

LARGE JARRAH - COLLIE DIVISION.

by J. Williamson.

This tree is situated about  $1\frac{1}{2}$  miles east of Wellington mill settlement along King Tree road. (Map square EV 56). It stands on the north side of the road and about two chains from it.

Its measurements are :-

Date	24. 1.62.
Total height	151'
Girth at 6'	22'
Log height	87'
Log volume	= B.A. x log ht. x form factor.
	= 38.7 x 87' x 0.6
	= 2010 cu. ft.
	= 40 loads.

This tree has a hollow butt to about 12' on the side facing away from the road. This would reduce the volume by about 5 loads (estimated), giving an actual log volume of 35 loads.

Although the crown does contain dead limbs, it is quite well preserved for such a large tree.
