THREATENED AND PRIORITY FLORA LIST

for Western Australia

M.G. Smith

Species and Communities Branch

27 April 2012

CONSERVATION CODES

for Western Australian Flora

T: Threatened Flora (Declared Rare Flora - Extant)

Taxa* which have been adequately searched for and are deemed to be in the wild either rare, in danger of extinction, or otherwise in need of special protection, and have been gazetted as such.

X: Schedule 2 under the *Wildlife Conservation Act 1950*

o **Presumed Extinct Flora** (Declared Rare Flora – Extinct)

Taxa which have been adequately searched for and there is no reasonable doubt that the last individual has died, and have been gazetted as such.

Threatened Flora (Schedule 1) are further ranked by the Department according to their level of threat using IUCN Red List criteria:

CR: Critically Endangered - considered to be facing an extremely high risk of extinction in the wild.

EN: Endangered –considered to be facing a very high risk of extinction in the wild.

VU: Vulnerable - considered to be facing a high risk of extinction in the wild.

Taxa that have not yet been adequately surveyed to be listed under Schedule 1 or 2 are added to the Priority Flora List under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened flora or fauna. Taxa that are adequately known, are rare but not threatened, or meet criteria for Near Threatened, or that have been recently removed from the threatened list for other than taxonomic reasons, are placed in Priority 4. These taxa require regular monitoring. Conservation Dependent taxa are placed in Priority 5.

*Taxa = plural of taxon (a classificatory group of any taxonomic rank, e.g. a family, genus, species or any infraspecific category i.e. subspecies, variety or forma).

1: Priority One: Poorly-known taxa

Taxa that are known from one or a few collections (generally less than five), all on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, Shire, Westrail and Main Roads WA road, gravel and soil reserves, and active mineral leases and under threat of habitat destruction or degradation. Taxa may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes.

2: Priority Two: Poorly-known taxa

Taxa that are known from one or a few collections, some of which are on lands not under imminent threat of habitat destruction or degradation, e.g. national parks, conservation parks, nature reserves, State forest, vacant Crown land, water reserves, etc. Taxa may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes.

3: Priority Three: Poorly-known taxa

Taxa that are known from collections from several localities not under imminent threat, or from few but widespread localities with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Taxa may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and known threatening processes exist that could affect them.

4: Priority Four: Rare, Near Threatened and other taxa in need of monitoring

(a) Rare. Taxa that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These taxa are usually represented on conservation lands.

(b) Near Threatened. Taxa that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for Vulnerable.

(c) Taxa that have been removed from the list of threatened taxa during the past five years for reasons other than taxonomy.

5: Priority Five: Conservation Dependent taxa

Taxa that are not threatened but are subject to a specific conservation program, the cessation of which would result in the taxa becoming threatened within five years.

The conservation codes for Western Australian flora and fauna can be downloaded from the DEC website at:
<http://www.dec.wa.gov.au/content/view/full/852/2010/1/1/>

KEY TO FIELDS IN LIST REPORT

WA Status: Conservation status of taxon. Either listed under the *Wildlife Conservation Act 1950* (as Threatened (T) or Presumed Extinct (X) or Priority listed (1,2,3,4 or 5). See conservation codes for definitions.

WA Rank

Category: The threat category the taxon is recognised as in Western Australia (see conservation codes for definitions).

Criteria: The criteria that the taxon meets to be listed under the category of threat. Categories and criteria follow IUCN guidelines <http://www.iucnredlist.org/technical-documents/categories-and-criteria>

EPBC Act: The category that the taxon is listed under the Commonwealths' *Environment Protection and Biodiversity Conservation Act 1999*. Note this list is maintained by the Commonwealth and the official list should be sourced at the Commonwealths' website <http://www.environment.gov.au/cgi-bin/sprat/public/publicthreatenedlist.pl?wanted=flora>

DEC Regions:

GOLD=Goldfields; KIMB= Kimberley; MWST=Midwest; PILB=Pilbara; SCST=South Coast; SWST=South West; SWAN=Swan; WARR=Warren ; WHTB=Wheatbelt.

