This PDF has been created for digital preservation. It may be used for research but is not suitable for other purposes. It may be superseded by a more current version or just be out-of-date and have no relevance to current situations.

REMEMBER

Stay Cool: Don't light fires. Gas barbeques are provided free of charge at Mylies, Point Ann, Quoin Head, Fitzgerald Inlet and Four Mile and St Mary campsites.

Be Clean: Please take your litter with you.

Save Animals and Plants: No firearms or pets are permitted in the park.

Stay on the Road: Follow signs in the Park, and keep vehicles to the roads marked in this leaflet. Observe track closures and speed limits. To drive 4WD on sand engage 4WD and reduce tyre pressure. It is recommended that 2WD vehicles not be driven on sand or other soft surfaces. Don't forget to reinflate tyres when you leave the area.

Be Prepared: Always carry plenty of fresh water (at least four litres per person per day) as there are no reliable water supplies within the Park.

FURTHER INFORMATION

National Park Rangers are always glad to make your visit more enjoyable and informative. Don't hesitate to contact them if you want information or assistance.

TAKE CARE

Caution is required in any natural environment with potentially hazardous terrain, and the Fitzgerald River National Park is no exception. Rip tides are common along the coastline, so care is required when selecting a suitable swimming area. Many areas within the park have steep, rocky slopes and much of the rock is loose and crumbly; so please be careful.

FITZGERALD RIVER

National Park

Fitzgerald River National Park covers an area of 329 039 ha and lies on the central south coast of Western Australia, between the towns of Bremer Bay and Hopetoun, 420 km south-east of Perth.

It is one of the largest and most botanically significant national parks in Australia, with approximately 20 per cent of the State's described plant species.

The Park is managed by the Department of Conservation and Land Management on behalf of the Conservation Commission. There are three Rangers resident in Fitzgerald River National Park, and a Management Plan current to the year 2001 exists for the Park.

MAN AND THE BIOSPHERE

The Fitzgerald River National Park is also an internationally recognised Biosphere Reserve under the UNESCO Man and the Biosphere Program. This is a protected area large enough to serve as a base line for evaluating changes in the environment at both local and global levels.

The Park protects magnificent scenery and is one of the most flora-rich conservation areas in Western Australia. So far, 1 784 plant species have been identified, 75 of which are found nowhere else. More kinds of animals also live in this National Park than in any other reserve in south-western Australia. They include 22 mammal species, 41 reptiles and 12 frogs. The 184 bird species found in the Park include rare species like the ground parrot, western bristle bird and western whipbird.

DIEBACK

Dieback is a plant disease caused by microscopic fungi (*Phytophthora* spp.). There are many different types of *Phytophthora* species, all of which are lethal to hundreds of plant species. These introduced fungi kill plants by destroying their root systems, and place many of the Park's plant species at risk. The climate of the south coast favours the spread of dieback, which thrives in warm, moist soil and can easily be spread in mud or soil that adheres to vehicle tyres or bushwalkers' footwear.

The Fitzgerald River National Park is possibly one of the least infected parks in south-western Australia, and with your help it has a chance of remaining so.

Because vehicles and walkers unwittingly cause the spread of dieback, it is sometimes necessary to close roads and tracks or restrict access to certain areas. When driving in Fitzgerald River National Park, it is essential to keep to established roads and tracks and obey all 'ROAD CLOSED' signs. Please clean your shoes and boots before bushwalking and wash the underbody of vehicles and their tyres to help preserve this magnificent National Park.

ACCESS

Two major gravel roads, Hamersley Drive and Pabelup Drive, provide suitable access for conventional 2WD vehicles.

Entry fees apply.

FROM THE EAST

The Park is entered via Hamersley Drive and Hopetoun or from the north via West River Road. Hamersley Drive is a scenic drive offering excellent views into the heart of the Park, as well as access to several beaches such as Mylies, Barrens, West and Four Mile.

Several of the tracks are only accessible by 4WD vehicles. These are the Whale Bone Beach Track, Quoin Head Track and the Moir Track.

