①

EXAMPLE of Poor Management
of one of the KOALA feed lots east
of Yanchep Nat Park - rarely coppiced -
Destroyed by leaf minor - weed infested.

Most lots where in this condition
by the mid ~~1990~~ 2000's - Resulting in
feed shortages for Koalas ~ I had to go
further afield each month to find good
quality feed ~ often 200km day.

The Park management where responsible
for planning/works. It never happened.
