## A great range of publications all about Western Australia

### Exploring Western Australia's natural wonders

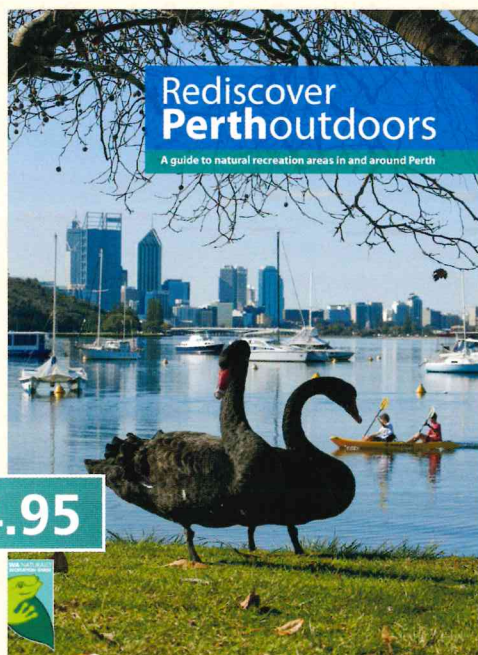

This region-by-region guide provides information about each park's history, natural attractions and how to explore the park. There is also information on the range of activities available to visitors to our parks such as bushwalking, camping and mountain biking as well as stunning photographs throughout.

*Exploring Western Australia's natural wonders* takes you on a journey of discovery into our state's parks – from those on the doorsteps of Perth to those among the world's most remote in the far north.

**\$39.95**

### Rediscover Perth outdoors

Perth has so many beautiful natural places. Let us help you rediscover them with this exciting new publication. Whether you prefer the stunning coastline or the forested Perth hills, or want to explore the inner-city reserves or the many walk and cycle trails the city and its surrounds have on offer, this is the book for you and your family.

### Guide to the Great Western Woodlands

This new DEC book is a comprehensive guide to this large chunk of WA's heartland. Covering some 16 million hectares, the region has many delightful places to visit, secluded camping areas and historic attractions. The second section of the guide includes information and photographs of trees, wildflowers, mammals, reptiles and birds. An essential travelling companion.

Bush Books >

# All about our WA bush!

A collection of handy pocket-sized books on the plants, animals and geology of Western Australia

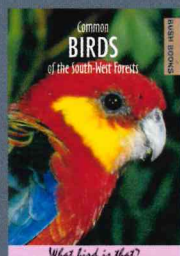

To view the complete range of Bush Books visit our online shop. There are more than 30 titles to choose from! All Bush Books include colour photos and information on distribution, habitat and life history.

**All \$6.95 each**

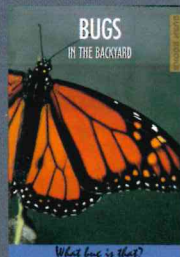

## Australian Birds of Prey

Birds of prey, or raptors, have long captured our imagination. These handsome creatures have a unique place in our culture and mythology. There are 24 species of raptor in Australia and all are found in WA.

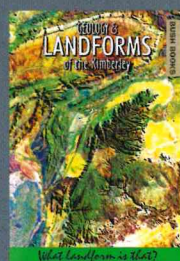

## Common Birds of the South-West forests

This Bush Book is sought after by bushwalkers and other visitors to WA's national parks. Forest birds are exceptionally diverse, ranging from the emu, to the wedge-tailed eagle, to little robins.

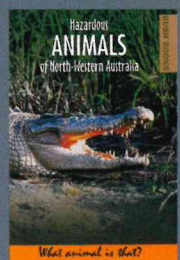

## Bugs in the Backyard

This book describes some of the invertebrates found in gardens, homes and other buildings. A great book for children keen to learn about the spiders, butterflies, ants, cicadas and other small creatures they find in the backyard and even in the house!

## Geology and Landforms of the Kimberley

Written by geologist Ian Tyler from the Geological Survey of WA, this book is the first of its kind that presents technically accurate geological information that is easy to understand.

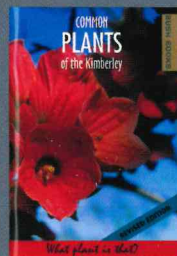

## Hazardous Animals of North-Western Australia

This book features colour photographs, descriptions, fascinating life histories, sensible precautions and recommended treatment for more than 27 dangerous animals found from Shark Bay to Wyndham.

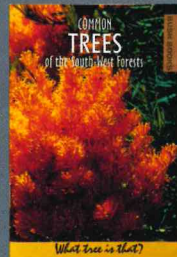

## Mammals of the South-West

*Mammals of the South-West* is packed with appealing colour photographs and delightful descriptions of each species including quenda, dibbler, echidna and more.

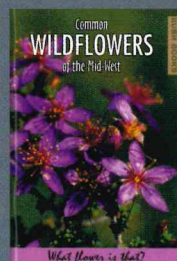

## Common Plants of the Kimberley

WA's Kimberley region supports a diverse and spectacular flora of more than 2,000 species. Find out about the most common in this useful mini field guide.

