HAVE YOU SEEN THIS FLOWER?

Orthrosanthus muelleri
South Stirling Morning Iris

YES I HAVE SEEN THIS FLOWER AND WOULD BE PLEASED
TO HELP WITH INFORMATION ON ITS DISTRIBUTION.

NAME

ADDRESS

PHONE

This iris is a short tufted perennial herb with flowering stems 20 to 30 cm tall.
The slender leaves are shorter than the flowering stem with white hairs along the margins.
The purply blue flowers have 6 petals and are present for a short period in October.
The fruit is a 3-celled capsule that splits when ripe, releasing seeds.

CALM is working with the community to conserve the South Stirling Morning Iris
on private property and public owned land, including road reserves.
CALM can help private property owners to look after this species,
if it occurs on their property.

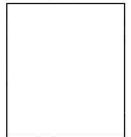

We are interested in finding out the distribution of this plant in your area.
If you have seen this flower, we would like to hear from you.
You can help by returning the detachable form below.

If you would like more information please contact
Ellen Hickman at CALM Phone: (08) 9842 4521 - Fax: (08) 9841 3329
or Community Representative **Sue Osborne** on (08) 9828 9026.

Your help in conserving our rare flora would be really appreciated.
