

**‘HARDY INLET 1974 – PELICAN POINT 1974-1980 –  
WADER BANDING – GRANT PEARSON, JIM LANE’**

**RESEARCH MATERIALS CONSOLIDATION REPORT**

**JAK Lane  
WA Department of Parks and Wildlife**

**August 2014**

This particular **Research Materials Consolidation Report** is nothing more than a PDF of some hardcopy wader (shorebird) research materials of JAK Lane in 'as found' (on 11/08/2014) order.

In this case, the original (i.e. 'as found') materials are two bundles of moult cards and a bundle of field data recording sheets that were mistakenly lodged in the WA Dept. of Environment & Conservation Library at about the time that Grant Pearson retired from this department. They were later sent to Jim Lane for storage with other, related materials.

The contents of this RMCR are arranged exactly as found.

Note that these are not necessarily all the materials of this type. Other RMCRs have similar, overlapping or related materials.

#### **MISCELLANEOUS NOTES ABOUT THE CONTENT OF THIS RMCR**

- There are several pages of hand-written notes with these bundles (all reproduced at the start of this RMCR).
  - The moult cards are not in chronological order.
  - One bunch of moult cards are dated 1979/80 and are of several wader (shorebird) species at several locations including Pelican Point (Swan River) and Thomsons Lake.
  - The other bunch of moult cards are dated late 1979 and are of several wader (shorebird) species at several locations including Pelican Point (Swan River) and 'Forrestdale' (presumably Forrestdale Lake).
  - The field data recording sheets are from Oct 1974 to Apr 1980 and appear to be in chronological order. Locations include Pelican Point & Point Waylen (Swan River), Thomsons Lake and Forrestdale Lake.
  - Most of the data is measurements, etc., of a variety of migratory and resident waders (shorebirds).
-

GRANT

I have not yet submitted to

CSERO Carbon the Pending Schedules

for 1979/80 also we

have the data to hand?

If so could I have it please.

JAG
