above to VHW M.
midway along shore is bed of
J. articulata flooded at front.
but v. shallow in sedge bed.No fish in any of trunks or
poison sites.Numerous Ostracods v. comm.
- abundant.

Odonata large & Damselfly

Some Chironomids

Numerous amphipods in sediment
not far SW in min.Notonectids & Corixids - former
common in water column - only

(32)

Invertebrate visible in typha &
in chan.

Corixids in Baumea, and around
dringo

~~to~~ very little found in bays
& reg'n

(33)

Boat Harbour #1

Walked into lake from 2
approaching by horse trail at East
end. Trail extends around east & Sth
side of #2.

Continues to meet road 2.5 km
from camp site & 2.1 from B
turn off.

Numerous mussels (dead) on beach.
Live ones in sandy substrate.

Poisoned fish in Baumea.

20-30 fish - Red &

Trepled 100 in 2 traps - same.
No insects taken.

Small pop'n	YBSDL	See I
