Aboriginal people were and remain central to Shark Bay's industries. A pastoral industry was established by the 1880s and pastoralists growing local pears. The industries that established in Shark Bay increased maritime traffic. The Wulyibidi Yaniyina trail passes the grave of a three-year-old girl who became ill and died on the supply vessel, *Mola*.

Shark Bay is the work platform of a pear farm. Shark Bay wadra are now commercially cultivated and the floating structure in Red Cliff Bay is the work platform of a pear farm.

Warda (pears) and wilyara (pearshells) were both valuable resources

located in Red Cliff Bay, just north of Monkey Mia.

Peeling followed in the 1860s and a large peeling camp was

set up to remove it from islands around the

Shark Bay guano was prized as a high quality fertiliser and it did

begin in the 1850s with the mining of guano from seabird colonies.

Dirk Hartog made the first recorded European landing in Shark Bay on

25 October 1616. However, European occupation of the region only

began in the 1880s with the mining of guano from seabird colonies.

Shark Bay is home to the people of the Malgana language group. The Malgana people have lived on the rich marine resources of

Gathagudu for millennia. Evidence of past Malgana seafaring

feasts have been found in middens near Monkey Mia along with

other artefacts that indicate the Malgana traditionally used rafts

and canoes to travel and hunt.

Malgana people continue to fish Shark Bay's waters, including as

commercial fishers.

## Significant ecosystems

Seagrasses flourish in these shallow, sheltered waters with

abundant light, and the bay is home to 12 of the 60 seagrass

species found worldwide. The seagrass meadows here are the

largest in the world and support more than 10,000 dugongs,

large cetaceans, red-capped boobies and other wading birds. Some

dotterels, red-capped pigeons, plovers and other wading birds. Some

## Look after yourself at Monkey Mia

- Protect yourself from the sun.
- Ensure you drink enough water to avoid dehydration, particularly along the walk trail.
- Always swim, dive or snorkel with at least one other person.
- When in the water be aware of boats.
- When in the water be aware of potentially dangerous marine life, including sharks.
- Be aware of stonefish and stingrays when wading in the water (wear reef sandals).
- Leave the water if a dolphin seems stressed – signs include tail slapping, head jerks, loud popping noises and open mouth with bared teeth.
- For your safety, leave the water if dolphins are fishing in the shallows.
- Do not approach or feed pelicans, emus or other wildlife. Dolphins are fed under strict supervision of Parks and Wildlife officers.

## Become a volunteer

Ask a Parks and Wildlife officer how you can join the volunteering team at Monkey Mia.

## Visitor fees

Visitor fees apply to all people visiting Monkey Mia, including resort guests. Fees pay for the costs of managing the dolphin experience and maintaining facilities. Park passes do not apply to Monkey Mia Conservation Park.

PEOPLE

RECYCLE Please return unwanted brochures to distribution points.

### Please help look after the dolphins

With so many people visiting the bay to see the dolphins there is a risk to their health and natural habits. At Monkey Mia we appreciate your help looking after the dolphins.

- Please follow the instructions given by Parks and Wildlife officers and volunteers.
- Quietly leave the water when there is a new calf close to shore.
- Only feed dolphins when invited to do so by Parks and Wildlife officers and their volunteer assistants.
- Help maintain the wild dolphins' health and friendly nature by not touching them.
- Children should be supervised by adults at all times.

- If a dolphin approaches you in the water, watch it and remain still; do not pursue the dolphin.
- Do not try to attract dolphin attention by splashing the water – your fingers may look like a fish.
- If you are in the water, try to keep at least 30m away from any dolphins – swimming with dolphins can result in mothers and calves being separated.
- Do not wear sunscreen in the water at the dolphin experience area, as lotions and creams can irritate dolphin skin and eyes.
- Pets are not allowed in the dolphin experience area and must be on leads when in the reserve.
- If a dolphin approaches you while fishing, please remove your fishing line from the water.

### Things to do at Monkey Mia

#### Swim and snorkel

Monkey Mia provides a wonderful opportunity to snorkel over the seagrass beds that support much of Shark Bay's marine life.

#### Boating and kayaking

Boating and kayaking are great ways to enjoy the waters around Monkey Mia. When out on the water you may see dolphins, dugongs, stingrays, turtles and other marine animals. During whale migration times in spring and autumn there are many humpback whales in the bay that are sometimes seen from the shore.

#### Camping and accommodation

The adjacent Monkey Mia Resort offers a variety of accommodation, including camp sites. Camping is not permitted within the Monkey Mia Conservation Park, reserve and car park. Entry fees still apply.

#### Tours

A number of tours operate from Monkey Mia. More information is available from the Parks and Wildlife tour booking office.

#### Display Centre

Discover what makes Monkey Mia and Shark Bay a World Heritage area, and find out more about dolphins and other marine life.

#### Theatre

Watch nature documentaries about Shark Bay in air-conditioned comfort.

#### Picnicking

Enjoy a picnic on the beach, lawn or one of the picnic tables.

#### Bird watching

Look for thick-billed grass-wrens, babblers, emus and many other birds around Monkey Mia.

#### School holiday activities

The Wonderfully Wild school holiday program runs during most school holidays. Ask for a timetable at the Monkey Mia Booking Office.

A beach wheelchair is available. Ask a Parks and Wildlife officer if you would like to use it.

#### **Wulyibidi Yaninyina Trail** 4km loop, allow 1.5 hours

Explore some of Shark Bay's World Heritage values, local history and Malgana Aboriginal culture along the Wulyibidi Yaninyina walk trail.

Wulyibidi Yaninyina is Malgana for 'walking Peron' and is an easy walk around this part of the Peron Peninsula. It starts at the large shelter along the entry road. Early morning and late afternoon are the best times to see birds.