Distribution: Listed according to the nearest town/place name. Includes historical records. NP=National Park, NR=Nature Reserve, Stn=Station, Mt=Mount, Is=Island, Rg=Range

Recovery Plan: Identifies if the taxon has a Recovery Plan (RP), Interim Recovery Plan (IRP) or Multiple Species Plan (MSP).

KEY TO FILEDS IN CHANGES REPORT

Current Nameid: a number assigned to the taxon in the WA plant census

Current name: name of taxon that is currently listed

Change code: type of change that has occurred:

ADDITION: Added to list – new entry to State (Wildlife Conservation Act or Priority) or Commonwealth list (EPBC). See also upgraded or downgraded.

UPGRADED: Taxon that is on the Priority list has been upgraded to Threatened or Presumed Extinct under the *Wildlife Conservation Act 1950*.

DOWNGRAD: A taxon has been downgraded from Threatened or Presumed Extinct under the *Wildlife Conservation Act* to the Priority list.

CAT CHG: The category under which a taxon is listed has been changed (e.g. changed from Priority 1 to Priority 3).

NAME CHG: Taxon has had a name change.

RANK CHG: Taxon has had a change in its ranking (either category or criteria)

OTHER: Records a change to other details not related to Conservation status (i.e. Location and Recovery Plan details).

DELISTED: Taxon removed from the particular list it was on.

Modified date: date the change was made.

List code: List the taxon is listed under; Priority= Priority flora list, WCA_1991= *Wildlife Conservation Act 1950* (note the 1991 in the list codes refers to the year the two schedules of flora were first recognised).

Old name: displays the name it was previously listed under before the change.

*Species may occur in more than one DEC Region

RECOMMENDING CHANGES TO THE LIST

Threatened Flora

Threatened flora listings are reviewed annually and changes are recommended by the Threatened Species Scientific Committee (TSSC). Nomination forms to add taxa to, or delete taxa from the current Threatened (Declared Rare Flora) lists or recommend a change in category can be downloaded from the DEC Website on the '*Call for public nominations for listing (and delisting) of threatened plants and animals page*' <http://www.dec.wa.gov.au/content/view/252/2011/> . Further information on the listing process and nomination guidelines can also be downloaded from this page.

TSSC meetings are usually held near the end of the first quarter of the calendar year. The closing date for nominations for TSSC meetings is the last Friday of January that year.

Taxa will remain listed under their current status until the recommendations are approved by the Minister for Environment and are listed in the next *Wildlife Conservation (Rare Flora) Notice* which is published in the government gazette.

Priority Flora

You do not have to fill out a nomination form to nominate a species for the DEC Priority list.

To nominate a species for priority listing, contact DEC's Senior Botanist, Species and Communities Branch with your recommendation or email tssc@dec.wa.gov.au. Your email should contain the information required to demonstrate how the species meets the Priority category you recommend. Nominations for Priority species may be sent at any time of year, and changes may be made to the DEC Priority Flora list at any time of year.

For further information on listing of Threatened or Priority Flora please contact DEC's Species and Communities Branch on 9334 0455.

CHANGES TO THE THREATENED AND PRIORITY FLORA LIST

FROM 17th September 2010

TO 27th April 2012

Department of Environment & Conservation
Threatened & Priority Flora List Changes Report

Printed: 27 April 2012

Restrictions: Threatened & Priority; Eff To: 27/4/2012

Notes for interpretation: The new change codes to the Threatened and Priority Flora List identify where a change has occurred to a particular List (e.g. Priority Flora List or under the *Wildlife Conservation Act 1950*) and as a result a taxon can have a change code of "delisted" but still have a conservation status as they have been removed from one List and placed on another. For example, below there are three changes identified for *Acacia leptoneura*: it was added as Priority 1 in March 2011, upgraded to being listed as Threatened under the Wildlife Conservation Act in February 2012 and so it was subsequently delisted from the Priority list. Therefore delisted does not always mean it no longer has a conservation status.

Name Id	Taxon	Change code	date modified	List code	status	old name	District
16115	<i>Acacia capillaris</i>	ADDITION	23/03/2011	Priority	2		EAST KIMBERLEY, WEST KIMBERLEY

BILL MARMION MLA, Minister for Environment; Water.

