⑥

Share a similar origin
processes along coast in
recent geologic past

Sea level change.
glaciation

Last 20 000 years of estuary
drop sea level by 130 m
expose land

lower level of rivers
increase erosion

significant for WA
erosion produces clastic
sediments

Sea level rose after 18 000 yrs
to 5000 yrs ago when it
was 2.5 m higher than today

(7)

3

11/10
Worked over Coastal plain
gave rise to dune system
in part

beach. They go over dunes
like them

sediment washed to shoreline
wind carries & produces
a dune line

Prevailing SW wind
continually pushing sand
along beach to form new dunes.

Problem - little rain
Conflict
was clearing channels
↓
coastal process

Influence of tides (8)
+ low systems

39% of water body gets
exchanged from Henry Est

Burna Rd
Avalon

See this at Lake Preston
Not Normal lakes on
world maps.

Suppose Selin
have holochines

Drawing from Honey Est
+ Peel Inlet
Coastal Sedimentation +
alluvial activity

We are trying to
maintain a system in
the wrong way.

Have to change the cut
for ever more.
