Update to the informal names used in "Flora of the Kimberley Region"

The "Flora of the Kimberley Region" (Wheeler *et al.* 1992) listed 219 taxa without formal names. These taxa, each designated by a letter, may have been undescribed, or may have represented situations where the research necessary to elucidate the correct names was beyond the scope of the publication. Those now ascribed to species or subspecies are listed below. An asterisk denotes introduced taxa. Staff members and associates of the Western Australian Herbarium have contributed to the information presented here, especially Paul Wilson, Margaret Lawrence, Barbara Rye, Gill Perry and Judy Wheeler.
