Take care by the sea

Strong gusts of air and water may suddenly erupt from blowholes and the rocks around them may be slippery.

- When near the water or at cliffs, watch the water for large unexpected waves.
- Please keep well clear of cliff edges and blowholes.
- Be prepared for sudden wind gusts.
- Supervise children at all times.

SHARK BAY
world heritage

RECYCLE Please return unwanted brochures to distribution points.

The proposed Edel Land National Park extends from Steep Point to just south of False Entrance and encompasses much of Belefin Prong. Its contrasting coastlines of tall rugged cliffs and crescent-shaped beaches form the western boundary of Shark Bay.

World Heritage

Rising 200m above the Indian Ocean on the western side of Shark Bay are outstanding features of exceptional natural beauty, the Zuytdorp Cliffs.

Backed by sweeping white sand dunes and secluded beaches, this dry and windswept limestone coast hosts resilient plant and animal life. Set against waters teeming with marine life, the beauty of this coastline is of World Heritage value.

While also visited by sightseers and those seeking the most westerly part of the Australian mainland, fishers are the most avid visitors to Steep Point.

Fishing

With more than 320 species of fish, the marine life in South Passage is the most diverse in the Shark Bay Marine Park. Steep Point is renowned for having some of the best land-based fishing in Australia with mackerel, trevally and sailfish caught there, especially during summer.

Serious fishers float baits offshore with helium balloons and haul their catches up cliffs using special gaffs, although it is not unusual for sharks to take fish before they are landed.

Aboriginal occupation

Shark Bay is the traditional country of three Aboriginal language groups: the Malgana, Nhanda and Yingkarta.

The area south of Henri Freycinet Harbour was occupied by Nhanda speakers while the central part of Shark Bay, including Edel Land, was occupied by Malgana speakers. The Malgana name for Shark Bay is Gutharraguda, meaning 'two bays'.

Edel Land was an important place for Aboriginal people. A quarry at Crayfish Bay provided stone for spear tips and tools, and there was fresh water at Willyah Mia, on the eastern shore of Heirisson Prong. The number of middens and camp sites indicate there was plenty of good food.

Recent history

In 1616 Dirk Hartog made the first recorded landing by a European in Western Australia. He was followed in 1697 by Willem de Vlamingh. In 1699 William Dampier studied this area during his New Holland coast exploration. In 1772 St Alouarn claimed the western half of New Holland for France, but he died in Mauritius without reaching France and having his claim confirmed.

Voyages of scientific discovery were conducted by Nicolas Baudin in 1801–03 and Louis de Freycinet in 1818. Henry Mangles Denham surveyed the area in 1858, producing charts that were used into the 1960s.

Settlement followed these voyages of discovery. Guano was stripped from Shark Bay's islands around 1850. Pearling started about the same time and continued into the 1930s when the shells were depleted through overfishing.

Sheep were introduced in the 1860s and the pastoral industry has been through good times and droughts since then. Some pastoral stations have become conservation areas in recent years.

Sandalwood was cut from the 1890s until 2000, but fishing was the area's economic mainstay from the early 20th century.

In the 21st century pearling is making a comeback through pearl farming, fishing continues and tourism has become increasingly important.

Shipwrecks

The Zuytdorp Cliffs were named after the Dutch ship, the Zuytdorp, wrecked against the cliffs south of Shark Bay in 1712.

From 1712 to 1963 a number of ships were wrecked around Shark Bay, including the fishing vessel Nor 6, which smashed into the cliffs south of Steep Point in 1963.

Access

Steep Point can only be accessed by high clearance four-wheel-drive vehicles or by boat.

It is about 185km by road from the Northwest Coastal Highway to Steep Point, including 140km of unsealed road. The last 30km is a single lane of soft track winding around sand dunes.

The journey to Shelter Bay from Denham by boat is about 50km via the South Passage.

Camping and facilities

There are camp sites at Shelter Bay, The Oven (Steep Point) and False Entrance. Permits are required and camp sites are popular so book well in advance. For details see www.sharkbay.org, email steepointranger@dbca.com.au or phone (08) 9948 3993. Camping fees apply.