CO302*

Wildlife Conservation Act 1950

Wildlife Conservation (Rare Flora) Notice 2012

Made by the Minister for the Environment under section 23F(2) of the Act.

1. Citation

This notice may be cited as the *Wildlife Conservation (Rare Flora) Notice 2012*.

2. Interpretation

In this notice—

“**extant**” means known to be living in a wild state;

“**protected flora**” means any flora belonging to the classes of flora declared by the Minister under section 6 of the Act to be protected flora by notice published in the *Gazette* 9 October 1987, at p. 3855;

“**taxon**” includes any taxon that is described by a genus name and any other name or description.

Note: The plural form of “taxon” is “taxa”.

3. Rare flora

Subject to clause 4, protected flora—

- (a) specified in Schedule 1, being taxa that are extant and considered likely to become extinct or rare and therefore in need of special protection; and

- (b) specified in Schedule 2, being taxa that are presumed to be extinct in the wild and therefore in need of special protection,

are declared to be rare flora for the purposes of section 23F of the Act throughout the State.

4. Application

Clause 3 does not apply to those plants of a taxon of protected flora specified in Schedule 1 or 2 that have been planted for any purpose other than such plants that have been planted for the purpose of conservation of that taxon and in accordance with approval given by the Director General.

5. Revocation

The *Wildlife Conservation (Rare Flora) Notice 2010(2)* is revoked.

Schedule 1 — Extant taxa

[cl. 3(a)]

Division 1 — Spermatophyta (flowering plants, conifers and cycads)

5. *Frankenia decurrens*
6. *Lepidium drummondii*
7. *Leptomeria dielsiana*
8. *Leucopogon cryptanthus*
9. *Opercularia acolytantha*
10. *Ptilotus caespitosus*
11. *Ptilotus pyramidatus*
12. *Taraxacum cygnorum*
13. *Tetralochea fasciculata*
14. *Thomasia gardneri*

BILL MARMION MLA, Minister for Environment; Water.

LOCAL GOVERNMENT

LG301*

LOCAL GOVERNMENT ACT 1995

City of Stirling

Repeal Local Law 2012

Under the powers conferred by the *Local Government Act 1995* and under all other powers enabling it, the Council of the City of Stirling resolved on 7 February 2012 to make the following local law.

1. Citation

This local law may be cited as the *City of Stirling Repeal Local Law 2012*.

2. Commencement

This local law comes into operation 14 days after the date of publication in the *Government Gazette*.

3. Repeal

By-laws 543 to 579 of the *City of Stirling Constitution and General By-Laws* as published in the *Government Gazette* on 12 May 1971 and as amended and published in the *Government Gazette* on 25 January 1974, 20 December 1974, 15 October 1976, 14 October 1977, 8 June 1979, 31 August 1979, 14 September 1979, 7 December 1979, 7 November 1980, 15 January 1982, 22 March 1985, 8 April 1988, 7 July 1989, 31 May 1991, 26 November 1993, 24 December 1993, 19 January 1996 and 3 December 1999 are repealed.

Dated: 10 February 2012.

The Common Seal of the City of Stirling was affixed by authority of a resolution of the Council in the presence of—

DAVID BOOTHMAN, Mayor.
STUART JARDINE, Chief Executive Officer.

Threatened and Priority Flora Report Form

Please complete as much of the form as possible, with emphasis on those sections bordered in black.

TAXON: _____ **TPFL Pop. No.:** _____
OBSERVATION DATE: ____ / ____ / ____ **CONSERVATION STATUS:** _____ **New population**
OBSERVER/S: _____ **PHONE:** _____
ROLE: _____ **ORGANISATION:** _____

DESCRIPTION OF LOCATION (Provide at least nearest town/named locality, and the distance and direction to that place): _____

DEC DISTRICT: _____ **LGA:** _____ **Reserve No.:** _____
DATUM: _____ **COORDINATES:** (If UTM coords provided, Zone is also required) **METHOD USED:** _____
 GDA94 / MGA94 DecDegrees DegMinSec UTM GPS Differential GPS Map

