ROBE WATTLE

Acacia robeorum

The species name acknowledges Robe River Iron Associates who provided generous financial support to the study of Pilbara wattles through the West Angelas Coondawanna West Environmental Offsets Agreement. This support enabled Bruce Maslin & Stephen van Leeuwen from DEC's Science Division to undertake a five year study of the Pilbara *Acacia* flora which has resulted not only in a *Nuytsia* paper describing 10 new species but also a *Pilbara Wattle Bush Book* and a soon to be published book and electronic identification aid to wattles in the Pilbara.
