Often seen at Hawks Head lookout, this rare black-flanked rock-wallaby is bouncing back from the brink with careful park management.

The many and varied features of the 186,000ha Kalbarri National Park provide visitors with an array of things to see and do. You can marvel at spectacular river gorges and sea cliffs, admire the unique beauty of the peak springtime wildflowers and learn how the park protects rare native animals.

River gorge

The spectacular scenery of the Murchison River gorge is the result of many millions of years of geological activity. Hidden beneath the vast sandplain lies the ancient Tumblagooda Sandstone that formed 400 million years ago. The river has worn away this sandstone over millions of years, and carved out a stunning 80km gorge, to reveal the magnificent 'layer cake' of red and white bands that make up this sandstone. Ancient fossils can be seen in these exposed layers throughout the park, making it one of the most accessible places in the world to see tracks of some of the earliest animals to walk on land.

Skywalk (kaju yatka)

Located 37km from town, the Kalbarri Skywalk offers breathtaking views of the Murchison River gorge and its spectacular surrounding landscape. Float on air as you take a thrilling walk out along two cantilevered viewing platforms that hang in mid-air 100m above the gorge. Take some top holiday photos and enjoy refreshments from the environmentally friendly kiosk. Discover how the gorge formed millions of years ago and learn about the local Nanda Aboriginal people. See how many Australian native animal sculptures you can find and maybe discover a fossil or two at this world class tourism attraction.

Caring for country

The Nanda Aboriginal people are the traditional owners of Kalbarri National Park. They welcome visitors who respect the park's cultural and natural heritage.

From the coastal cliffs you can see a bewildering array of limestone capped, sandstone formations created by the tireless process of erosion by wind and water. Experience these sensational panoramas at a variety of lookouts just a short, easy stroll from the carpark at Red Bluff, Eagle Gorge, Grandstand, Island Rock, Pot Alley and Natural Bridge. The colourful coastal vistas are particularly breathtaking on sunset. Enjoy the coastal views as you amble along the boardwalk between Natural Bridge and Island Rock. Learn about the fascinating fossils to be found along the walk between Mushroom Rock and Rainbow Valley or enjoy the serenity of a secluded beach at Pot Alley.

Coastal cliffs

Caring for the park

- Stay cool. Don't light fires.** Visitors may use their own gas appliances anywhere in the park.
- Be clean.** Please take your rubbish with you, when you leave the park. Discarded scraps attract feral pigs and goats, which destroy the habitat of native animals.
- Pets are not allowed** in Kalbarri National Park. They can disturb wildlife and are also at risk of poisoning from fox baits, which are laid throughout the park as part of **Western Shield** wildlife recovery program.
- Visitor fees** help protect the park and maintain its facilities. Day passes and five-day passes can be purchased at park entry stations and the Kalbarri Visitor Centre. Two-week, four-week and annual passes are available at Parks and Wildlife Service offices, park entry stations and online at shop.dbca.wa.gov.au

Download the free Emergency+ app before your visit. Use the app in an emergency to call for assistance. If there is no mobile phone coverage you will NOT be able to call 000 but the app will provide you with your GPS location.

emergencyplus.com.au

Toilets, lookouts, walk trails and picnic facilities are provided in the park. Bring adequate drinking water as none is available in the park and mobile phone reception can be variable. Although no camping is permitted, a range of accommodation is available in Kalbarri. See the Kalbarri Visitor Centre for more information and bookings.

Services and facilities

Located 590km north of Perth, the park is easily accessible and all roads are sealed. Situated at the mouth of the Murchison River, Kalbarri makes the perfect base for your visit. Spectacular wildflowers can be found all year, but for the best wildflower experience, plan your visit between August and October. Although Kalbarri winters are mild with temperatures ranging between 10°C to 20°C, summers can be hot, dry and windy. Be aware that when conditions are hot in Kalbarri town, temperatures can be much more extreme in the park, reaching up to 50°C. The cooler months are the most comfortable for exploring the park. In the warmer months, plan to visit the park early morning or late afternoon. Hiking in the river gorge is not recommended over the hotter months of November to March inclusive. During this period, the Loop Trail is closed from 7am and overnight hikes are not permitted.

Planning your visit

Comfort and safety

Easy access is provided to many stunning lookouts but beyond that, walkers need to be prepared and very aware of the natural hazards and their safety.

Heat stress can kill.

- Summer heat can be extreme, particularly on the Loop Trail. Do not hike in hot weather.
- Carry and drink one litre per person, per hour when hiking and more in hotter weather.
- Wear a hat and loose, long-sleeved clothing.
- Walk in the cooler times of day.
- Hike the longer walks in the cooler months (April to October).
- Begin to hike the Loop Trail before 7am (November to March).

1 litre per person, per hour

Drinking water is not available in the park so always carry your own supply.

Wave risk. Massive wave surges have claimed lives. Keep well clear of the water's edge near coastal cliffs.

