YOUR REF: - 198/76 26. 8. 83

Dear Mr. Briggs,

I take this opportunity to thank you and your Department for your kindness in supplying me with relevant information. As time passes, I hope to be able to put all the gathered documentation in a readable and understandable order so it may benefit those who need it the most.

Thank you again.

Graham.

IB.

M76 - Mary Carroll Park

A concept plan was prepared in 1977. Comments were made on it by the Dept. of Fisheries and Wildlife.

Subsequent works have included construction of artificial islands, deepening of water in parts, and use of spoil to construct walkways for the public.

The aims have been basically two-fold: to improve water-bird habitats and to enhance the value of part of the area for recreational use.
