

2005 PVS WORKSHOP OUTCOMES ISSUES FOR FURTHER DISCUSSION

1. Indigenous issues The need for an Indigenous Tourism Conference? – CALM Indigenous consultation – resources issues / expectations raised
2. Illegal off-road vehicle use and extreme sports Need to have designated staff to be the “lead” person Kiteboarding, windsurfing – need to focus
3. More on marine recreation management
4. Regulation Designated areas for dogs / horses / camping
5. Visitor Risk Management VRM on Leases VRM – tree surgery works (Common use contract for this has been worked out with Housing and Work)
6. Camping and Caravanning Direction on future for campgrounds – open fires or not. There is inconsistency but there are different circumstances in different places. People value the campfire experience, but won't happen everywhere. Policy is flexible enough to allow discretion. Shouldn't be acceptable if there is.... Review of Caravan Parks & Camping Ground Regs will put pressure on CALM caravan parks / pressure to open up more facilities on CALM land Types of vehicles coming into our camping areas – large campervans etc Camping booking system Communication strategies re campfires
7. Coordination of Recreation Integration / coordination of recreation activity between policy / legislative and on-ground management. Tracks & Trails level is good on coordination Need for an activity management coordination
8. Commercial operations Merchandising – need to expand where there are opportunities. Do we expand our merchandising expertise or bring in professionals? Design of facilities needs to take into account merchandising opportunities. Merchandising business plans are getting good results (in house) Annual feedback required from commercial operators on what parks they've visited, numbers of passengers etc. could this be made a licence condition? Revenue – there has been a decline in revenue – there needs to be a refocus on this issue Accreditation - of CALM “icon” sites. Inconsistency with the tourism businesses we (CALM) run as opposed to our licensed operators and the accreditation required of this
9. Conservation employees – opportunities for PVS issues / projects
10. Coordination between SDCA Div and PVS on communication / management issues
11. People – key issue for ORV and Technique consumer forum local area planning
12. Integrated planning – where to from here?