## Common Trees of the South-West Forests

*Common Trees of the South-West Forests* is an ideal companion for bushwalkers who have always wondered how to identify the native trees of south-western Australia.

## Common Wildflowers of the Mid-West

This book covers some of the most common wildflowers that you will see when travelling through the Mid-West—one of the most diverse wildflower areas in the world.

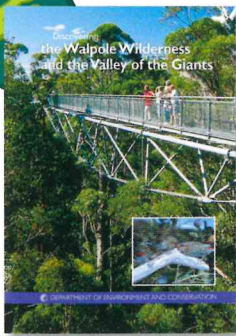

## Frogs of Western Australia

*Frogs of Western Australia* describes a selection of frogs that live in the metropolitan area, are likely to be seen elsewhere, or are of special interest due to their habits or rarity.

Find even more titles at [www.dec.wa.gov.au/shop](http://www.dec.wa.gov.au/shop)

## Discovery Books >

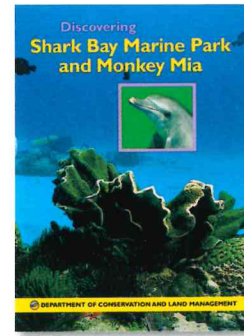

**Discovering the Walpole Wilderness and the Valley of the Giants**

**Discovering Caves of Western Australia**

**Discovering karri forests of Western Australia**

## Children's books >

These beautiful and informative books are suitable for a wide range of ages, and are written by WA authors focusing on WA plants and animals. All books are stunningly illustrated by recognised artists.

### Jeemuluk

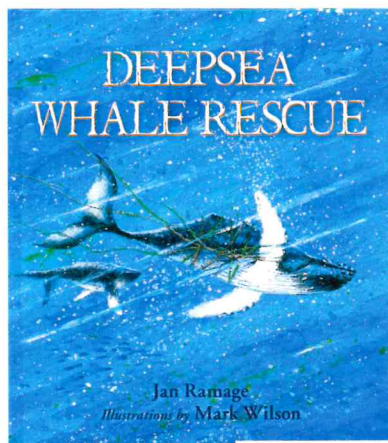

Soft cover version **\$9.95**

#### Jeemuluk

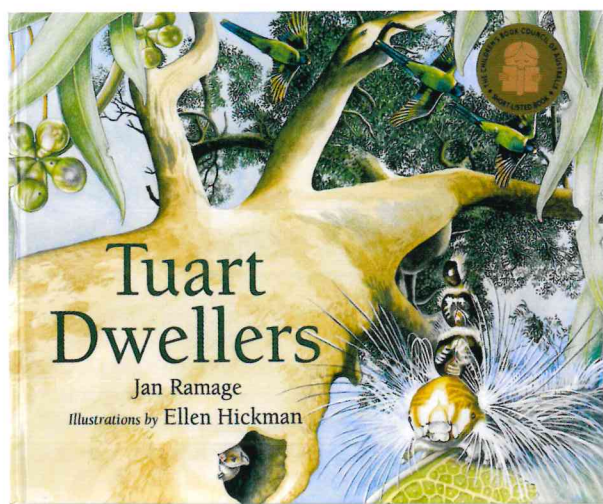

Jeemuluk is the Aboriginal name for the noisy scrub-bird, a shy yet curious bird with a very loud song. This story tells the tale of Jeemuluk's journey through the moist gullies and thick scrub of Two People's Bay Nature Reserve.

**\$26.95**

#### Deepsea Whale Rescue

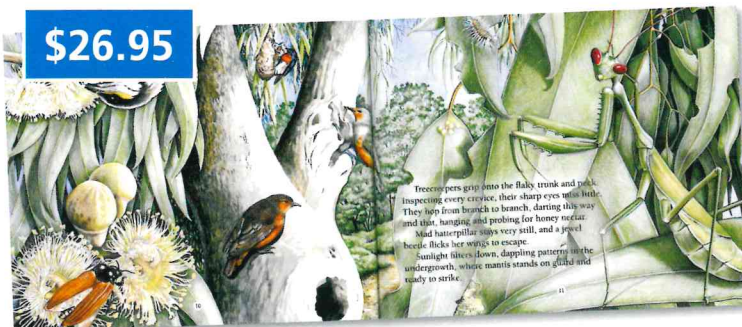

Based on a true account, *Deepsea Whale Rescue* recounts the high drama of a mother whale defending her calf from attack by orcas, before having to be disentangled from fishing ropes by professional wildlife rescuers.

#### Tuart Dwellers

This beautifully illustrated picture book is about life in a tuart forest. Short-listed in the 2009 Children's Book of the Year Awards and winner of the Wilderness Society of Australia's Environmental Children's Book Award.

**\$26.95**

## LANDSCOPE magazine >

Also available