Facilities are basic with some drop toilets. Make sure you have enough food, water and fuel as there is nowhere to purchase supplies in the Edel Land area.

Things to see and do

South Passage and Shelter Bay

Camp sites at Shelter Bay offer idyllic beach camping and views of Dirk Hartog Island. The most popular time to visit is from April to October when winds are lighter and the sea calmer. Make sure you book camp sites for these months well in advance.

Steep Point

When anchored off the southern tip of Dirk Hartog Island in 1697, the Dutch seafarer Willem de Vlamingh named this point *Steyle Hock*, translated as Steep Point.

Today many people come to this most westerly point as part of a pilgrimage to visit all of the extreme cardinal points on the Australian mainland. Close by, The Oven and The Faultline are popular fishing spots.

South Passage from Shelter Bay. Photo – DBCA

Between Steep Point and Thunder Bay

The four-wheel-drive track between Steep Point and Thunder Bay follows the Zuytdorp Cliffs and offers a series of spectacular views with a few special stops.

- The Nor 6 is a monument to the fishing vessel that was wrecked on the rocks below.
- Enjoy a 360-degree view of the peninsula from the lookout.
- Stop and listen to the Thunder Bay blowholes as they breathe deeply during a light swell. Be careful around these large holes and stay well back during heavy seas when water shoots through them 20m into the air.

False Entrance

This break in the Zuytdorp Cliffs was named False Entrance because many early mariners mistook it for the South Passage, the entrance to Shark Bay between Dirk Hartog Island and Steep Point.

Today visitors come here to fish, enjoy a walk along the beach and to see the nearby blowholes.

Drive carefully

- The access road is long and rough (140km of unsealed track – about three hours driving). Be prepared.
- Only high clearance four-wheel-drive vehicles are able to traverse the last 30km of sandy tracks.
- Unlicensed off-road vehicles (quads, motorbikes) are not permitted.
- Ensure your vehicle is in sound condition and has all of the recommended safety equipment.
- Normal road traffic rules apply.
- Seatbelts must be worn and riding in the back of utilities is prohibited.
- Drive at a safe speed suitable to the conditions.
- Reduce tyre pressure to at least 20psi (trailers included) to negotiate the soft sand tracks. The pressure will vary according to vehicle type and load as well as type of tyre and rim.
- Remember to inflate tyres when you are back on the Useless Loop Road.
- Drive only on existing vehicle tracks and keep four-wheel drive engaged to minimise track damage.
- Entry to the Useless Loop townsite and surrounding area is not permitted.

Reduce tyre pressure on the soft sandy four-wheel-drive tracks.

Enjoy your visit. Look after the park and yourself

- Edel Land is remote and potentially dangerous – your safety is your responsibility.
- There are no water, food, fuel or vehicle services in the area.
- Camp sites must be booked prior to arrival.
- Visitors must register on arrival and display an entry permit on vehicle dashboard.
- Open fires are not permitted. Please use portable gas cookers.
- Do not empty chemicals into toilets as chemicals destroy composting micro-organisms.
- Where there are no toilets, bury human waste at least 100m from public areas and the water.
- During summer, heat is a potential safety hazard – make sure you take enough water.
- Be aware of uneven and sharp rock surfaces when walking.
- Firearms, weapons and fireworks are not permitted.
- No pets allowed.
- All native wildlife is protected. Leave plants, animals, rocks and shells as you find them.
- Fish bag limits and size restrictions apply. Please check and abide by the Department of Primary Industries and Regional Development regulations www.dpir.wa.gov.au.
- Sandy Point Sanctuary Zone and Surf Point Sanctuary Zone are marine refuges in Shark Bay Marine Park. See the Shark Bay Marine Reserves brochure or go to www.sharkbay.org for more information.
- Fishing is not permitted and nothing may be removed from marine sanctuary zones.
- Stow rubbish away from wildlife and prevent it from being blown away.
