

## NEW TREE TOP WALK NOW OPEN

A new tree top walk that takes visitors on an enchanting trip through the tingle forest canopy, has been opened in the Valley of the Giants, in Walpole-Nornalup National Park.

Visitors are now able to discover life in the tingle tree canopy, as well as exploring it at different levels and enjoying a variety of views of the shapes, sounds and movement of the forest—an experience that is not to be missed.

Most similar canopy walks in other parts of the world are suspension bridge structures—not for the faint of heart. The Tree Top Walk, however, is a series of sixty-metre, lightweight steel trusses built on steel pylons, which form a secure ramp that rises slowly, while the terrain below falls away to a deep valley. At its highest point the 600-metre loop structure is about 40 metres above the forest floor.

Construction of the Tree Top Walk was part of a redevelopment plan for the Valley of the Giants by the Department of Conservation and Land Management (CALM), that includes a ground-level boardwalk through a grove of veteran tingle trees known as the Ancient Empire. This area contains the 'giant trees' for which the forest was named. (At their base, some of these trees are 16 metres in circumference.) The boardwalk meanders around, and sometimes through, the old trees. Throughout, there are quiet places to sit and reflect on the special nature of the tingle forest, and experience its calming effect.

The Ancient Empire boardwalk is designed to protect the trees from the damaging impact of large numbers of visitors. It is thought that before

the boardwalk was built, some trees were in rapid decline as a result of soil compaction around their root systems, caused by vehicles and humans.

The Tree Top Walk and some parts of the Ancient Empire are suitable for physically disabled people.

Walpole-Nornalup National Park is in a high rainfall area of Western Australia. It has spectacular landscapes encompassing estuaries, forested hills dissected by rivers, and extensive areas where there is little or no evidence of human activity.

The park has four endemic species of eucalypt; three of these are tingle tree species found only in the tall forests in the Walpole area, and the other is the red flowering gum, which is also found closer to the coast.

The Valley of the Giants is 430 kilometres south of Perth, and 100 kilometres west of Albany. Take the Valley of the Giants access road, north off South Coast Highway, and continue for five kilometres to the car park entrance.

The Tree Top Walk is open from 9.00 am to 5.00 pm daily between 1 March and the end of November, and 8.00 am to 6.00 pm daily from 1 December to the end of February.

Admission is \$5 for adults and \$2 for each child under 14

years of age, or \$12 for a family pass. (There is no charge to walk at ground level through the Ancient Empire.)

The Valley of the Giants recreation site will be closed on Good Friday and Christmas Day, and during hazardous weather.

For further information, please contact The Manager, Valley of the Giants, Department of Conservation and Land Management, Walpole.

Phone (098) 408 263 or fax (098) 408 132.

VOLUME ELEVEN NO. 4 WINTER ISSUE 1996

The Perth Observatory celebrates its centenary this year, and during its 100 years' life it has played some major roles in the world of astronomy. Find out more on page 10.

John Forrest National Park has long been a popular picnicking spot for Perth residents, but this place of beauty has much more to offer. See page 16.

The Cape Range, in north-west WA, is known for its harsh environment. But if you look a little closer you'll discover the vast 'Range of Flowers' that live there. See page 28.

In 1961, the noisy scrub-bird was rediscovered at Two Peoples Bay. In 1994, the Gilbert's potoroo turned up unexpectedly. Find out more about this haven for the lost and found on page 35.

If all goes to plan, the Ord River area, will soon be known as a prime farming area for rare tropical timbers. Find out why on page 23.

## FEATURES

ONE HUNDRED YEARS OF STARGAZING JAMES BIGGS .....	10
JOHN FORREST NATIONAL PARK: A PLACE OF BEAUTY GEORGE DUXBURY .....	16
TROPICAL TREE FARMING ANDREW RADOMILJAC & MANDY CLEWS .....	23
A RANGE OF FLOWERS GREG KEIGHERY & NEIL GIBSON .....	28
TWO PEOPLES BAY: A HAVEN FOR THE LOST AND FOUND ALAN DANKS .....	35
WESTERN SHIELD CARIS BAILEY .....	41
BANKING FOR THE FUTURE ANNE COCHRAN, ANNE KELLY & DAVID COATES .....	49

## REGULARS

IN PERSPECTIVE .....	4
BUSH TELEGRAPH .....	6
ENDANGERED MARSUPIAL-MOLES .....	34
URBAN ANTICS .....	54

## COVER

Fox-baiting has been shown to be a major tool in rebuilding populations of native animals. Now, scientists are embarking on a Statewide feral animal control program to help bring back native species, such as the western swamp tortoise, from the brink of extinction. The project is called 'Western Shield'.

The story is on page 41.