Cliff risk. The edges of the cliffs and gorges are unstable and undercut. Stay clear of cliff edges and overhangs. Keep to the paths, lookouts and trails. Wear sturdy footwear.

Remotely piloted aircraft. Drone use should not create a danger or nuisance to visitors or disturb wildlife. Do not fly drones above people. CASA regulations apply - casa.gov.au

Rafting and canoeing

Canoeing the Murchison River after heavy rains is extremely hazardous. Contact park rangers for further advice.

Walk trails of Kalbarri National Park

1 Malleefowl Trail

Distance: 1.5km loop
Allow: 1 hour

Begins 100m along the walking path to the lookout at Meanarra Hill.

2 Red Bluff to Beach Trail

(Gaba Gaba Yina)
Distance: 700m one-way
Allow: 20 minutes

Steep in places with loose surfaces.

3 Mushroom Rock Trail

(Mushroom Rock to Rainbow Valley)
Distance: 3km loop
Allow: 1 hour

Trailside botanical and geological information.

4 Pot Alley Beach

Distance: 400m return
Allow: 20 minutes

Stepped trail from the carpark down a sandstone gully to the Pot Alley Beach.

5 Eagle Gorge Beach

Distance: 1km return
Allow: 30-45 minutes

Steep trail down to the Eagle Gorge Beach.

6 Bigurda Trail

(Eagle Gorge to Natural Bridge)
Distance: 8km one-way
Allow: 3 hours

Trail can be rocky with loose and uneven surfaces. Join at Island Rock for a shorter route along a boardwalk to Natural Bridge.

7 Nature's Window

Distance: 800m return
Allow: 30-45 minutes

Begins Loop carpark. Stunning views of the Murchison River Gorge can be seen through a natural rock 'window'.

