# Rare flora of the Mullewa area

These rare species are found in very small numbers at only a few locations.  
They are threatened by land clearing, drought, weed invasion and grazing.

## Net-veined gyrostemon (*Gyrostemon reticulatus*)

**Habitat** Dense shrubland in disturbed areas  
**Description** A shrub to one metre tall  
**Flowering time** August to December

## Kalbarri spider orchid (*Caladenia wanosa*)

**Habitat** Sandstone outcrops, the top edges of gorges and open woodland  
**Description** An orchid three to eight centimetres tall  
**Flowering time** August to September

## Irwin's conostylis (*Conostylis dielsii* subsp. *teres*)

**Habitat** Heath, scrub and low open woodland  
**Description** A herb 13 to 33 centimetres tall  
**Flowering time** July to August

## Thick-margined leucopogon (*Leucopogon marginatus*)

**Habitat** Shrubland and heath  
**Description** A shrub 0.4 to one metre tall  
**Flowering time** July to August

## Varnish bush (*Eremophila viscida*)

**Habitat** Open woodland and scrub  
**Description** A shrub 1.2 to four metres tall  
**Flowering time** September to November

## Beard's mallee (*Eucalyptus beardiana*)

**Habitat** Sand dunes and ridges  
**Description** A mallee tree three to five metres tall  
**Flowering time** August to September