 Conservation park Water reserve UCL SLK/Pole _____ to _____ Specify other: _____

AREA ASSESSMENT: Edge survey Partial survey Full survey Area observed (m²): _____
EFFORT: Time spent surveying (minutes): _____ No. of minutes spent / 100 m²: _____
POP'N COUNT ACCURACY: Actual Extrapolation Estimate Count method: _____
 (Refer to field manual for list)
WHAT COUNTED: Plants Clumps Clonal stems
TOTAL POP'N STRUCTURE:

	Mature:	Juveniles:	Seedlings:	Totals:
Alive				
Dead				

Area of pop (m²): _____
 Note: Pls record count as numbers (not percentages) for database.
QUADRATS PRESENT: No. _____ Size _____ Data attached Total area of quadrats (m²): _____
Summary Quad. Totals: Alive _____
REPRODUCTIVE STATE: Clonal Vegetative Flowerbud Flower
 Immature fruit Fruit Dehisced fruit Percentage in flower: _____ %

CONDITION OF PLANTS: Healthy Moderate Poor Senescent
COMMENT: _____

THREATS - type, agent and supporting information:	Current impact (N-E)	Potential Impact (L-E)	Potential Threat Onset (S-L)
Eg clearing, too frequent fire, weed, disease. Refer to field manual for list of threats & agents. Specify agent where relevant. Rate current and potential threat impact: N=Nil, L=Low, M=Medium, H=High, E=Extreme Estimate time to potential impact: S=Short (<12mths), M=Medium (<5yrs), L=Long (5yrs+)

Threatened and Priority Flora Report Form

Version 1.0 January 2010

HABITAT INFORMATION:

LANDFORM:	ROCK TYPE:	LOOSE ROCK:	SOIL TYPE:	SOIL COLOUR:	DRAINAGE:
Crest <input type="checkbox"/>	Granite <input type="checkbox"/>	(on soil surface; eg gravel, quartz fields)	Sand <input type="checkbox"/>	Red <input type="checkbox"/>	Well drained <input type="checkbox"/>
Hill <input type="checkbox"/>	Dolerite <input type="checkbox"/>		Sandy loam <input type="checkbox"/>	Brown <input type="checkbox"/>	Seasonally inundated <input type="checkbox"/>
Ridge <input type="checkbox"/>	Laterite <input type="checkbox"/>		Loam <input type="checkbox"/>	Yellow <input type="checkbox"/>	Permanently inundated <input type="checkbox"/>
Outcrop <input type="checkbox"/>	Ironstone <input type="checkbox"/>	0-10% <input type="checkbox"/>	Clay loam <input type="checkbox"/>	White <input type="checkbox"/>	Tidal <input type="checkbox"/>
Slope <input type="checkbox"/>	Limestone <input type="checkbox"/>	10-30% <input type="checkbox"/>	Light clay <input type="checkbox"/>	Grey <input type="checkbox"/>	
Flat <input type="checkbox"/>	Quartz <input type="checkbox"/>	30-50% <input type="checkbox"/>	Peat <input type="checkbox"/>	Black <input type="checkbox"/>	
Open depression <input type="checkbox"/>	Specify other: _____	50-100% <input type="checkbox"/>	Specify other: _____	Specify other: _____	
Drainage line <input type="checkbox"/>					
Closed depression <input type="checkbox"/>					
Wetland <input type="checkbox"/>					
	Specific Landform Element:				
	(Refer to field manual for additional values)				
CONDITION OF SOIL:	Dry <input type="checkbox"/>	Moist <input type="checkbox"/>	Waterlogged <input type="checkbox"/>	Inundated <input type="checkbox"/>	

VEGETATION CLASSIFICATION*:

Eg: 1. Banksia woodland (B. attenuata, B. illicifolia);
2. Open shrubland (Hibbertia sp., Acacia spp.);
3. Isolated clumps of sedges (Mesomelaena tetragona)

1. _____

2. _____

3. _____

4. _____

ASSOCIATED SPECIES:

Other (non-dominant) spp _____

* Please record up to four of the most representative vegetation layers (with up to three dominant species in each layer). Structural Formations should follow 2009 *Australian Soil and Land Survey Field Handbook* guidelines – refer to field manual for further information and structural formation table.

CONDITION OF HABITAT: Pristine Excellent Very good Good Degraded Completely degraded

COMMENT:
