CLAUSE 10

- 10 Reserve No. 36996 (D'Entrecasteaux National Park)
10. (1) All that portion of Nelson Location 7226 described in Certificate of Title Volume 1426 Folio 015 comprising 71.596 4 hectares is —
- (a) re-vested in Her Majesty as of Her former estate;
 - 15 (b) removed from the operation of the *Transfer of Land Act 1893*; and
 - (c) constituted Crown land within the meaning of that expression in the *Land Act 1933*.
- (2) Reserve No. 36996, classified as of Class A, comprising
- 20 114 565.932 8 hectares or thereabouts, set apart for "National Park and Water" and vested in the Authority, is amended —
- (a) by excising an area of 368.061 5 hectares, being Locations 13471, 13472 and portions of Locations 13473 and 13474 as depicted on Reserve Plan No. 431;
 - 25 (b) by including an area of 39.405 3 hectares, described as Location 13481 on Miscellaneous Diagram No. 525; and
 - (c) by redescribing the reserve to comprise those areas shown bordered red on Reserve Plan No. 367 (sheets 1 to 6 inclusive) and Miscellaneous Diagrams No. 309, 316 and 525,
- 5 so that the reserve comprises 115 447 hectares or thereabouts.

CLAUSE 10

The D'Entrecasteaux National Park was consolidated into one Class "A" reserve via Reserves Act 1992 (No. 52 of 1992), increasing the size of "National Park and Water" Reserve 36996 to 114566.5135 hectares or thereabouts. This consolidation process was in accordance with the EPA System Two Report and CALM's 1987 Management Plan. The Park extends for approximately 130 kilometres along the South Coast, its western boundary being about 40 kilometres east of Augusta and its eastern boundary being about 20 kilometres west of Walpole.

It was known at the time of consolidation that areas earmarked for inclusion were subject to mining tenements. However consolidation was achieved via The Resolution of Conflict Policy.

In line with procedures for the administration of mineral exploration and mining in conservation reserves endorsed by Cabinet on 13 December 1993, Cabinet (31 October 1994) supported in principle the provision of greater security of tenure than presently provided by Exploration Licences 70/588 and 70/589 to Cable Sands (WA) Pty Ltd to that part of its Jangardup South titanium mineral deposit within the bounds of the Park. To achieve this in part it is proposed to:-

- (i) excise 368.0615 hectares, shown coloured blue on the sketch, (**annexure 1**) from Reserve 36996.
- (ii) revest that portion of Nelson Location 7226 held in Certificate of Title Volume 1426 Folio 015 in Her Majesty as of Her former estate by removing the land from the operation of the Transfer of Land Act 1893 and constituting it as Crown land.
- (iii) set aside as a Class "C" reserve for "Conservation and Resource Management" the land described in (i) and portion of the land described in (ii) and now shown and delineated on Reserve Plan No. 431 as Nelson Locations 13471, 13472, 13473 and 13474, (**annexure 2**). Vesting would be in the National Parks and Nature Conservation Authority and conditional upon no management initiatives being undertaken which may affect native title rights and interest without consideration under the Native Title Act, 1993.

Once the reserve changes are finalised, Cable Sands has indicated it would apply for a mining lease to coincide with the Class "C" reserve now proposed. The Company will continue collecting geological and environmental data under rights of the Exploration Licences, leading to a submission of a Notice of Intention to mine the mineral deposit. This would be considered by the State Mining Engineer, and the Environmental Protection Authority, and the Mining Lease issued subject to the Native Title Act process. If environmental and mining approvals are not given the Mining Lease would not be granted and the land in the Class "C" reserve would be incorporated into the National Park.

Part of the arrangements are that the Company would transfer Nelson Location 12897 into the name of the Executive Director of CALM once the Class "C" reserve was created.

Location 12897 contains 1083.1740 hectares. Of this, if and when the Company obtains approvals to mine, up to 437 hectares with native vegetation coverage could then be added to the National Park via the next available Reserves Bill.

The Company will require access for mining and related uses, without payment of compensation to CALM, to about 533 hectares of Location 12897. Rehabilitation of all areas affected by mining or support work will be completed by the Company in accordance with usual mining approvals.

The balance of Location 12897, about 113 hectares, will require rehabilitation to restore native vegetation cover prior to, and if it is eventually to be added to the National Park.

- (iv) the remaining portion of the land revested in (ii) described as Nelson Location 13481, containing an area of 39.4053 hectares, as shown and delineated on Miscellaneous Diagram 525, to be included into Reserve 36996, (annexure 3).

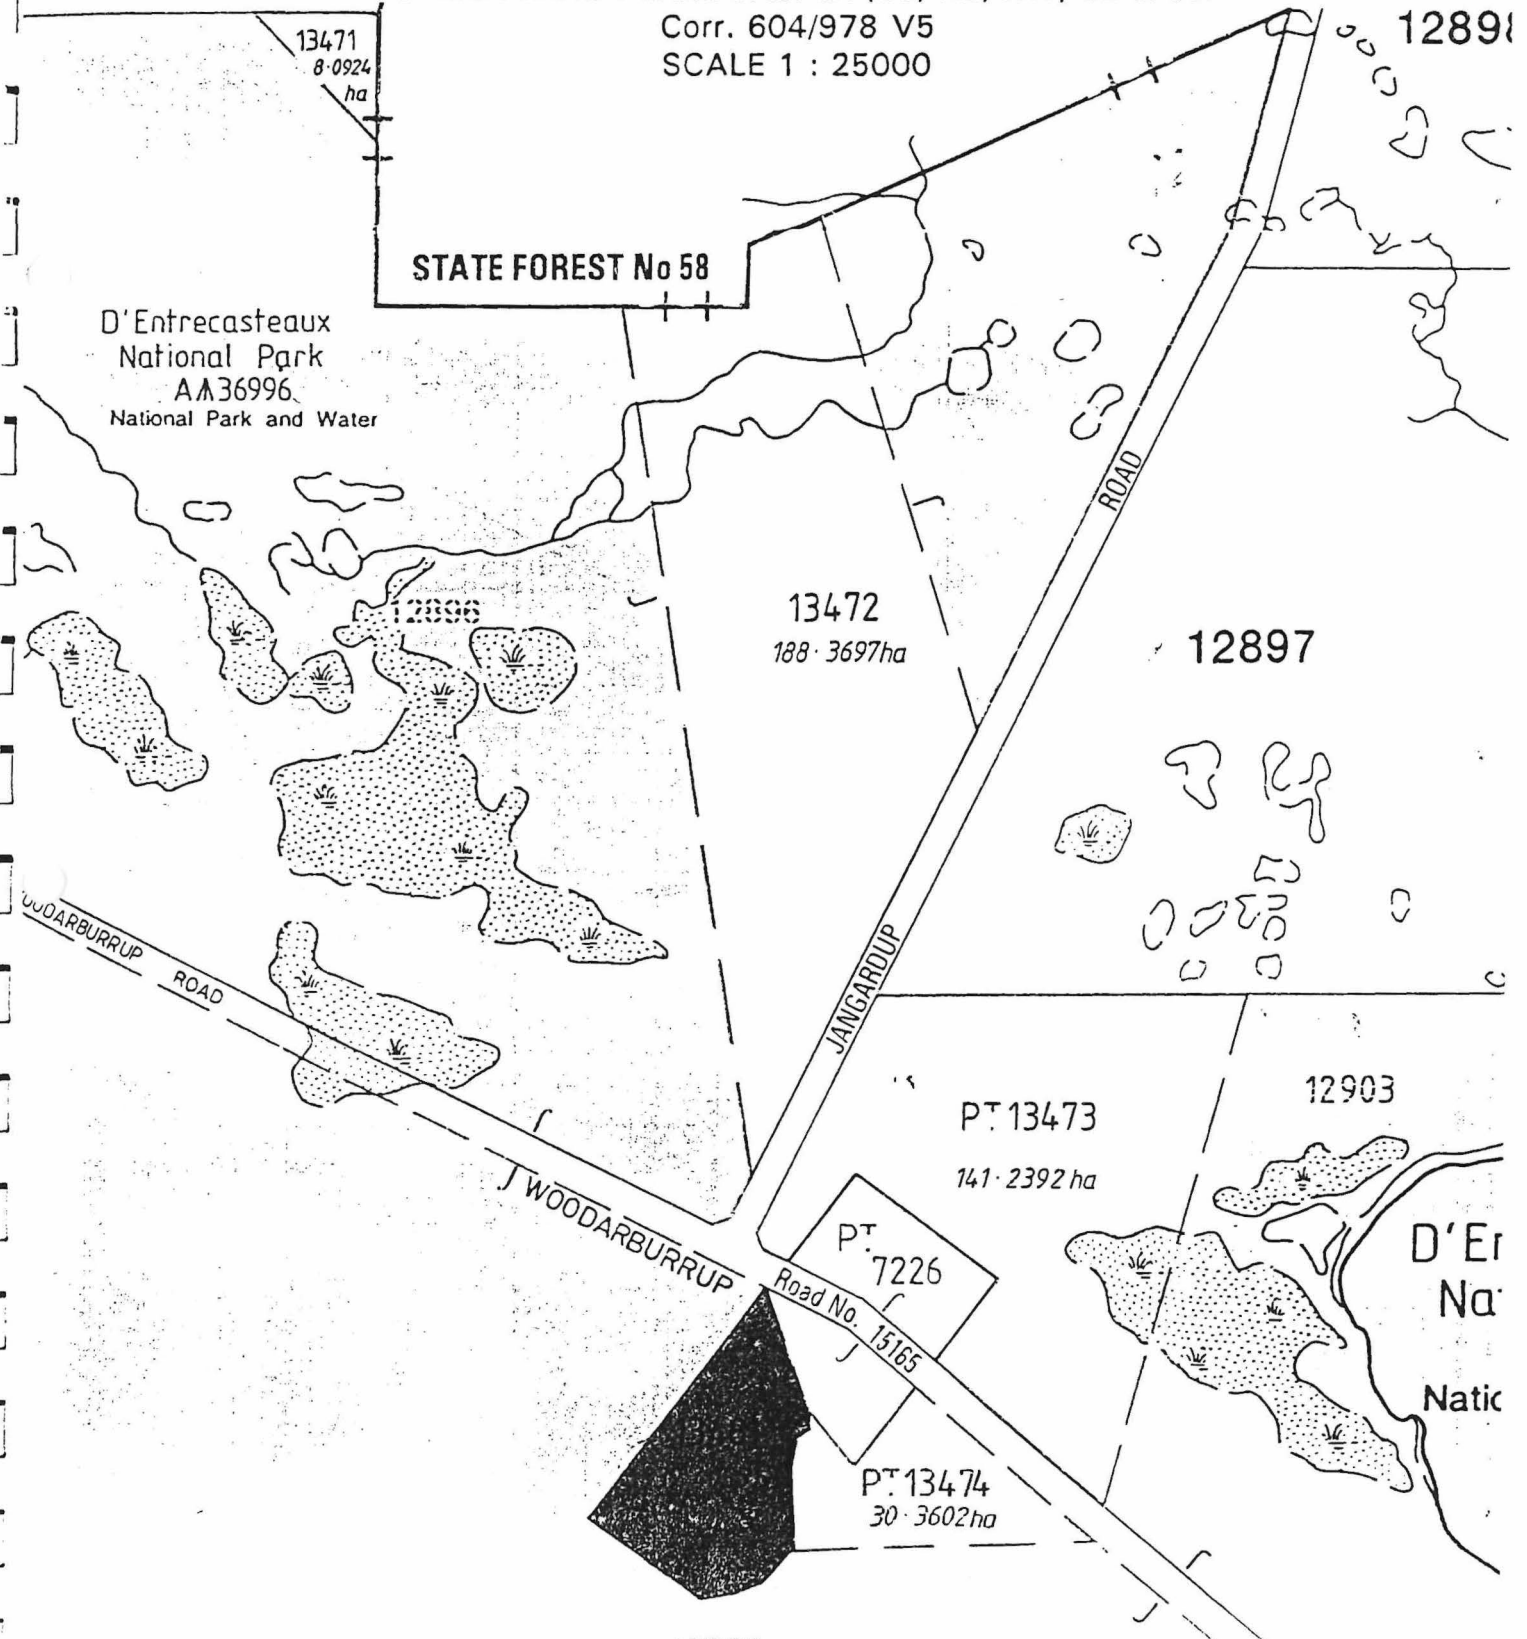

As a separate matter, improvement in technology and more accurate plan production has enabled the calculations of areas and distances to be more precise. Without external boundaries being altered application of new methods has resulted in a variation of about plus 1,210 hectares to the calculated area of the Park being discovered. A further sheet of Reserve Plan Number 367 has been drawn (sheet number 6) to further simplify graphical presentation of the Park.
