Staying safe and protecting Nature's Window

Everyone wants a photo through Nature's Window in Kalbarri National Park. It's great to share images of people sitting in front of the window like this. What you can't see is fragile rock and the steep drop on the other side.

Despite the clear safety sign, some visitors still put themselves at risk by climbing on, or into, the window and having photos taken.

There is also the potential for bits of rock to break off and damage the window.

You can help prevent risky behaviour and damage to this popular but fragile attraction.

- **Please do not climb on top of, or into, Nature's Window.**
- **Please do not share or retweet photos of people on top of or climbing into Nature's Window.**

CLIFF AND ROCK FALL RISK AREA

Nature's Window is fragile and potentially unstable.

For your safety:

- ❖ Do not climb on top of Nature's Window.
- ❖ Do not sit directly beneath Nature's Window.