FROM THE WEST

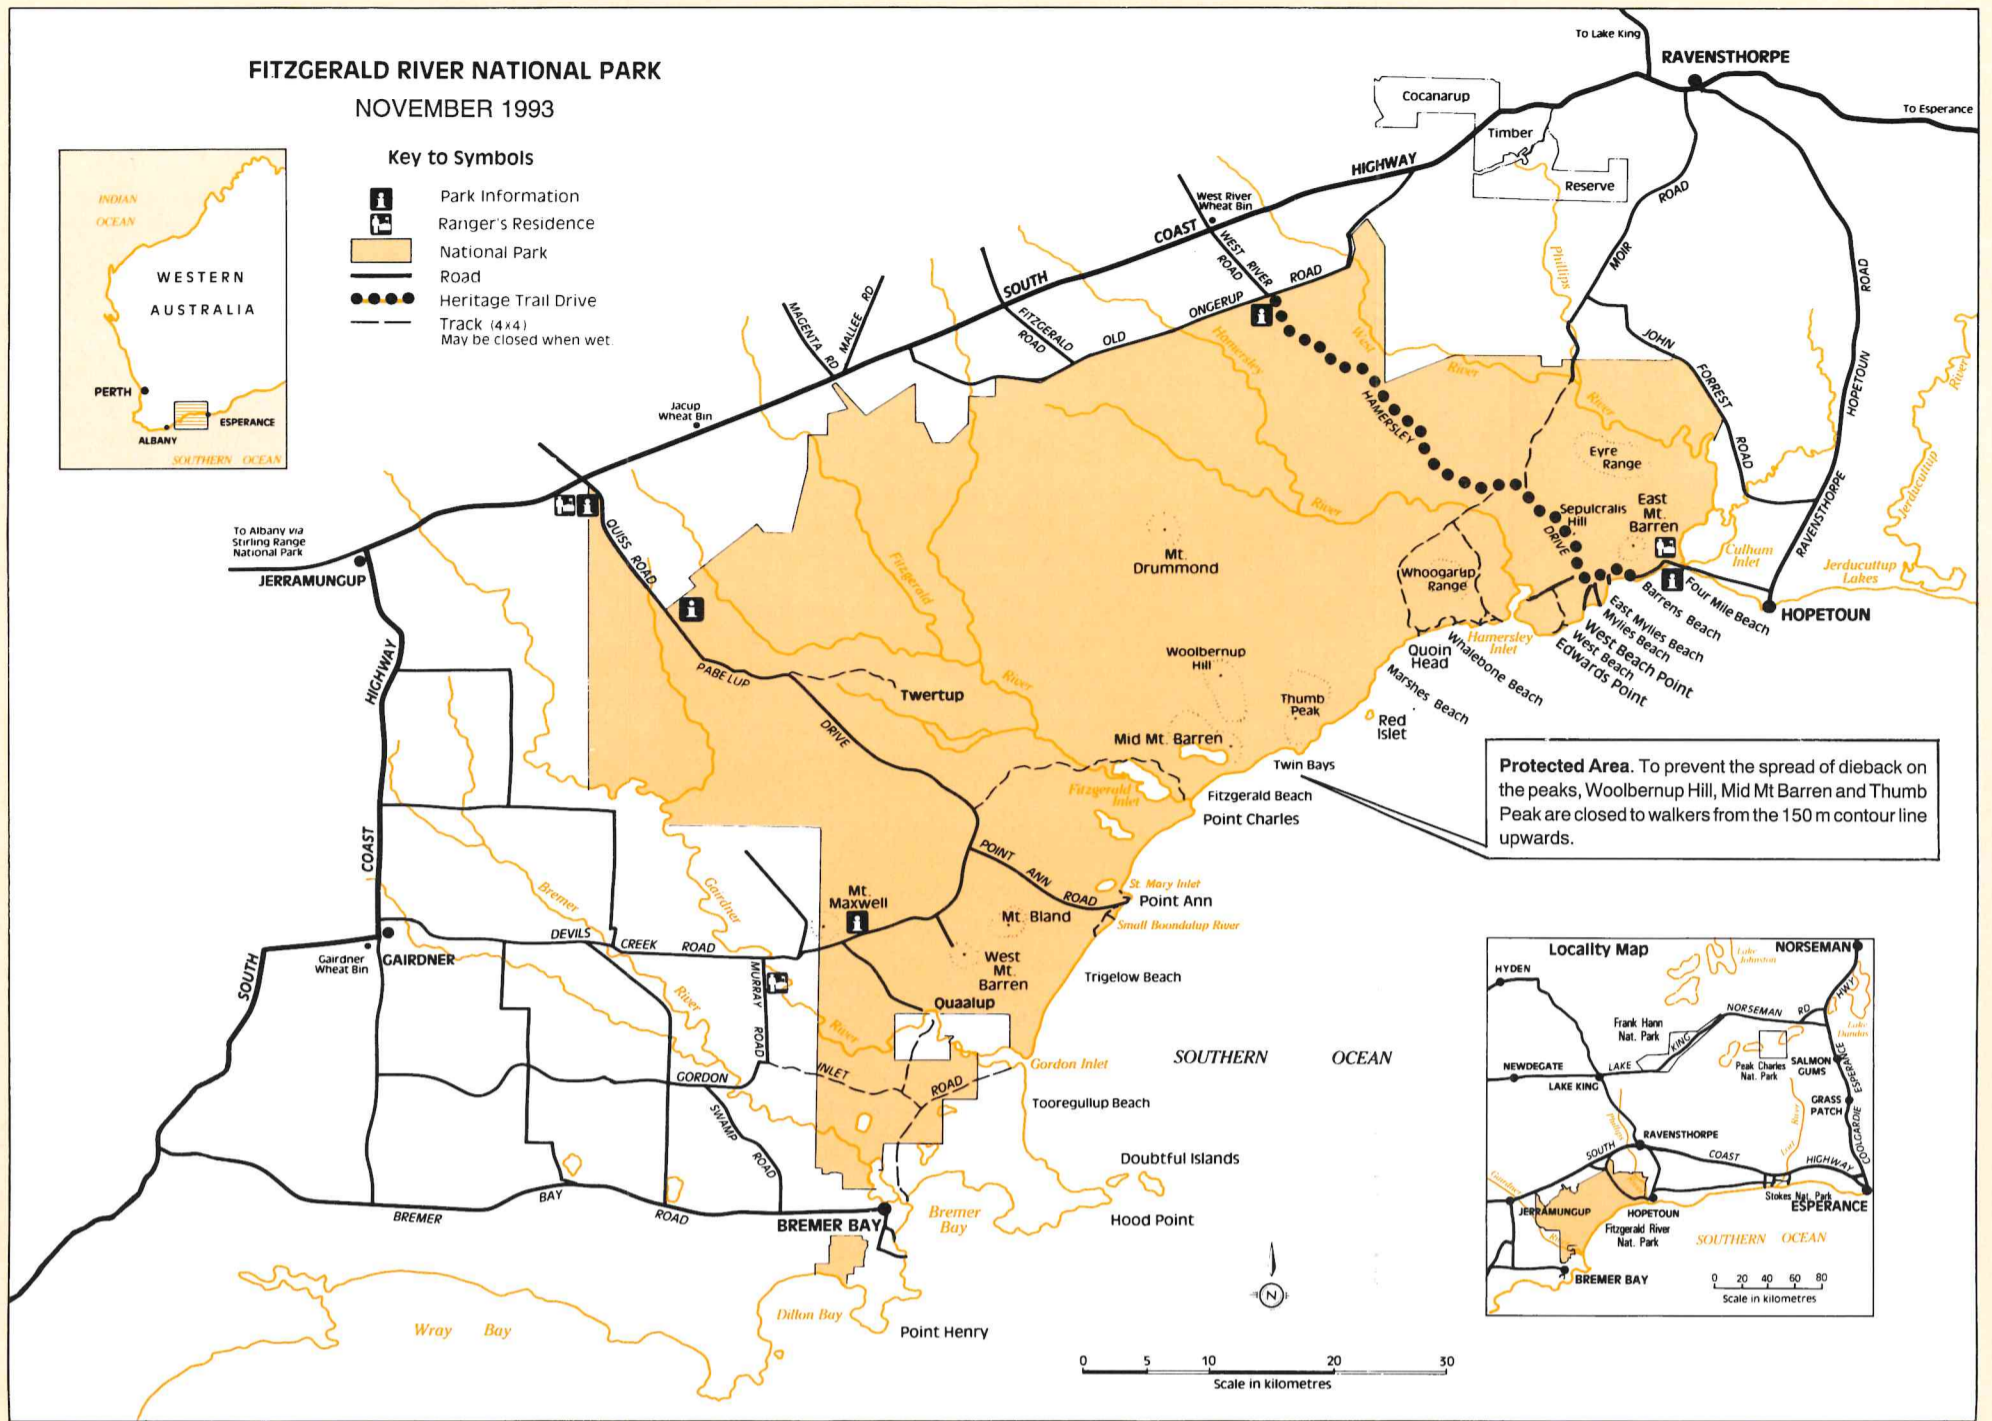

Pabelup Drive is the major loop in the western section of the Park and can be reached from Highway One via Devils Creek Road in the west or Quiss Road in the north.

Points of interest that are accessible by conventional 2WD vehicles are Mt Maxwell, West Mt Barren, Point Ann and, with care, Twertup. The 4WD access tracks are to Fitzgerald Inlet and Trigelow Beach.

Please note:

Roads within Fitzgerald River National Park are not suitable for caravan access. However, caravans are allowed into Quaalup from the west.

Buses larger than 20-seaters are only permitted to East Mt Barren car park from the east, and Quaalup from the west. Buses with 20 seats or less are allowed to West Mt Barren, Point Ann and Mylies Beach.

THINGS TO DO AND SEE

Diverse landscapes, protected beaches, rugged sea cliffs, steep ranges, extensive plains and abrupt river valleys ending in inlets all provide a variety of recreation opportunities based on natural settings.

WILDFLOWERS

Wildflowers are most abundant in the spring. However, there are always some flowers in bloom throughout the year.

WHALE WATCHING

From August to November whales can often be viewed along the coast.

BUSHWALKS

- ❖ West Mount Barren - allow 1-2 hours
- ❖ Point Ann Heritage Trail - 1 hour
- ❖ Twertup "Horrie and Dorri" - 1-2 hours
- ❖ East Mount Barren - 3 hours
- ❖ West Beach Point - 1 hour.

Please contact a Ranger to register for overnight walks or for further details on other walks

FISHING

Fitzgerald River National Park has many excellent fishing beaches. Normal fishing regulations apply.

CAMPING

Vehicle-based camping is available at Four Mile Beach, Hamersley Inlet, Quoin Head, Fitzgerald Inlet and Saint Mary Inlet. Please check map for locations.

Camping fees apply.
