Kensington Western Australia

Records are organized chronologically within region.

To avoid circumlocutions, some locality names have been used anachronistically.

General undated comment has not been included.

Those records in *italics* were not used to quantify season of burning in Abbott, I. *Aboriginal fire regimes in south-west Western Australia: evidence from historical documents.*

Records from newspapers and Colonial Secretary Office Letters Received have been extracted from summaries kindly made available by SJ Hallam or available in the Batty Library.