8 The Loop Trail

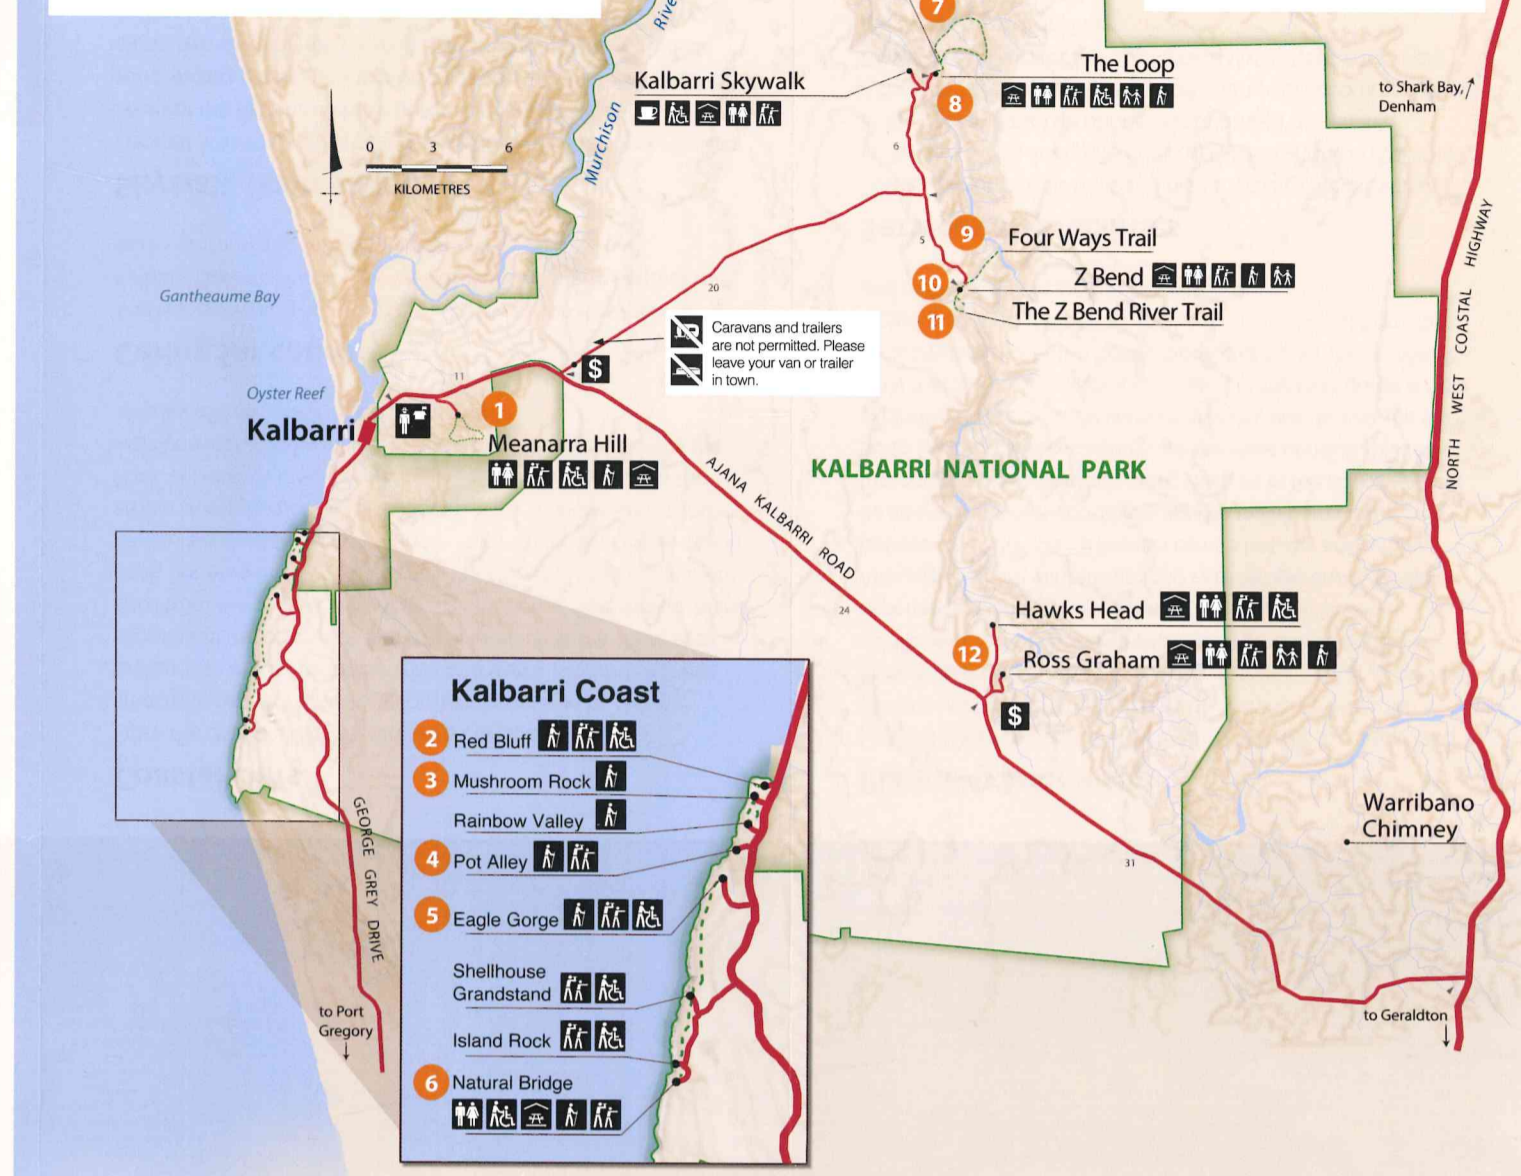

Distance: 9km loop
Allow: 3 to 5 hours

Begins Loop carpark. Steep in sections with uneven surfaces. Begin hike before 7am (November to March).

9 Four Ways Trail

(Idingada Yina)
Distance: 6km return
Allow: 2 to 4 hours

Begins Z Bend carpark. Descends to the river from Z Bend

10 Z Bend Lookout

Distance: 1.2km return
Allow: 1 hour

Begins Z Bend carpark. Leads to a spectacular lookout over the river gorge.

11 Z Bend River Trail

Distance: 2.6km return
Allow: 2 hours

Begins Z Bend carpark. Expect loose rocks, steep descents and ladder climbs.

12 Ross Graham River Trail

Distance: 700m return
Allow: 30 minutes

Begins Ross Graham carpark. Provides the easiest access to the river in the park

Walk trail classification

Class 1 – Easiest All abilities access, flat, even, hardened surface with no steps or steep sections. Suitable for unassisted wheelchair users and prams. Clear directional signage. No bushwalking experience required.

Class 2 – Easy A trail with modified or hardened surface, and gentle hills or occasional steps. Clear directional signage. No bushwalking experience required. May be suitable for assisted wheelchair users (if ramps are provided at steps).

Class 3 – Moderate A trail that may have short steep hills, rough surface, many steps or some rock hopping. Directional signage. Some bushwalking experience and moderate fitness required.

Class 4 – Difficult A trail with rough surface that may have very steep hills or extensive rock hopping. Directional signage may be limited. Bushwalking experience, navigation and emergency first aid skills, and good fitness required.

Class 5 – Extreme A trail with very rough surface, and may have very steep hills, arduous rock hopping or rock scrambling. Limited or no directional signage. For very experienced bushwalkers with navigation and emergency first aid skills, and high level of fitness.

Overnight river gorge hikes – Class 5
Allow four days of intense hiking to cover the 38km route through the gorge from Ross Graham to The Loop. There are no marked trails and river crossings will be necessary. Two-day gorge hikes may be made from Ross Graham to Z Bend or from Z Bend to The Loop. More information should be obtained from the park office before making these hikes.

Overnight hikers please note:

- Overnight hikes are not permitted during warmer months November to March inclusive.
- Due to the hazardous terrain, groups undertaking overnight hikes should consist of at least five experienced people. This is the smallest group considered self-sufficient in an emergency.
- Overnight groups must register at the park headquarters before making the trip.
- All rubbish must be carried out of the gorge.
